

ALEXANDRIA, VIRGINIA. TUESDAY, JUNE 22.

NEWS OF THE DAY

To show the very age and body of the Times.

There was a shooting affair in Baltimore yesterday, which occasioned considerable excitement. A young man named Walter S. Crooks married a wife against the consent of her parents, and subsequently procured a divorce from her in an Indiana Court, while she was at her home and had no notice of the proceedings. He returned to the city a short time ago and attempted to renew his intimacy with his wife, but met with no favor. The shooting yesterday morning was done by the lady's brother, whose purpose seems to have been to frighten Crooks out of the city. Three shots were fired, but a colored man who happened to be crossing an alley through which Crooks was retreating, was the only sufferer. He received a flesh wound in the jaw. The avenging brother was arrested and held to bail in the sum of \$500.

A terrific hail, rain and thunder storm visited Kansas city on Sunday night, lasting over four hours. Houses were unroofed, several struck by lightning, cellars flooded and the streets torn up. Lumine damage is reported in the city and surrounding country, and several bridges are reported washed away on the railroads. The storm extended over an area of fifty miles. The soldiers' monument at Beverley, N. J., will be unveiled on Monday with military and civic display. The monument was purchased by the State for \$10,000. It is sixty-five feet high, surmounted by the figure of a soldier. The graduating exercises at the United States Naval Academy took place yesterday. Secretary Robeson was present. Twenty nine midshipmen received diplomas and fifteen engineers. The Collector of Customs at Charleston has notified the Treasury Department of the arrival of the Uruguayan political prisoners at that port, and asks whether they shall be permitted to land. Brad Yarbrough, a justice of the peace, residing near Covington, Tenn., was killed on Saturday by Wm. Kinney, his brother-in-law, in a quarrel growing out of an old family feud. Kinney surrendered himself. Yesterday Justice Hagerty, in Baltimore, fined two men \$20 and costs each for gambling on Sunday, and a lottery policy dealer was committed to jail to await the action of the Grand Jury. The Carlisle Committee in London announce that they are in receipt of intelligence that the Carlists have entered Castile in strong force, and that they have been well received everywhere. Grave apprehensions exist that unless prompt measures are taken to suppress the raids by Mexican cattle thieves into Texas, complications may arise between the United States and Mexico. Henry Logan, colored, who appeared as a witness in a felony case against four young men in Shelby county, Ky., last week, was shot and killed near Shelbyville, Friday evening. The assassins escaped. The French Assembly yesterday appropriated the sum of 120,000 francs to promote the representation of France at the Centennial at Philadelphia. M. W. Mason, inventor of the locomotive headlight and other useful railway appliances, died at Rochester, N. Y., Sunday night, aged 70 years. Cardinal McCloskey passed through Baltimore yesterday en route for the commencement at Mount St. Mary's College, near Emmitsburg, Md. Jas. Caine, aged 18, was shot and instantly killed at Hunter's Point, Long Island, Sunday afternoon; by Patrick McGrath, aged 17, during a quarrel while gambling. In the Italian municipal elections, held yesterday, Garibaldi heads the list of successful candidates. The Toronto, Canada, bolt and nut factory was burned Saturday night; loss \$50,000.

The French Assembly yesterday appropriated the sum of 120,000 francs to promote the representation of France at the Centennial at Philadelphia. M. W. Mason, inventor of the locomotive headlight and other useful railway appliances, died at Rochester, N. Y., Sunday night, aged 70 years. Cardinal McCloskey passed through Baltimore yesterday en route for the commencement at Mount St. Mary's College, near Emmitsburg, Md. Jas. Caine, aged 18, was shot and instantly killed at Hunter's Point, Long Island, Sunday afternoon; by Patrick McGrath, aged 17, during a quarrel while gambling. In the Italian municipal elections, held yesterday, Garibaldi heads the list of successful candidates. The Toronto, Canada, bolt and nut factory was burned Saturday night; loss \$50,000.

The Toronto, Canada, bolt and nut factory was burned Saturday night; loss \$50,000. London Contested Election Case. [Correspondence of the Alexandria Gazette.] LEESBURG, VA., June 21, 1875. -The report of the vote ordered by Judge Thomas gives W. E. Garrett, 1,665 Garrett, 40 W. N. Wise, 1,696 Wise, 26 Majority, 59 14 or if both were counted, 73. The vote first announced gave Garrett 1,694, and Wise 1,640; thus Garrett gains on the gross vote 1; and Wise loses on the gross vote 8. How or where this occurred I cannot say, except that at Leesburg each loses two on the recount by the full name. At Huchessville Wise loses on the recount 4; at Silcott's there is no change. The others I do not state as I have only glanced at the paper. The case is yet sub curia, but I presume will be dismissed in the morning after some little skirmishing. There were some irregularities more or less gross, but the character of the judges precludes the possibility of intentional wrong. Mr. Wise is getting the office in trim, and Mr. Garrett will find as little trouble about it, as ever any inexperienced clerk did, and has ability and energy to make a good clerk in a reasonable time. ALIQUIS.

