

A Probability.

indications are favorable that the great illustrated Press, which Mr. JOHNSON proposes to place in the hands of a quarter of a million of people each week, will be published in Angeles in place of Santa Barbara, erefore intended. Los Angeles tainly the proper place for such a tion. If we are going to print eekly journal which shall go out to world laden with facts concerning h California, it is but reason that journal should be issued from heart of the largest and richest y of that part of the State repre- Los Angeles is that valley, as Los Angeles is the largest city uthern California, here is the for Mr. JOHNSON'S publication. The inducements offered by usness men to secure the publi- n of the mammoth weekly here ready tempting, and we should e astonished if they eventuated in ceation of the office here. If this desirable change is made it will affect the newspapers of Santa ara, as Mr. JOHNSON proposes to ne himself exclusively to the pub- ion of his great weekly.

A Result of the Grange.

hile a little learning may be a ous thing, a little intelligence is, and the more one has of it the er. A man may go on from year ear picking up information of a eral character, and yet not possess self of much that is really valuable im. Until lately, the farmer read eat deal that gave him but little lligence regarding things in which is most interested. He read his y paper, which of course showed t his party was pure and all other ties corrupt. He saw but one side e question, and as that was in ac- eance with his own views and fos- d his own prejudices, he concluded, ost people do, that it was all right, as a clear case that when his party in power, taxes were not high, it was equally clear that when e other party held the manage- t the country was going to the bad ast as possible. To educate the le in this way is the business—the mission—of party papers. The ge has wrought a decided change e character of information that es the farmer community. The tical facts of the Grange are not ibly party prejudice or preference. are facts—well authenticated—collected without regard to what cal party they condemn or sus- The farmers have long known they were loaded with taxes to money which went they knew here nor for what. The Grange king into these things from a political standpoint, and the pic- presented is not gratifying. Tho y question is examined, and tax-payer finds out that thous- of office-holders are receiving sal- a long way in excess of the ser- rendered. The Grange has found hat the party in power is always nderer of the masses; that mo- ly schemes are always intended fetimize the people; that the hword of party is a snare and a ion; that party platforms are e to be broken, and that party es only tell the truth when it will ee their own interests or damage of their opponents. Whatever ay be said of it, the Grange is uly a disseminator of a class of le information which it is im- ant the farmer should possess. is is an extravagant age. People ay a thousand or so dollars and l several months to travel around world. The absurdity of this is ent to every one who knows that nding still twenty-four hours the will carry them the same dis- for nothing.

The capital stock of the company has been fixed at \$250,000, \$170,000 of which is already subscribed by THOS. A. GAREY, H. J. CROW, O. W. CHILDS, J. F. WARD, JOHN G. DOWNEY, ISAAC S. SMITH, MILTON S. THOMAS, H. S. SHUSTER, L. M. HOLT and JOHN S. THOMPSON. At a meeting of stockholders held yesterday to incorporate, THOS. A. GAREY was elected temporary President, and L. M. HOLT was elected temporary Secretary. A meeting of the stockholders will be held on the 19th instant for the purpose of adopting by-laws. The object of the company is to engage extensively in the nursery business in the vicinity of this city. Already a million orange and one hundred thousand lime trees are being sprouted for this company. It is reported that those stockholders who are now engaged in the nursery business will retire as soon as they can dispose of their trees now on hand (although it will require three years for them to work out of the business), and that they will devote their business energy, experience and money to working up, through this company, the largest nursery fruit business on the Pacific Coast.

We understand work will soon be commenced on the Main-street railroad. The arrangements are completed for laying the track from the Plaza to Mr. Waldron's place, corner of Washington and Main streets—a distance of nearly two and a half miles. The franchise of this road extends, we believe, from the Plaza to the race-track. The Main-street road will run through a portion of the city that will make it valuable property. The street is lined on either side with garden homes.

SAN DOMINGO inflated her currency and now one dollar in silver will buy four hundred dollars of her paper money. If the schemes of our inflationists had succeeded we should soon have money as cheap and plenty as San Domingo.
