The great day to which the go has been so anxiously looking forward has come and gone, and the Columbian exposition is now open to the world. Out south on the lake shore a new and wonderful city has sprung into life in a miraculous manner almost, and the earth, which so recently was clothed in nature's mantle, now throbs with the life and activity of mingling thousands of human beings from every country under the sun, and the cease less round of sightseeing has fairly be

## MATRIMONIAL METHODS.

How Some Unhappy Marriages Are Brought It is one of the misfortunes of the American plan of leaving the choice and decision of marriage almost altogether in the young man and woman concerned, that they are both called upon to live up to an impossible and romantic ideal, in a matter which has about it much that must be decided in the cold light of common sense, if a marriage is to be in all respects a happy one. A happy marriage without love is doubtless impossible, but it is equally impossible without a solid basis of character, of mutual tastes, and of common desires and aims, innate or acquired. In France, where marriages are settled almost altogether with references to the latter considerationsjoined to an adequate pecuniary prep aration—there are quite as many happy marriages as here, where the pecuniary side of the marriage gets little or no re gard, character and common tastes less than they should, and a passionate, but it may be transient, love is held as sufficient reason for marriage. Nine-tenths of the qualms, regrets and forebodings which with American women accompany the entrance on marriage are due to a consciousness that the article of love given and taken is not of that romantic and ideal stamp which novelists, poets and popular convention agree in holding the one thing needful to a happy marriage. Nine-tenths of the unhappy marriages spring from a fail-ure to weigh and consider the other Chicago, interested in the welfare of less poetical, but not less necessary. conditions which are indispensable to the happy union of two people. It American marriages had a little mor of French prudence and French a little more of American romance both would be improved. But the root of all mis conception and false expectation in regard to marriage is the belief that the first object of marriage is to make a

The World's Inn.

There can be no doubt that the "World's Inn," under the management of Mr.Chas. E. Leland, (of the noted Leland family of hotel-keepers) is one of the reliable exposition hotels in Chicago. The appointments are perfect, the location unequaled, and, in view of the fact that the building is absolutely fireproof, the rates—\$2 per day for each person, two persons in a room—are remarkably liberal. Scores of hotels erected in the World's Fair territory are veritable firetraps. The "World's Inn," on the other hand, affords security to life and property. The location, directly opposite the Fair grounds, and in close proximity to steam and street cars, adds to its attractiveness. Although it contains 800 commodious rooms, it is only three stories high, an advantage that will be appreciated at once. Rooms may now be secured by mail or telegraph to Chas. E. Leland, Manager, The World's Inn, 60th St. and Madison Ave., Chicago. The World's Inn