THE BRODERICK WILL CASE. -A decision was reached in the United States Supreme Court last week in the famous Broderick will case, and the event recalls the checkered career of the California Senator. He was born in Washington city, where he learned his trade of stone mason, and shortly afterwards went North. He first came into prominence as chief of the New York fire department, where he achieved great popularity. When the gold fever broke out he went to California, and was soon elected to the State Legislature. Subsequently he was elected to the United States Senate, and became an anti-slavery champion. In 1859 he was challenged by Davis S. Terry, an accomplished duelist, and was killed, his dying words being, "They have killed me for opposing the extension of slavery." During his lifetime there was none to claim kinship to him. He devised his property to personal friends, and after his death certain persons came from Australia to claim the estate, on the ground that they were his sister's children. He died in 1857, and the contest has been going on ever since. The Supreme Court sustains the will, which settles the matter.

A HORSE TURNS A BACK SOMERSAULT. -A horse in Worcester, Massachusetts, which evidently wished to obtain mention in the newspaper, cut up a singular caper exactly in front of the Gazette office the other morning. It is a handsome black horse, belonging to Tom Sloane, and attached to a light delivery, was trotting slowly along, at the time mentioned, when his hind feet slipped on the pavement and he fell backward, turning a complete back somersault and falling flat on his back, his legs sticking straight up in the air, and his head under the body of the vehicle. The whole was but the work of an instant, and how it was all accomplished was a wonder even to those who saw it done. The vehicle was not injured, and only two or three straps of the harness were broken.

Germany has written a friendly note to Belgium, thanking that Government for the last communication on the matters in dispute between the two Governments.

TRAAGEDY. -On the 7th of June, James L. Royster and John R. Dyer arrested James Thomas, of Mecklenburg county, Va., a white man, on the charge of beating his wife. He induced them to take him to the place where his wife had gone to "make up" the difficulty between them. She refused to admit him to the house, whereupon he attempted to make his escape. In an effort to knock down the officers, he drew his knife and cut the throat of Royster, inflicting a very dangerous but not mortal wound, and then attempted the life of Dyer. Royster, upon receiving the gushing blood by holding one hand to his wound, fired three shots at Thomas, one striking the head and glancing, and the other two taking effect in the lower extremities of the abdomen, causing mortal wounds. They were both removed to a neighboring house and a physician called in, and being near at hand, arrived in time to stop the blood from Royster's throat, and it is now thought that he will recover. Thomas died last Friday morning.

Commencement day at Roanoke College, Salem, Va., passed off with great eclat on the 16th. A large audience, excellent music, a great profusion of flowers, much speaking, and a more than ordinary degree of enthusiasm, made the day one of unusual interest. Diplomas were given to nineteen young men, the largest class graduated in the history of the institution. It is stated that Col. John S. Mosby has received an invitation from a committee of Boston gentlemen to deliver one of a series of addresses in Tremont Temple, in that city, and will probably accept.

Mr. George P. Goodloe, of Spotsylvania, has set out ninety thousand tobacco plants this season.

BARRATRY. -On the 29th of last April Geo. K. Goodridge, a commission merchant, of Norfolk, chartered the schooner George and Henry, Thos. W. Shreve, master, to go to Fredericksburg, Va., and load with corn, which she was to carry to New York. The grain was put aboard, the bill of lading furnished, the cargo fully insured, in a New York company, and the captain, furnished with his requisite papers, left the port and sailed for his destination. The vessel failed to arrive at the expected time, and after waiting several weeks, nothing more being heard of her whereabouts, she was given up for lost. Mr. Goodridge entered a claim against the company for the insurance money. As he was known to be honorable in all his transactions, and believing the schooner wrecked or sunk, the company was about to comply with the demand, when they thought it more prudent to delay a few days and make a more thorough search, to which proposition Mr. Goodridge assented. The matter was turned over to the agent for the New York Board of Underwriters and Lloyd's, with instructions to use all possible dispatch and means in discovering the whereabouts of the vessel or some of the crew.

