Hormel Packing House Notes.

Improvements are constantly being made in all departments and in the near future the Hormel packing house will be one of the best and most complete in the country. Among the improvements for the coming summer are a new building containing hog chill rooms, cutting and packing rooms and dry salt cellars and costing \$50,000 to \$75,000. Also a new tank house 48 by 50 ft three stories and basement, enlarging the stock yards and railroad yards enabling them to handle twice as much live stock and cars as at present.

E. B. Smith who has charge of the packing house farm is making arrangements to put in 100 acres of corn.

Improvements recently made in the hog killing department make it one of the best and most up to date in the country.

The cold backward spring can not be wondered at when it is taken into consideration that the 100 ton ice machine is now in commission.

Market Letter.

For several weeks there has been no change in market condition, so there was really nothing to write about, but last week there came a surprising advance in butter and potatoes much to the delight of those having them to sell and to the disgust of the consumer.

Butter—Creamery advanced 3 cents last week and good table dairy is scarce and I will pay this week 30 cents pound in goods 25 cents cash.

Eggs—Have held up wonderfully. The storage houses are getting filled up and unless the supply lessens, the price will doubtless be lower, but I make no change for this week. Will pay 15 cents in goods 12 cents cash.

Potatoes—To the surprise of all dealers, last week registered an advance in potatoes all along the line. The cold weather in the south put back the new crop. The busy seeding time stopped supplies coming in from the country, the continued scarcity of cars prevents the heavy shipments from the special potato districts and a continued demand from California takes train loads of Western potatoes. The future is uncertain but for this week I will pay 35c in trade and 30c cash for well sorted white stock, no use for small ones or Triumphs which no one seems to want.

Good sound cabbage will sell all right and so will good clean white honey. MORRIS, The Grocer.
