The American Spectator for July contains the following from the pen of A. P. Miller-a handsome tribute in honor of the vehicles of thought to the handling of which his own life has been industriously devoted:

THE ARMY OF TYPES. Oh! a glorious fame is the fame of the fray. For the banner of S'ars and of Stripes! But the mightiest soldiers of all are they Who march in the army of types! How they come at the wave of the captain's hand How they gather with rattle and click, And leap to the ranks at the silent command, On the forming ground of the stick.

And whether it storm or whether it shine, And ever by day and by night, With a click, click, click, they fall luto line, And march away to the fight! Each soldier moves on in his squad of a word, To the drum of the ago in the van; And armed with a two-edged invisible sword, That cuts through the spirit of man.

Where Ignorance sits on her shadowy throne. Built round by the walls of Old Night, They crumble and crush into powder the stones And let in the Legions of Light! Where Tyranny reigns with his foot and his yoke On the neck of the poor and the just, They cease not to smite till the fetters are broke And the Tyrant is laid in the dust.

O army of Freedom! and army of Light!
O liost of Mankind! battle on; [right
Till the People shalf rule in their God-given

The weather is prime for harvesting and haying, but rather too dry for flax. Harvest is nearly over now. Barley Harvest is nearly over now. Barley, though thin on the ground, was well headed. Wheat will yield quite well and the berry will be plump and heavy, as a rule, though some fields are off. Many of the oat fields, especially the late ones, are in bad condition on account of rust. Prairie hay will be a light crop, and unless the upland improves materially, it will hustle those with large stocks to provide for them with large stocks to provide for them. UNDISPUTED MERIT.

The great success of the Royal Baking Powder is due to the extreme care exercised by its manufacturers to make it entirely pure, uniform in quality, and of the highest leavening power. All the scientific knowledge, care and skill attained by a twenty years' practical experience are contri-buted toward this end, and no pharmaceutical preparation can be dispensed with a greater accuracy, precision and exactness. Every article used is absolutely pure. A number of chemists are employed to test the strength of each ingredient, so that its exact power and effect in combination with its co-ingredients is definitely known. Nothing is trusted to chance, and no person is employed in the preparation of the materials used or the manufacture of the powder who is not an expert in his particular branch of the business. As a consequence, the Royal Baking
Powder is of the highest grade of
excellence, always pure, wholesome
and uniform in quality. Each box is
exactly like every other, and will retain
its powers and produce the same and the highest leavening effect in any climate, at any time. The government chemists, affer having analysed all the principal brands in the market, in their reports placed the Royal Baking Powder at the head of the list for strength, purity and wholesomeness, and thousands of tests all over the country have further demonstrated the fact that its qualities are, in every respect, unrivaled.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years it was supposed to be incurable. For a great many years Doctors pronounced it a local disease, and prescribed local remedies, and by constant-ly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional lisease, and therefore requires constitutional treatment. Hall's Catarrh Cures, manufactured by F. J. Cheney stitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucus surface of the system. They offer one hundred dollars for any case it fails to cure. The harvest is in glorious progress in Nobles County. Barley is in shock Wheat is falling before the harvester. The yield is called good, and the quality of the grain superior to that har-vested here for a year or more. Oats more promising than it has done for years. A gentleman just from Ohio reports to us that corn in northern Iowa and southern Minnesota is looking far better than the same crop in Ohio this year.

ATTENTION FARMERS If you want a mower put one of ours against any other make and keep the est one. It will be the McCormick. DUQUINE, ILL., June 6, 1889. S. W.
