Catarhal Deafness Cannot Be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarhal deafness, and that is by a constitutional remedy. Catarhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness results. Unless the inflammation can be reduced and this tube restored to normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surface of the Eustachian Tube. Hall's Catarrh Cure acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Appreciated Lover's Tribute. When Jenny Lind was in Vienna, years ago, a lover learned millinery and floristry so that he might see in her hat daily three red roses as a tribute to her art. He might have sent huge baskets to her over the footlights, but his method was more delicate and Jenny Lind was pleased. Princess Metternich, too, used to wear flowers in her hat, according to a prominent florist, who trimmed exotic millinery for her daily.

When Stoppers Are Obstinate. Bottle stoppers have an annoying habit of refusing to come out just when one wants them to do so. The following is a sure way of removing the most refractory stopper. By means of a feather apply a drop or two of salad oil just where the stopper joins the neck of the bottle. Then put the bottle at a little distance from a fire, where it will become slightly warmed, but not hot. The oil rapidly works down in between the stopper and the neck, and by giving the whole thing a slight tap the stopper will come out.

WILL IT LATER COST LESS TO BUILD? Judge for yourself—here are the facts: 1st—The largest cost item in building is labor, and the price of labor shows no signs of coming down. 2nd—The next largest item is material, such as cement, shingles, plaster, hardware, etc., and the largest part of the cost in producing most of these materials, lumber particularly, is made up of labor and freight. Labor as we have said, shows no downward tendency and there is every prospect of an early increase in freight rates. The demand for building material is way ahead of the supply at present, and promises to be for some time to come. In view of these facts do YOU think that it will cost less to build later on? Remember to put Sunshine windows in your old hog house and be ready for fall pigs. It is the easiest and cheapest way to save your pig crop.

Our steel cellar window chutes are burglar, weather and coal hauler, proof. They should go into every foundation and it is no great job to build one into the old wall. IF YOU SCREEN YOUR PORCH there'll be no mosquito plague to spoil your summer evenings outdoors. Why be driven inside when screens can be had for a few dollars? If you want an extra room, summer and winter, you can get both screens and sashes from the Eclipse. When cold weather comes again just change to glass. What's Your Idea, Watson! "And when I kissed her, I smelled tobacco on her lips." "You object to kissing a woman who smokes?" "No, but she doesn't smoke."
