LETTER FROM LOS NIETOS.

LOS NIETOS, October 20th, 1873. EDITOR HERALD.—The people of this vicinity are all on tiptoe in anticipation of hearing the long looked for and expected sound of the whistle of the Nietos locomotive. In ten days we expect to be more closely allied to your Agency city with iron bands, as we are informed that the track from Florence, in this direction, is being laid at the rate of two miles per day. The Nietos depot, or the city of Nietos, is all the rage. Who will be first to lay a corner stone, or drive the first nail, at the site of this great city in the valley? As is characteristic with the entire order of Old Fellows to be always ready and willing to take hold and work in every enterprise that will benefit the human family, whether it be to improve and develop the barren wastes, or to relieve the wants of the distressed, and educate the orphans, Nietos Lodge, No. 197, have through their committee, selected a lot on which they intend to erect a building to be used as a hall. We hear the question asked every day by persons in the valley: "Will the business of this valley be concentrated at the Depot?" We answer that if we do as we should, for the benefit of ourselves, and for the advancement of the entire interest of Nietos valley, the business will center at the city of Nietos. If we act like men of business capacity, and minds that rise above sectional prejudices, we will all unite in working for our common interest, as one common people of Nietos valley, and strike hands at the city of Nietos, put our shoulders to the wheel as one man, and build up one business center that will be the pride of our people, and form a nucleus around which thousands will gather, for there is no place on the Pacific slope that offers superior advantages to the valley of Los Nietos, either in the fertility of its soil or the healthfulness of its climate. As our article is already too long, we will desist, but will discuss the subject more fully in the future. OBSERVER.
