### Neat Bales Sell Best

MUCH depends on those two features of the International Motor Hay Press called the bale tension and the spring roller tucker. Your bales sell best when they are all of one size and weight, solid and compact, neat in appearance, with no ragged edges. When you look over the I H C motor press you will see how much these two strong details have to do with your hay press. I H C motor presses all have self feeders that keep your feet out of danger, and by their regular operation increase the capacity. You will find the same strong points on all three sizes of the press. The I H C engine on the motor press will work for you all year round. Separate it from the press and you have a regular portable outfit to run any other power machines about the farm. Drop in some day and let us explain the merits of this press.
