St. John's Day.

Midsummer day is that designated to celebrate the memory of the Baptist, of whom it was said, "Behold, I send my messenger before thy face." It was wont in the olden time to recall the man from the wilderness by going out on midsummer eve and gathering houghs with which to decorate their homes. Bonfires were lighted and there was much merriment. Some of the superstitions regarding this eve of St. John still prevail, and there are some who say that it is then all of our souls leave our bodies and wander to that place where we will finally meet our death.

Historic Building.

In the older part of the city of Kingston, Canada, is a small frame house which was occupied by Governor Simcoe in 1792-93 immediately after his arrival in Canada. Here he composed the proclamation calling the first parliament of Upper Canada (now Ontario) to meet in the summer at Newark (now Niagara). In that parliament he not only laid the groundwork of government but planned liberally for religious and educational work. The small "government house" has been modernized a bit by a cheap porch, but is still primitive as well as eloquent in historic interest.—Christian Science Monitor.

Tammany, "The Affable."

Tammany was the name of an Indian sachem in the days of William Penn, an exchange states. He was great chief of the Delaware Indians and sold land to Penn. In the aboriginal tongue his name means "the affable," and tradition credits him with being a lover of peace; further than this the legends and adventures attached to his name are the inventions of members of different American societies which held May day festivals in Maryland and Pennsylvania and adopting the sachem as their patron saint, commonly described themselves as "Sons of St. Tammany."

PREVENTATIVE MEDICINE

The tendency of medical science is toward preventative measures. It is easier and better to prevent than to cure. Pneumonia, one of the most dangerous diseases that medical men have to contend with, often follows a cold or attack of the grip. The cold prepares the system for the reception and development of the pneumonia germ. The longer the cold hangs on, the greater the danger. Take Chamberlain's Cough Remedy as soon as the first indication of a cold appears so as to get rid of it with the least possible delay. It is folly to risk an attack of pneumonia when this remedy may be obtained for a trifle.—For sale by A. C. Philipp.

Vegetable Oils in China. The Chinese, lacking an adequate supply of animal fats, turn to vegetable oils, which are their butter and lard. In their country, as well as in India, the "cake," or residue from the oil presses, is turned to valuable account as cattle feed. The oil enters into the manufacture of perfumes and drugs, and in Syria it is used in the preparation of a sweetmeat.
