We Want To Talk To You!

Buy your SILO NOW and plant a piece of corn to fill it. You will save money by being ready. Every year you put this off you waste the price of a silo. Our silo has been built in every state in the Union for from one to twelve years and has given the best of satisfaction.

We claim the Interlocking Cement Stave Silo is the best:

Because it is air tight and waterproof and will preserve the silage perfectly under all weather conditions.

Because it is a permanent silo, grows stronger with age.

Because it cannot be destroyed by fire, and is strong enough to resist any wind except a cyclone, against which no building can stand.

Because it is acid proof.

Because it carries its own life and fire insurance.

Because it will freeze as little as any silo on the market.

We claim the Interlocking Cement Stave Silo is the cheapest.

Because it sells for less than a good wood silo and will last forever.

Because the first cost is the total cost, no expense for repairs.

The Interlocking or Angle Joint Cement Stave is 28 inches long, 10 inches wide 2 1/2 inches thick, the upper end of these staves are convex and the lower end concave interlocking the ends as well as the sides, leaving no weak joints.
