

THE NEW YORK BARGAIN STORE.

It's all in "Knowing how." Christopher Columbus surprised some people once by making an egg stand upon its little end. They couldn't see how the thing was done until Christ, explained that he flattened the end of the egg a trifle before letting go of it. It was all in knowing how! It is surprising to most of the other fellows how we can afford to sell all the newest and best goods at such remarkable low prices and keep it up, but its all in knowing how! Knowing how to buy to the best possible advantage, buying in large quantities, turning over our stocks quickly, selling only for cash, being content with a small profit; this enables us to flatten the end of our little prices so that they stand up prominently as real genuine bargains, its a trick that saves lots of money to the people.

Ex-Senator John J. Ingalls, of Kansas, whose fame as a brilliant writer, a man of remarkable scholarship and literary attainments is even greater than that of the distinguished senator, announces a new book on the subject of the American-Spanish-Cuban war. It is entitled "America's War for Humanity in Picture and Story." It is published by the N. D. Thompson Publishing Co., of St. Louis, Mo., and is an exhaustive discussion of the causes of the war, and an equally exhaustive history of its incidents, and a brilliant analysis of the famous characters conducting it. It promises to be the one great and popular work called forth by this wonderfully interesting natural episode. Whatever Senator Ingalls touches he adorns; and his book shines and sparkles in the light of his genius, and will be a monument to his fame. The subject now so engrosses the public mind as to forecast for this book a sale that will be universal. It will be sold by subscription only, and the canvassing samples are now ready for agents. We advertise it in another column.

We acknowledge receipt of a new American national hymn, composed by Henry De Lorme, one of this country's most celebrated tenors, that has a true spirit of the times, and is full of patriotism and character. It is best suited for solo and chorus, but can be sung by either at will. Its compass is medium, but majestic, rich in harmony, simple, yet effective. This musical gem for the nation should find its way at once into the churches, schools and homes of our glorious land of the free, and if not obtainable here, 25 cents in stamps sent to the Conover Music Co., of St. Paul, will bring it to your door. The retail price of this piece is 50 cents, but this company sells all its sheet music at half price. In addition to this they announce a removal sale, and offer pianos, organs and their entire stock regardless of cost until August 31, when they move into new quarters. 45-2

We steal the following from the Window Reporter as something of this character is about all that can be stolen from an editor: About the only way to get even with the ADVANCE is to pay what you owe it. If getting even with the editor makes you happy just try it and chance a dollar and a half in advance for luck. Give the paper a chance to get even with you. It is a sort of give and take world anyhow.

Twenty one of our citizens were counted at Heron Lake encampment and it is thought that there were many more than this present. An excellent time is reported by all and the united expression is made that Heron Lake royally entertained her guests. The most prominent speakers were unable to be present but it is said that there were enough preachers there to fill up the program with. Another complimentary remark was heard to the effect that a drunken man was not seen or even the breath perfumed with liquor was noticed yet some would say there was more liquor sold than if they had saloons.

Things are Coming your way Mr. Farmer
You are doing most all of your work a great deal easier to-day than you were ten years ago, and if you have the best and latest improved harvesting machinery you will save your crop easier this season than you ever did before.
Come in and let us show you what we mean by "best and latest improved"—the world's standard for sixty-seven years—the tried and true McCormick.
The McCormick Right Hand, Model 1898, is better made, has more good features and a better record than any other harvester and binder.
The McCormick New Four Steel Mower is worth more than we ask for it, and easily worth \$10 more than any other mower because it runs nicer, lighter and will wear longer than any other.
The McCormick Vertical Corn Binder for 1898 will lead them all. In 1897 it won over ninety per cent. of all competitive field trials—and it will do it again this season.
The McCormick Folding Daisy long ago earned the proud title of "The Queen of Reapers." This pre-eminence is still maintained by the Daisy.
During the harvest of 1897 the famous roller-bearing McCormick binders and mowers were shipped out from the McCormick works at the rate of one hundred car loads a day. This is equal to the combined output of any other four manufacturers of harvesting machinery. Come in and see our line of McCormick Machines and you will understand why they are in such wide demand.

"What is the Price of this Hat?"
Asked a gentlemen who came in our Store last Tuesday, holding up a man's summer hat. "THIRTY CENTS" he was told. "Thirty cents," he exclaimed, "Why I paid fifty cents for this hat I have on and the two are exactly similar."
The same day another gentleman remarked as he paid for a milk pail, "I have saved just twenty cents by buying this pail of you, for it is as large and as good and heavy tin as they asked twenty cents more for at another place."
"Why," said a lady as she was looking at a piece of 8c wash goods, "I was asked 12c a yard for goods that was as near like this as two peas at — store."
We hear such remarks every day and dozens of times every day too. The fact is we are saving the people money. If you have not called at the
