## THE BETTER THINGS.

Doctor Hadley's address to the Yale graduating class contained this remark: Many a man of fifty whom the world counts successful is in his heart soured and disappointed—unnecessarily soured and disappointed—because at the age of thirty he shuts his eyes to the other kinds of success which life has to offer besides professional distinction. This is the same as saying there is no such thing as worldly success if a man is intent on that alone, says Ohio State Journal. A man who devotes all thought and energy to professional success, or to the gaining of wealth, simply sacrifices himself. Whoever tries to gain the world will lose himself, is Bible doctrine, and it is experience, too. It is evident in all selfish lives. To the extent that one makes others happy he is happy himself, and to the extent that he makes others miserable he is miserable himself. Many people do not look at the latter part of the proposition, but it is true as gospel. Every injury, unkindness, oppression, done to another reacts upon the doer. This is axiomatic. We cannot cheat a man but what we cheat ourselves.

Kasimir do Proszynski, who has been called "the Polish Edison," gave the first demonstration of his new cinematograph camera recently at the meeting of the Royal Photographic society. The films used are not in a narrow strip, but are on a broad sheet, and the pictures are impressed upon it 16 to a line, backward and forward, much as a sheet of typewritten matter. M. Proszynski said that about a foot of this film was equal to 100 feet of ordinary film, and that whereas the cost of 100 feet of ordinary film, lasting for little more than one minute on projection, might be about \$55, the cost of a sheet of broad film bearing the same number of pictures would be only 16 cents.

An "airbus" is the ugly name given a gigantic biplane invented by Igor Sikorsky, a Russian aeronaut. But this "airbus" justifies its title by having carried as many as 16 passengers on a short flight, and half that number for a flight lasting two hours. It has a wing spread of 114 feet, and body and tail are 60 feet long. Four engines, each of 100 horse power, supply the drive, and a speed of 66 miles an hour has been made. The Russian government has ordered four biplanes of similar construction. It now has more than 300 aeroplanes for military use, and it is planning to increase the number to 1,000 within two years.

Dr. Ruthenburg, a Berlin specialist, has informed the Berlin Medical society that he has devised a successful method of photographing the liver and spleen by means of the Roentgen rays. He accomplished it by so-called contrast pictures, which bring the organs named into clear relief. They enable a comparison of healthy with disordered manifestations, and detect truthfully the presence of growth, configuration and functional abnormalities. It is believed that the new method will be especially valuable for the diagnosis of abdominal diseases.

The notion that second-hand school books are to be dreaded as spreaders of disease seems far-fetched. Carried out logically, it would necessitate the closing of the public library. It would do away with knobs and latches on the doors of buildings, for they are quite as likely as books to spread disease germs, and public telephones are still more so. Among people who think there is a strong conviction that the theory of danger from germs is overworked.

Brunettes are said to be now the favorite style in England. Perhaps for the reason that just now feminism over there is anything but a light affair.

A Texas paper observes that the man whose automobile is undergoing repairs is most likely to go to church on Sunday.

Another Rembrandt painting has been discovered. It looks as if the shade of the old master is trying to make the supply equal to the demand.

Now the man who has recovered from his vacation eyes with plying contempt the man who is in the throes of preparing for a vacation.

The department of agriculture recently announced that the cow's feed con-

cerns the color of the butter; but who ever saw any green butter?

According to a university professor, too many college students have automobiles, the inference being that they burn the wrong kind of midnight oil.

A correspondent wants to know whether plumbing is a trade or a profession.

A harassed business man wants to know how to keep a cook. You might tango with her in the evenings, sir.

## OTHER EDITORS OPINIONS.

Northfield News: Miss Anah Cole left Wednesday for Austin, where she will have charge of the confectionery department of the Fox hotel during the remainder of the summer.

Fairmont Independent: Attorneys F. G. Sasse and S. D. Catherwood of Austin and H. C. Carlson of Albert Lea were here last week arguing a Mower county case before Judge Quinn.

Brown County Journal: The doors of the Farmers and Merchants bank of New Ulm will be opened December 1st, at which time the recently organized fourth financial institution of this city will be ready for business.

