In California peach trees are successfully grafted with rosebuds, thus producing groves of red, white and pink roses.

Two canoes of European measles were received in New York the other day. They should have been spotted before landing.

A TEXAS boy found an old bomb that had been lying in the water since the war and tried to open it with an ax. It exploded; he may live, but it is doubtful.

It is interesting to note that of the \$28,000 divorces granted in the United States during the last twenty years, \$10,000 were granted at the request of wives.

It being leap year in Illinois, queen of the Sandwich Islands proposed a union with Uncle Sam. It is to be hoped that she will not insist on his taking her name.

SENATOR STANFORD'S bill to determine the value of the legal-tender dollar may serve some useful end, but the only way to really find out the value of a dollar is to need one badly.

LOUIS KOSUTH will be ninety years old if he lives until April 21, and says that except for the trouble he has had with his falling sight he feels comparatively strong and vigorous.

A Boston barber claims to be the swiftest man in the profession. He says he once shaved a man's head in three and one-quarter minutes. Whether the victim overtook him or not fails to state.

"God save America!" That is the prayer that comes from famine-stricken Russia as the food supplies furnished by our people are distributed to the needy. "Peace hath her victories no less heartily blest than war." Could any triumph in battle draw forth such a heartfelt blessing?

THE census of 1890 shows that there were 35,333,727 pounds of maple sugar and 2,228,277 gallons of maple molasses made in this country that year. The romance of the sugar camp may have departed, but the camp is still in existence and does a good business, especially in New York and Vermont.

THAT mere infants should be carrying pistols to school, in Chicago and elsewhere, and be playing with them during school hours, shows, says the Chicago Journal, a lack of home and school vigilance in the highest degree censurable. What is the probable future of a boy aged 13 who carries a pistol around with him, even to his school?

FREDDY GERHARD, of New York, noted for his attentions to Mrs. Langtry, the "Jersey Lily," who when twenty-one had an income of \$60,000 a year, has just been sued by a druggist for prescriptions intended to counteract the ill effect of a fast life. Freddy's great fortune has melted rapidly, though he still has enough to pay his board.

A BOTTLE was found in the sea off the coast of New Jersey the other day and it was fifteen dollars in money and a note reading: "The finder, whoever he may be, will give this money as his own. We are sinking; death stares us in the face." That must have been a generous soul that could think of others at such an hour and set his little stock of money adrift in the sea where it might be picked up and used.

WHILE irrigation has been doing wonders for the mythical "great American desert" which has aggregated 200,000,000 acres of forty or fifty years ago used to see upon their atlases, it has done something equally wonderful for the real African desert of Sahara. By the use of artesian wells 100,000 acres of this desert in Algerian territory have been irrigated and brought under cultivation. This land is especially adapted to grape culture, and in one year recently Algiers sent to France 10,000,000 gallons of wine.

A STRIKING illustration of the perfection and solidity of modern marine architecture is afforded by the case of the steamship Eider, which has just been dragged from the wreck. After having been at the mercy of the waves and rocks for almost two months. The stanchest vessels of twenty years ago would have gone to pieces in two days in such a position, but the Eider has withstood "tempests" and heavy pounding and with slight repairs will resume her place in the ocean-carrying trade.

SOME of the revelations of the census will startle a good many people. For instance, there are now more than 500,000 almond trees actually bearing in the United States; there are hundreds of thousands of bearing coconut trees; there are more than a quarter of a million olive trees, producing fruit equal to the best Mediterranean varieties. There are more than 500,000 bearing banana plants, 200,000 bearing lemon trees, 4,000,000 orange trees, and 21,000,000 pineapples. And the value of tropical and semi-tropical fruits grown under the American flag is nearly \$30,000,000.

THE new United States steamship Raleigh was successfully launched at Norfolk, Va., in the presence of a large crowd, and with the commission in about a year. Her battery consists of one 6-inch and ten 4-inch rapid fire breech-loading rifles on center pivot mounts, protected by thick steel shields. The rest of the hull is made fast to the carriage. The second battery consists of two 6-pounders, two 3-pounders, one 1-pounder and two 37-mm R. C. There are six torpedo tubes with openings about four feet above the water worked from the berth deck. Her workmanship is superior.

THE total value of the mineral products of the United States in 1890, according to the chief of mining statistics, was \$555,009,216. In 1889 the production was \$569,319,000. The output of pig iron increased from 3,375,912 tons in 1880, worth \$81,359,450, to 7,705 in 1890, valued at \$131,200,410. The value of the coal produced increased from \$95,640,396 in 1880 to \$171,856,484 in 1890. Among the other important metallic mineral products are: Gold, \$23,865,000; silver, \$70,444,645; copper, \$39,848,797; and lead, \$14,456,793. The value of the non-metallic products is estimated at \$844,765,011.

THE New York legislature proposes to prohibit the sale or gift of cigarettes to minors. In Massachusetts such a law is now in vogue. Physicians generally agree that the continued consumption of tobacco in this form is more injurious to health than in any other shape. In 1890 the number of cigarettes manufactured in this country was 2,877,709,440, against 2,436,575,000 the previous year. A statistical piece of the world's population at 1,490,000,000. Hence, the United States makes and smokes enough cigarettes to furnish every man, woman and child in the world with two cigarettes a year.

RANCHMEN SLAIN.

Western Cattlemen Engage in a Bloody Battle with Stock Thieves—Eight of the Former Reported Killed.

HELENA, Mont., April 9.—A dispatch from the south of the state on the 8th inst. announced that a battle occurred two days ago between a band of thieves and cattlemen on the Montana side of the Wind river country. The news was brought in by ranchmen who talked with one of the participants.

Ranchmen from southern Montana, northern Wyoming and northern Idaho, exasperated by the depredations of an organized band of thieves of the Teton section, assembled by agreement at a point somewhere west of Blackfoot and began the search for the robbers and found a large body entrenched in winter quarters.

They attacked them and were repulsed, losing eight killed and many wounded. The robbers also lost heavily. It is known that the ranchmen had been contemplating action, and that fact was the cause of the fight.

This band horse and cattle thieves is incorporated under the laws of Wyoming under a high-sounding name. The purpose of the organization has been under formation since last fall. Besides a party of twenty-five that started out from Billings it is learned that a party left Big Timber March 10, under the lead of Jim Roberts, a party composed of thirteen men, all of them mounted on horseback.

They loaded two cars with horses, pack mules, guns, ammunition and food. Their departure was kept a secret as far as possible, the newspapers being told only of a wish to get information for the present. One hundred thousand dollars' worth of beef was raised for this expedition and the men are paid \$1,000 each. The leaders got \$2,500.

They were determined not to yield to arrest. There is still a great deal of snow in the mountains and it may be slow work for the cattlemen to reach their headquarters, but they have the satisfaction of knowing that the thieves are in the mountains.

The amendment as agreed to appropriates out of the United States treasury \$100,000 to pay for subsistence and quarters of such honorably discharged non-combatant soldiers, sailors and marines who served in the civil war.

The directors of the World's Columbian exposition in session in Chicago elected the following officers for the ensuing year: President, W. T. Baker; vice president, H. N. Hitchcock; secretary, H. O. Edmonds; treasurer, W. K. Carlisle; treasurer, A. F. Seeburger; auditor, W. K. Ackerman.

In the Second district of Tennessee John C. Lick (post office) has been renominated for congress.

A BATTLE was reported in the southern part of Montana, near Dillon, between the ranchmen and cattle thieves in which the ranchmen were repulsed, losing eight killed and many wounded. The thieves also lost heavily.

THE labor party of Wisconsin will hold their state convention in Milwaukee May 24.
