THE INTERIOR JOURNAL.

VOLUME VIII--NUMBER 34.

STANFORD, KY., FRIDAY, OCTOBER 24, 1879.

WHOLE NUMBER 398.

RATES OF ADVERTISING. One square, one insertion, 10 cents. A liberal deduction for each subsequent insertion.

OUR JOB OFFICE IS COMPLETE. In every particular and our Job Presses are acknowledged the best in the State.

LOUISVILLE, KY.

The Crematorium Cremated.

The following is a description of the Cremation of Dr. LeMoine, the great advocate of Cremation, at his former home in Pennsylvania: At 10.28, the body wrapped in a sheet was placed on an iron rack, and wheeled from the reception room to the doors of the furnace.

The body was taken from the catafalque and placed in the new crib or cage hastily, the hypothetical temperature being then 2,000 degrees. At 10.50 the vapor had cleared away and disclosed the human outlines against the red and brilliant background of the retort.

The crib was pushed forward to the end of the retort and the form of the body was found still to remain, but incineration was complete. Ten minutes later and the ashes fell in a confused mass at the bottom of the retort.

The actual time occupied in cremating the body, however, was but little over four hours. The retort is now cooling, and the ashes will probably be turned to-morrow evening. They will be inclosed in a marble urn and preserved in a family mausoleum in Washington Cemetery.

The Enchanted Pin.

Some tricks in "Parlor Magic" printed in juvenile publications are very amusing, as well as very simple. "The Enchanted Pin," for instance, "The Enchanted Pin," for instance, "The Enchanted Pin," for instance.

WHY COUNTRY PEOPLE ATTRACT ATTENTION.

Country people always wonder why they are noticed on a visit to the city, and so many jokes cracked at their expense, yet the reason is as simple and easy as their manners are stiff and formal.

NEW CURE FOR NEURALGIA.

The Academie de Medecine authenticates the fact of a new cure for neuralgia. This is the administration of ammoniacal sulphate of copper. In one case a man aged thirty-two was suffering from neuralgia of the fifth nerve.

Home and Mother.

Home, where father and mother, sisters and brothers, have a unity of interests, sympathy and affection, becomes in mature life the most sacred picture.

In after years when the destroying angel has crossed the threshold of the dearest spot on earth, and its familiar voices are silenced in death; when the hand of changing time has torn down the woodshakes that climb all above its portals and its windows, and when its paths echo only to the tread of the stranger's feet, how often does remembrance lead us back to its sacred precincts, and make us realize that the home of childhood is the brightest scene—the fairest oasis of the desert of life.

The crib was pushed forward to the end of the retort and the form of the body was found still to remain, but incineration was complete. Ten minutes later and the ashes fell in a confused mass at the bottom of the retort.

Whipping and the Whooping-Cough.

A new use of the rod, one which Solomon never dreamed of, is said to be common in Austria. Some old-fashioned people complain that the rod has fallen into neglect, and that the reins of authority have passed from the parents to the children.

Physicians pronounce this uncomfortable disease to be chiefly of nervous origin and under the control of the will.

They maintain, therefore, that punishment is the best medicine, for a good whipping rouses the child to a vigorous exercise of will, which suppresses the cough. It is certainly a curious theory, but held with tenacity by the Austrian physicians. They may be popular among children in their own country, but they would be in danger of falling victims to mob law here.

An Incident of the Times.

From every party of our country prosperity seems to abound in almost every department of trade, and the demand for all kinds of machinery and implements, and the steam appliances for driving and making them, seems to be greater than for a long time past.

A SUCCESSFUL YEAR.

The year 1879 will pass into American history as a year of wonderful agricultural prosperity. The cotton crop is larger by half a million bales than ever before; the tobacco crop 12,000,000 lbs. greater; and the sugar crop exceeds by some 200,000 hogsheads all previous yields.

The water that flows from a Spring does not freeze in the coldest Winter.

And those sentiments of true friendship which flow from the heart can not be frozen by adversity. An Illinois woman has named her baby "Pinarof." Probably because she never "—What? Well, comparatively seldom.

How to Raise Large Corn.

I have made a great many experiments with corn within the last fifteen years. I had fourteen different kinds, and this year I got some of the largest ears I ever raised. I always select my seed corn in the Fall, at husking time, and in the Spring I sort them over again.

QUICK FORGING.

Recently the steamer St. John, of the People's Line to Albany, broke her shaft. A new shaft, 27 feet six inches in length, 20 inches average diameter, and weighing 40,000 pounds, was made from the bloom, turned, and finished in six days.

To the advice "Drink whisky only in the months that have 'k' in their names."

The Ottawa Republican says nine-tenths of the fellows would spell this month "October." And of course your Know-nothing can be counted too. Next. [Temperance Journal.

The ex-Empress Eugenie is worth more than \$5,000,000 and yet earth holds no more unhappy woman than she.

What's money to her, when she remembers her dead son, the misery of lonely widowhood and the loss of her throne. A Utica barber announces himself as "tumorial artist, physio-nomical hair dresser, facial operator, cranium manipulator and capillary sleigher."

WHY NOT ALSO A "CONVERSATIONAL COLICUS."

WHY NOT ALSO A "CONVERSATIONAL COLICUS." A young gentleman happening to sit at church in a pew adjoining one which a young lady occupied for whom he conceived a sudden and violent passion, was desirous of entering into a courtship on the spot; and the exigency of the case suggested the following plan: He politely handed his fair neighbor a Bible open with a pin stuck in the following text—second epistle of John, verse fifth: "And now I beseech thee, lady, not as though I wrote a new commandment unto thee, but that which we had from the beginning, that we love one another."

Running a Locomotive without Fire, Water or Steam.

While working as an engineer on one of the railways Mr. A. L. Holley made a wager with some of his fellows that he could run a locomotive a mile without fire, water or steam, the locomotive to be taken empty and cold from the shop, and towed by another engine to a point at some distance of track favored the experiment. Young Holley rode in solitary state on his cold locomotive to the scene of trial, and unassisted by his escort, so arranged matters that during the trip the motion of the drivers and pistons stored the boilers with compressed air. This gave him, by the time the destined point was reached, an accumulation of power by means of which he ran his mile and won his wager.

STOLEN HORSES!

On Saturday, the 14th inst., two men came to my house, in Carey Co., about 2 miles West of Hustonville, and taking a brown horse, 12 hands high, 5 years old, right hind leg and left fore leg slightly white inside, a small star in the forehead, mane as a natural mane. The other was a dark-bay mare, 10 1/2 hands high, 4 years old, no stars, no spots. A match between them was made in front and very good condition. The man disappeared mysteriously on Sunday, leaving the mare. If stolen, so I presume they were, this is to notify the owner that he can obtain them by calling on me, proving property and paying all reasonable charges. Oct. 15, 1879. ELAM SIMPSON, Hustonville, Ky.

WHAT PAYS BEST AFTER HARVEST

In a serious consideration of its costs and profits, and how to economize by comparing your own experience with that of others in farm life. ONLY \$1.15 A YEAR! Will place you in possession of the only Newspaper that gives the actual experience and experiments of practical farmers.

THE USE OF SPECTACLES DELAYED.

Dr. Chestnut recommends, in the Louisville Medical News, the use of sulphate of cerise as a means of delaying the use of spectacles, so that they will not be required for several years, this alkaloid having the power of stimulating the ciliary muscle and thus assisting accommodation. The strength of solution recommended is one grain of the sulphate of cerise to an ounce of water. One drop of this solution is to be put in the eye at night, or when required.