Waseca Journal-Radical: Rev. and Mrs. Levi Roseland of Crookston, and the former's brother, Rev. Otto Roseland of Thief River Falls, came down in the former's car last Friday and visited at the John Larson home.

Owatonna Journal-Chronicle: E. C. Clemons, formerly superintendent of the I. & M. division, but now assistant general superintendent of the Pigeon Sound system passed through town Friday and dropped off to shake hands with the railway employes.

Lyle Tribune: A. J. Aultfather, of the Hazelwood Stock farm has one of the finest bunches of Poland China pigs that one would care to see. A. J. says he has 67 of them all told and will be in good shape this year to supply his customers with the very best.

LeRoy Independent: Sheriff Nicholson has the credit of making the first donation for the new library building fund. He had read in The Independent of the movement and while in town Saturday left \$5 with C. S. Palmer which was at once turned over to the library treasury.

Albert Lea Tribune: Mrs. J. Ryan accompanied by Margaret Bergen left Tuesday for Austin to be present at the marriage of Miss Mae Furlong, which will occur Thursday morning. Miss Furlong will be married to John Epler of Dooley Mont. They will make their home at Dooley.

Winnebago City Enterprise: Dr. P. E. Holm of Wells was arrested on the charge of operating his auto without displaying a light on either the front or rear of the car, in violation of the state automobile law. He was tried by jury, and 12 good men and true returned a verdict of "Not Guilty."

Wells Mirror: Mrs. Fred Wells and children came last week and are guests at the home of Mrs. Wells' husbands parents, Mr. and Mrs. H. A. Wells. Fred Wells who was train dispatcher at Miles City, Montana, has accepted a position as operator and ticket agent at Spencer, Ia., and will move there.

Hokah Chief: The body of Miss Myrtle Eilers, the LaCrosse young lady who was drowned July 4, 1913, near Pettibone park, was found at Coon slough opposite Brownsville, Monday. The body could not be identified, but cloth covered buttons compared with some others the girl had made at the same time and left at home.

Preston Republican: The foolish virgins who spend one-tenth of their time in learning to decorate china, would do well to remember that a young man in search of a good wife is more likely to tie to a girl who knows how to decorate her china with a good square meal, well cooked and daintily served, sagely remarks an exchange.

## Inconsistent Man.

A man doesn't care what his wife thinks of him when he refuses her money. But he will hand a strange waiter a dollar tip rather than have the strange waiter think he is cheap.

When you buy G & J "Nobby Tread" Tires you not only get the world's best, but you actually save money in the end.

G & J "Nobby Tread" Tires are now sold under their regular warranty—perfect workmanship and material—BUT any adjustment is on a basis of

5,000 Miles

## WE SELL VAN SANT FARM MORTGAGES

\$100-\$250 \$500-\$1000 and Larger

and give them watchful attention until paid in full without expense to investors. Nothing Safer, Nothing Better.

VAN SANT COMPANY SAMUEL E. VAN SANT, President Capital and Surplus \$700,000 ST. PAUL, MINN.

Glenville Progress: Mrs. Albert Brady and Miss Hattie of East Shell Rock, Mr. and Mrs. Cedric Lindsay and two little girls of Austin, Mr. and Mrs. Tom Woodard of Tracy, Minn., were guests in the E. W. Gleason home Tuesday. Mr. and Mrs. Lindsay and children remained over night and spent Wednesday with Mr. and Mrs. N. D. Gleason and family.

Watesville Advance: A young man found one-half of a ten dollar bill. That was luck. He sold it to a friend for \$1.50. That was business. That fellow sold it to another fellow for \$2. That was speculation. He sent it to the U. S. treasurer at Washington and asked for a new ten dollar certificate. That was finance and if the fellow who had the other end of the bill got to Washington first it was frenzied finance.

Albert Lea Enterprise: After resting blissfully for many years, secure in our faith in the lightning rod agent, now comes this rude awakening. A home in the vicinity of Redwood Falls which had stood for years unprotected was finally provided with lightning rods. The day after the building was equipped with rods on every corner, a bolt struck the structure squarely causing a total loss to the building and contents.

