**Higher Prices**

During the past year the price of nearly all the machines we sell have advanced from 10 to 100 per cent.

There is no relief in sight for all manufacturers have to buy their steel and other supplies from eight to twelve months in advance. It is, therefore, a sure thing that the price of next year's machinery will be much higher.

We have the largest stock that we ever carried and until that is sold we are naming prices that can not be duplicated on the market today.

If you need machinery of any kind this year or next it will be to your advantage to buy before the present stock is exhausted.
