Mrs. Roy Fear and Mrs. Geo. Chase were Manchester business callers, on

**Lenox College**

**LENOX COLLEGE LIBRARY**

Has a fine building.  
Has a finer collection of books.  
**THERE ARE THOUSANDS OF BOOKS.**  
Some are old and obsolete. Some are old and of great value. Most are useful and usable.  
**Just such as a student needs.**  
Loyal friends are giving the library an overhauling so that it may be of greater service to the coming students this next school year.

FALL QUARTER OPENS SEPTEMBER 6TH.

**Ladies! Are you troubled with sun-burn?**

Perhaps from motoring on a hot day or per-chance Willie ran away and caused you an eight block chase in a scorching sun. Whatever the cause we have just the proper sort of cold creams which impart that soothing, cooling effect to a burning skin.

**INVESTIGATE**

Our complete line of toilet accessories.

**Amsden Pharmacy**

**Tuesday.**

**Butter Queen of Fats.**  
Butter is better than many other common fats, particularly for little children. It has no higher fuel value than the other fats, but it contains an abundance of a substance necessary for growth.

**Thresh at the Right Time**

**BY BELTING** your tractor to a **New Racine** you can thresh your grain when you are ready to thresh, not when the custom thresherman is ready. Your own help and perhaps that of a neighbor is all you need to operate the separator to full capacity.

The New Racine separates every bit of grain from the straw and delivers it to you clean and whole. It saves the grain that otherwise might spoil or be shattered out in the shock while waiting for the custom thresher. It will save the wheat that might be blown into the straw by overcrowding of a big custom machine. It will also save the constantly increasing threshing fees, and the work, worry and expense of feeding big threshing crews.

Why not be independent, especially when it pays so well? Come in and talk the matter over with us. **New Racine threshers**, which are made in two sizes—**20 x 22** and **24 x 40**—have a long record of satisfactory service behind them.

**W. D. HOYT CO.**

**INTERNATIONAL HARVESTER FARM MACHINES SALES SERVICE**

**Plan for Conservation.**  
Conservation of our natural resources will be necessary if we are to leave this country capable of supporting our rapidly increasing population. Our children should be left with a fair chance in life. If we waste our natural resources it will not be long until the struggle for life will be keen. Let us use our resources wisely and well.—Exchange.

**Next the Heart.**  
The left hand in France is universally regarded as that "of the heart" and is reserved for relatives and intimate friends and those toward whom the giver is unusually well disposed.

**RESOLUTIONS OF RESPECT.**  
Whereas, Our Heavenly Father has called home our sister, Maria Hesser, who passed away July 15th, 1920, and Whereas, she was a past president and a loyal member of the W. R. C., Therefore, be it Resolved, That it is a just tribute to the memory of the departed to say that in deeply regretting her removal from our midst, we sincerely mourn for one who was worthy of our kindest regards.

Resolved, That we tender our sympathy to the husband and friends in their great sorrow.

Resolved, That these resolutions be placed on the minutes of our order; that they be published in the city papers, and a copy sent to the family of the deceased.

MARY J. PORTER,  
SUSAN M. MOORE,  
MARY E. GIVEN,  
Committee.

**RESOLUTIONS OF RESPECT.**  
Whereas, It has pleased our Heavenly Father to call to her Heavenly home our dear sister and co-worker, Anna Glissendorf, no words of ours can express our sadness, for she was a faithful and loyal worker, and a past president of the W. R. C. No duty was too great, no task too hard for her to perform. Her heart and soul were in the work. A beautiful Christian life has gone out, but that which is our loss is Heaven's gain. And we, the Ladies of the Relief Corps, tender to the children and the sister, our heartfelt sympathy in their hour of sad bereavement. We can only send our kindly remembrance and bow our heads with those who mourn, and bid them remember.

There is never a day so dreary,  
But God can make it bright;  
And unto the Soul that trust Him  
He giveth songs in the night.  
There is never a path so hidden,  
But God will lead the way.  
If we seek for the Spirit's Guidance,  
And patiently wait and pray.

ANNA FISHER,  
MARY T. CROSBY,  
EFFIE PINCH,  
Committee.

**IOWA'S BIG ASSET IS BOYS AND GIRLS**

Iowa Child Welfare Research Station Aims to Improve Standard of Children.

Iowa's greatest asset is a million boys and girls who are the children of Iowa parents, according to the Iowa Child Welfare Research Station of the University of Iowa. The theory that the state's greatest wealth is all wrong, say the scientists and experts who direct the research work at the station.

Constant endeavor is made to improve the state's children. An anthropometric experiment now in progress is one that will give the physical measurements and physical status from birth to eighteen years, inclusive, of 200 boys and 200 girls from characteristic sections of Iowa. These statistics are being gathered in an effort to establish the normal or average dimensions and weight of Iowa children at a given age. Since the station works with normal or very nearly normal children, the task of discovering the characteristics of average children has been of first importance.

The problem of what or how much to feed the baby is one that the station's department of nutrition will gladly answer for anyone. Experiments are constantly being made in an effort to improve diet contents and schedules already approved.

The Iowa station is the first establishment in this country or abroad for scientific research within the field of the conservation and development of so-called "normal children." In the past attention has been turned to the discarded group of defectives, delinquents, degenerates, derelicts, and social misfits," says Dr. Bird T. Baldwin, director of the work, "but now a constructive program is being developed which will eliminate these defective means and insure the continuous improvement of every normal child."

The booklet, "Administration of the Iowa Child Welfare Research Station," is now ready for distribution.

**PROSPECTING FOR OIL AT MONTICELLO**

Leases are being signed up in the vicinity of Monticello, and placed in the hands of an experienced oil field man, preparatory to making deep well test for oil in that vicinity. It is said that there are indications on the surface favorable to oil and it is because of this fact that Kansas oil men are interested regarding the prospects of locating oil. The Monticello Times of last week says: "R. J. Guthrie of Sand Spring, was in the city recently, and while here he asked what induced the residents of Sand Spring to drill for oil?" The drilling was done more than forty years ago. Mr. Guthrie said: "They were induced to drill because of surface indications, and a belief that there is oil in this section of Iowa. The equipment for drilling was not sufficient to meet the requirements. One mule furnished the power to operate the drill, and when the well was drilled 350 feet, the drill stuck in the rock and it required weeks to get it out. The well was drilled on the street in front of one of the stores, and for many years it was the town well. There are surface indications of oil in our section now, as there were then."

**C. L. U.**  
The Upper Iowa University was founded in 1857. For more than sixty years it has been making a priceless contribution to the educational, patriotic, and religious development of