Mankato Free Press: This one is from the Janesville Argus: "It is stated that a large per cent of old line Republicans in and about Mankato will support Hammond for Governor. Fully half the voting strength of the party in the Second district will do the same thing." Some one has been filling Editor John Henry up with hot air mixed with democracy. The Republicans in Blue Earth county are going to "stand pat."

Adams Review: The examination given by the civil service commission for the postmastership at Adams was held at the federal building in Austin a week ago. E. L. Slidree, the present incumbent here, was the only one taking the exams for the position in Adams, so his reappointment will no doubt be forthcoming. Mr. Slidree has held the position for fourteen years and his reappointment will be generally satisfactory to the patrons of the office.

Hastings Gazette: The principal objection to the normal schools is that they are by far too expensive, entirely out of proportion to the benefits received by those who foot the bills, which is, of course, the taxpayers of the state. It was announced by a prominent educator at the late N. E. A. convention in St. Paul that the average service of a teacher was six years, and that is stating the case rather high. He or she could not possibly pay for his or her free education in that length of time, yet some one must stand the loss.

Candy News: The county agent may be termed the great equalizer. He not only is a purveyor of native and acquired information, but he is a gatherer of ideas. Passing about the county he is observing everything that is going on. Seeing in one end of his territory an innovation which is serving a good purpose, it will not be but a short time before the same methods may be found to exist at the other end of the county. The man who neglects to take advantage of the advice and help of the county advisor or agent is refusing to take advantage of an aid he is helping to pay for.

St. Cloud Journal Press: Mr. and Mrs. Nicholas Trautler, the highly esteemed pioneer couple of this city and Stearns county, observed their diamond wedding on Monday, July 27. They are respectively 94 and 89 years of age, are enjoying the best of health, and on the day of their anniversary, as on all other days, they cared for all the duties at their home, attended church services and took an active part in life in spite of their advanced age. On the diamond wedding day, Mr. and Mrs. Trautler, after attending the anniversary mass at the church of the Immaculate Conception, spent the day with the members of their family, all of whom were present, enjoying the celebration arranged for that day.

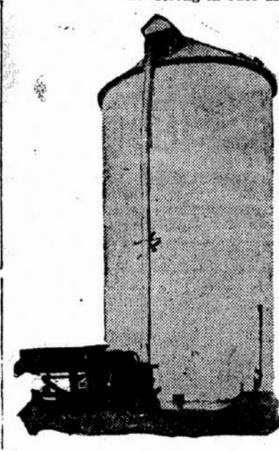

## Scientific Farming

CLOVER AND CORN SILAGE.

Results of Experiments as Feeds For Dairy Cows.

Results of experiments made by the Montana Agricultural college experiment station with clover and corn silage as feeds for dairy cows led to the following conclusions:

First—Second crop clover made into silage during September and October after being frozen kept well until May and June the following year, but became dark in color strong in odor and

SILO OF THE MONTANA AGRICULTURAL COLLEGE EXPERIMENT STATION.

was not relished by dairy cows after the weather became warm.

Second—Cattle relished the clover silage and had a keen appetite for it during the winter months.

Third—As an average of three experiments of two periods each the daily production of milk on clover hay was 22.8 pounds and of fat 0.93 pound, while on clover silage the daily production of milk was 24.08 pounds and of fat 0.97 pound.

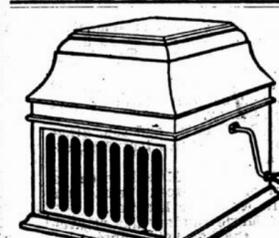

Fourth—On clover hay the cost of producing a hundred pounds of milk was 73.9 cents and of one pound of fat 17.9 cents, while on clover silage the cost of producing a hundred pounds of milk was 73.4 cents and of one pound of fat 17.8 cents.

Fifth—In milk production 2.33 pounds of clover silage were required to equal one pound of good clover hay.

Sixth—The value of clover silage, according to the experiments reported, ranges from \$2.36 per ton to \$2.76 per ton, with an average value of \$2.55 per ton.

Seventh—Corn cut in the milk stage made good silage and was relished by dairy cows.

