The Picnic.

If to boil and to bake and to butter, To get, to slice, and to pack, To get off before you are ready, And before you are ready come back; If taking a seat in a pie-dish, And losing your meat in the grass, And having bugs drop in the pudding, And seals take a bath in your glass; If toads holding hop on your sapwood, And beetles inspecting your bread, While brambles and thorns catch your feet, And worms pelt down on your head; If scattering in every direction, To seek from the foliage a cover, And find you have just been outstripped By some Sary Jane and her lover; If gathering up all the fragments Of such an Arcadian feast, You can't tell whether 'twas most like Entertainment for man or for beast; If that kind of thing is enjoyment, In longer or in shorter measure, And you are simple enough to believe so, Why—then help yourself to the pleasure.

FERTILIZERS.

FOR WHEAT. MAPES NITROGENIZED SUPER-PHOSPHATE, composed of only Bones and Bird Guano, dissolved in sulphuric acid, and fermented with Fish Guano (containing 12 percent of Ammonia), all being reduced by fermentation and sulphuric acid to a Fine Powder. Contains no insoluble mineral Phosphates, but is all available to the crop. This soluble fertilizer shows by analysis the presence of 18 per cent. Soluble Phosphates, 29 per cent. Bone Phosphates, and animal matter yielding 4 per cent. of Ammonia—being identical in composition, solubility, and availability to crops with the best mixture that can be made of one part Peruvian and three parts Flour of Bone, treated with sulphuric acid. The saving to the farmer in the cost of Mapes' Super-Phosphate over that of the mixture, is \$15 per ton. The Mapes' Super-Phosphate of Lima Company, being engaged in the manufacture of fish oil, are enabled not only to obtain large supplies of animal Ammoniacal material from the fish at low cost, but also to avail themselves of the economical process of fermentation, by the combination of the fresh animal matter with the Bones and Bird Guano, previously treated with acid, in reducing their fertilizer to soluble form, and are thereby able to furnish a quickly-acting and more permanent effects, than Peruvian Guano. Like Barn-Yard Manure, when used on seeded down land, produces after the grain luxuriant crops of grass. In every instance reported, Mapes' Super-Phosphate has been used early, vigorously grown, and more permanent effects, than Peruvian Guano. Like Barn-Yard Manure, when used on seeded down land, produces after the grain luxuriant crops of grass. Send for descriptive pamphlet on culture of Wheat and its requirements, analysis of Mapes' Super-Phosphate by Prof. Gilman, of Richmond, S. Dana Hayes, of Boston, and other prominent chemists.
