### MEDICAL.

## LIVER

This important organ weighs but about three pounds, and the blood in a living person (about three pints) passes through it at least once every half hour, to have the bile and other impurities strained or filtered from it. Bile is the natural purgative of the bowels, and if the liver becomes torpid it is not separated from the blood, but carried through the veins to all parts of the system, and in trying to escape through the pores of the skin, causes it to turn yellow or a dirty brown color. The stomach becomes diseased, Headache, Biliousness, Jaundice, Chills, Malarial Fevers, Piles, Sickness and Sour Stomach, and general debility follow. BELL'S LIVERINE, the great vegetable discovery for torpidity, causes the liver to throw off from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown, dirty looking skin, will astonish all who try it—being the best remedy to disappear from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown, dirty looking skin, will astonish all who try it—being the best remedy to disappear from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown, dirty looking skin, will astonish all who try it—being the best remedy to disappear from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile;