This gentleman called to his aid detectives, who began work immediately, and succeeded in finding that Captain Shreve, instead of taking his cargo to New York, as the bill of lading called for, ran his vessel into the port at Baltimore, and there sold the grain to a commission merchant, for \$2,300. After unloading and obtaining the money he cleared; took his vessel to Hunting creek, Accomac county, Va., discharged the crew, and abandoned her for a time. Captain Shreve, after quitting the vessel came to Washington and visiting a well-known house of ill-repute, became fascinated with one of the inmates, bought her pretty and valuable presents, and finally they left the city together. They started West with the detectives close upon and pushing them hard. A halt was made at Wheeling, then to Cincinnati, St. Louis and back to Chicago, but at each city the officers made it hot and unpleasant by their close proximity, and it was decided to give the East a trial, and they came to Philadelphia, where they arrived last Wednesday, and stopped at a respectable boarding-house, where they were living as man and wife. The detectives watched faithfully yesterday, and in the afternoon were rewarded by seeing Captain Shreve come to the door. He was immediately arrested, and the woman also taken into custody. They were taken to the detective office, where \$800 in money and a valuable watch were found on the man's person. He acknowledged having most of the funds in Virginia, which he wrote for last night and will be recovered.

The officers brought him to Baltimore last night, where he is already indicted in the U. S. court. The woman accompanied them, but as there was no charge against her she was permitted to go, and returned to Washington. The captain has been sailing between this and other ports for several years past, and is well known to nearly all the river men.

GRASSHOPPERS A BLESSING. -The Worcester Spy says: Some of the Missouri people having tried the grasshopper as an article of diet, that he has great merit hitherto unappreciated in this country, though it is understood that John the Baptist availed himself of it during his sojourn in the wilderness, and uncivilized people in various parts of the world have also found it better to make an invasion of locusts a season than a famine. The Missouri people, wishing to test the quality of the dietetic capabilities of these insects, certain ladies and gentlemen of Warrensburg set down one day last week to a locust dinner. The first course, grasshopper soup, was tasted with some misgivings, which were soon dispelled, however, by a party resorting to a luxury to be compared with a faithful chicken soup with a delicate mushroom flavor. The next course was batter cakes, through which locusts had been well mixed. Prejudices had already been conquered, and these delicacies were dispassionately judged, and without dissent approved. Then a dish of baked grasshoppers, plain, was presented, and pronounced excellent. The crowning glory of the feast was a dessert "a la John the Baptist," baked locust and honey. It was the unanimous verdict of the company that the great benefactor had no reason to complain of his quality of diet. The guests at this odd banquet were not only satisfied but enthusiastic. We do not hear that they passed resolutions in honor of John the Baptist, whose example had taught them to turn a terror and a pest into a blessing, but they did declare that henceforth they should swallow grasshoppers as a luxury to be compared with oysters, truffles, mushrooms, &c. They believe that in future the advent of the locusts will be a cause of thanksgiving instead of mourning, a beneficent gift of nature. As evidence of the readiness of the Warrensburg people to accept the culinary and dietetic innovations, it is stated that a baker of that town had advertised for 500 bushels of grasshoppers, to be delivered immediately at the present market price, \$5 a bushel. The first invoice of this season's crop of grasshoppers has already been sent to St. Louis, and an active demand is expected from that city. At present, while the locusts are in the wilderness condition, and can be caught by the hand, it is estimated that each acre will yield not less than fifteen bushels, which is considerably more than the average yield of wheat, while the nutritive value of the insects is not less than that of wheat, bushel for bushel. When this crop, which needs no plowing or cultivation, is harvested, the land is available for other uses, and may be made to give an additional profit.

POISONING THE POTATO BUG. -A letter from Professor McMurtre, of the national department of agriculture at Washington, on the subject of the potato beetle and the remedy is published. This gentleman is reputed to be the most thoroughly and minutely informed scientific man in the country on this subject. In particular, he has made constant experiments with a view to ascertain the effect of mineral poisons, and especially those containing arsenic, on the health of plants. This is a point of great interest, inasmuch as it has been found that the potato bug can be exterminated by poison, and Paris green (a mixture of arsenic and acetate of copper) is the cheapest and most easily applied poison adapted to this use. Fears, however, have been raised that the poison which kills the grubs of the beetle may enter into the composition of the plant, making the remedy worse than the evil. Upon this point Professor McMurtre's experiments tend to dissipate all fears. In the plants that were killed, in the plants that were stunted, and in the plants which grew to full perfection, with the varying amounts of Paris green mingled with the soil of his pots, the most rigorous chemical analysis could detect no trace of arsenic in the composition of the plant itself. As to the effect on the growth of crops he has found that the intermixture of this poison with the soil in large quantities destroys vegetable growth, but that in the small quantities requisite for destroying insects it does not interfere with or impede it at all.