Eighth—With a basic ration of alfalfa hay and a mixed grain ration of bran, oats, barley and shorts corn silage from corn cut in the milk stage had a value of 2.35 per ton for milk production as compared with clover hay.

## New Edison Phonograph Free

Write Today For Our New Edison Catalog—that tells about the superb new model Edison with Mr. Edison's new diamond styles reproducer and our NEW Edison offer. Now read:

**The Offer:** WE WILL SEND YOU the new model Edison and your choice of all the brand new records on an absolutely free loan. Entertain your family and your friends. Then, when you are through with the outfit you may send it back at our expense.

## The Reason:

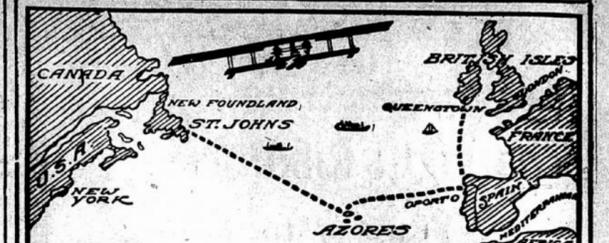

We are tremendously proud of this magnificent new instrument. When you get it in your home we know every body will say that nothing like it has ever been heard before, so we are sure that someone will want to buy one of these new style Edison's, especially as they are being offered now at the most astounding rock-bottom price and on easy terms as low as \$2.00 a month.

REMEMBER, not a penny down—no deposit—no guarantee—no C. O. D. to us—no obligation to buy—A FULL FREE TRIAL in your own home—DIRECT from us—DIRECT to you. Returnable at our expense or payable (if you want to keep it) at the actual rock-bottom price direct from us.

## Our NEW Edison Catalog Sent FREE.

Your name or address on a postal or in a letter is enough. No obligations in asking for the catalog. Get this offer—while this offer lasts.

SCHLEUDER PAPER CO. Edison Phonograph Dealers AUSTIN, MINN.

Controlling big stories like Lieut. J. C. Porte's attempted flight across the Atlantic ocean, is one reason why we can say—

## The St. Paul Dispatch and Pioneer Press

Print more real news "scoops" than any other newspaper in the Northwest.

IN OTHER WORDS—By being a reader of either of these papers you can get more news and get it earlier than through any other channels, and that is what you want in a newspaper. A trial subscription is the way to test out the above statement.

THE MILLION DOLLAR MYSTERY is a "corking" good story running exclusively in the Sunday Pioneer Press and at the movies. Back chapters free on request.

### There Are Several Good Separators BUT THERE IS Only One Best Separator—that's the MILWAUKEE

A FEW REASONS WHY

- The Only Separator with Interchangeable Aluminum Discs.
- The Only Separator with No Numbers On Discs.
- The Only Separator with Self-Balancing Discs.
- The Only Separator with Clarifying Discs.

MADE IN THREE CAPACITIES:

Capacity	No. of Discs	Weight of Bowl	Price
500 lbs.	12	6 lbs. 2 oz.	\$50.00
750 lbs.	15	6 lbs. 12 oz.	\$55.00
900 lbs.	21	8 lbs. 0 oz.	\$60.00

Compare the number of Discs, the weight of the bowls and the PRICES with other make separators of like capacity and high-grade quality. A five year written guarantee goes with every machine. You take no risk, as we give you a demonstration—See the MILWAUKEE at

John Hanson's, Austin, Minn., and Bert J. Hanson's, Lansing, Minn.

Reduced fares are in effect also to other summer resorts too numerous to mention. Reductions can be applied to almost any point you wish to visit this summer. For particulars call on, phone or write H. B. COFFIN, Agent, C. G. W. Depot, Austin, Minn.

Differentiate Blood Spots. Medical jurists had until recently no certain means of distinguishing the blood of a man from that of, say, a dog. Research, however, has evolved a new and most subtle process whereby, in the case of fresh blood, of any race, the difference between man and dog can be ascertained.

Distribution. The longer I live, the more I am persuaded that the gifts of Providence are more equally distributed than we are apt to think. Among the poor, life is enjoyed so much and among the rich, so much is sacrificed to the pleasures of the senses, that the
