## אəuow Money is Upside Down!

While there is no danger of a panic, nor even a siege of hard times in this great prosperous country of ours, there is a tightening in the money market so that retrenchment is the order of the day in certain financial quarters. Manufacturers and jobbers are doing their utmost to dispose of their stock, and those overstocked are closing out certain lines at low prices. We have taken advantage of this situation and have made some very good purchases of goods which we are enabled to offer at greatly reduced prices.
