I HAVE satisfied myself that McCormick Machines are the lightest draft, most durable and most reliable grain and grass cutters built by any manufacturer. I believe they are the cheapest machines a farmer can own—if experience has proven anything, it has proven this. I believe a careful examination of them will convince any man that they are planned with a mechanical nicety and put together with a degree of care far ahead of that shown in any other make of harvesting machinery. I want all interested parties to come and see them. They are guaranteed to work where others fail.