THE ENCHANTED ISLAND. [Some of the newspapers have published a piece of poetry under the title "The Magical Isle in the River of Time," by B. F. Taylor. The original appeared years before the war, without any claim of authorship, and is far more beautiful than Mr. Taylor's imitation. We are not certain that the version given is absolutely correct, but at least it is much superior to the imitation.] A wonderful stream is the river Time, As it runs through the realms of tears, With a faultless rhyme and a musical chime, With a broader sweep and a surge sublime, And blends with the ocean of years. How the winters are drifting like flakes of snow, And the summers like buds between, And the year in the sheaf, so they come and go On the river's heart with its ebb and flow, As it glides in the shadow and sheen. There's a magical isle in the river Time, Where the sweetest of airs are playing; There's a clime less dry and a tropical climate, And the sun as soft as a vesper's chime, And the June with the roses are straying, And the name of this isle is "Long Ago," And there he bury our treasures there: There are brows of beauty and bosoms of snow; There are heaps of dust, but we loved them so; There are trinkets and tresses of hair. There are fragments of songs that nobody sings, And a part of an infant's prayer; There's a lute unswept, and a harp without strings; There are broken vows and pieces of rings, And the garments that she used to wear. There are hands that are waved when the fairy shore And by the mirage is lifted in air; And we sometimes hear, through the turbulent Sweet voices we heard in the days gone before, When the wind down the river is fair. Oh! remembered for aye be the blessed isle, All the day of life until night - When the evening comes with its beautiful smile, And our eyes are closing to slumber awhile, May that island of souls be in sight.

PROFITS OF SHEEP CULTURE. -Mr. James L. Stringfellow, of Culpeper, has sold this season 1,503 pounds of wool (the larger portion of it brook washed) from 270 sheep - all breeding ewes and last year's lambs except twelve. A small flock of select breeding ewes, with a few bucks, made an average of 12 lbs. per fleece, one buck giving a fleece weighing 18 1/2 lbs. This crop of wool was sold in Mr. S.'s barn, without risk or delay of payment, for a sum of money equal to an interest on \$10,000 at six per cent. for one year, and grown upon a flock of sheep that gathers a subsistence principally, winter and summer, from a farm below average of poverty, containing as their range about 450 acres. The sheep are Merinoes, of the best Vermont breeds.

EBENEZER CAULFIELD, whose death occurred in New York on Saturday, was the head of one of the oldest business houses in New York. He was born in Birmingham, Eng., in 1791, came to this country at the age of 15, and immediately went into the crockery trade with his father in Pearl street. He was the oldest representative of the crockery jobbing business in the United States. The Pope yesterday, in response to a deputation who called on him to offer their congratulations on the anniversary of his coronation, said in the course of his address, that the rumors of a reconciliation between the Holy See and the Italian Government were not even worthy of mention.

MARINE ACCIDENT. -The schooner Jesse Leetch, from Bridgeport, Connecticut, on her way to Georgetown to load with coal, yesterday morning, collided with the draw of the Long Bridge and demolished the telegraph house on the same. The vessel was not damaged. The Canadian Rubber Company at Montreal, employing four hundred females and two hundred males, only runs half time now. The Grand Trunk car construction shops, at the same place, are closed, throwing several hundred men out of employment.

COMMUNICATED. Please publish the following communication from the Southern Churchman, showing some of the fruits of Mr. Howard's work in other places - in Roanoke county, which will be interesting, doubtless, to many of our citizens: "Bishop Johns promised our pastor, Rev. E. H. Ingle, at the Council, that he would make his parish a special visit on the 6th and 7th of June. At St. John's, Big Lick, ten were confirmed on the 6th instant - two of the class were absent. At St. Paul's, Salem, seventeen were confirmed - three of the class were absent. A gray haired sire remarked that the sermon by the Bishop, and the whole service was the most solemn and impressive he had ever witnessed. It was a day long to be remembered in the history of St. Paul's chapel in Salem. A very large number of those confirmed at the Lick and in Salem, were the fruits of the revival conducted by Rev. Mr. Howard, an account of which you published at the time, more particularly the revival held at Salem. ROANOKE."

SUMMER BOARDING. NORTH HILL, CLARKE COUNTY, VIRGINIA. I will entertain boarders by the week or month. My residence is commodious, high and healthy, and overlooks the Shenandoah river, where bathing, boating and fishing can be enjoyed. The water is excellent, both hard and soft; also filtered esters and sulphur spring of the place. The stage passes the door twice a day in connection with Winchester, Alexandria, Washington city, Baltimore, &c., via W. & O. R. R. Only six miles to Round Hill depot. One mile to the door, and churches of every denomination, and physician at Berryville 5 and Snickersville 3 miles off. The scenery of the Blue Ridge, the river and landscape on every side, is very beautiful, and the house has long porches on three sides, and extensive lawn all around. There is abundant and convenient available. References given and not required. Address me at Castleman's Ferry, Clarke county, Va. je 1-eodw C. M. CAMPBELL, je 3-1m
