Don't Trust to Memory to preserve the changing likeness of your grown boy or girl. Memory plays strange tricks sometimes. A good photograph or so every year will keep an accurate record of the subtle changes in their development. And what a satisfaction that little collection will be to you and to them in after years.

Hard and Soft Coal

Now is the time to put in your supply of hard and soft coal for the winter. I have a good supply of both kinds of the best coal in my bins, at prices which are right. I have recently removed to my new location at 111 West Main street and will be pleased to have you call.

High Cost of Living Reduced

DID it ever occur to you that one of the big items in our cost of living is the fuel bill to keep us warm during the long winter months? You cannot reduce it by buying cheaper fuel, but you must turn to a heater that produces more of the heat units, of which a great portion are wasted in some heaters. We absolutely guarantee that we will give you 25 percent more heat with 25 percent less fuel. Now, dear friends, it would be folly for us to make such a claim were it not for the fact we carry a line of heating stoves which have proven popular with our trade in former years.

Our line of heaters was never more complete than at the present time. We are always pleased to demonstrate the merits of our heaters.
