Real Estate Agents,
Woodstock, Va.

Lines by a Sick Post.
Mr. William Watson, when ill in London and attempting a dinner for which he had no appetite, scribbled these lines on a scrap of paper, which he threw to his attendant:
Strange sauce that's mingled with the sauce—in vain.
I sat and wondering what and why I eat,
Long for the porridge of my youth again.
—London Chronicle.

Clouds and the Weather.

When two weather prophets disagree does it argue error or incompetence in either? No, says the author of "Storms and Storm Signals" in Yachting. The data upon which they base their predictions do not always bear one interpretation. Thus: Because the clouds indicate weather in a different manner according to the geographical location of the observer, and also because they are in themselves but byproducts of the weather and are not causes, weather predictions from clouds at sea should be taken with plenty of reservation of judgment. To say, for instance, that at a "red sky at night signals delight" is very tenuous and possibly truthful where knowledge is conspicuous by its absence, but a red sky at night may mean almost anything from a surplus of moisture in the air, meaning probably rain, to a volcanic eruption 2,000 miles away which has sent great clouds of dust into the air, causing the red color by reflection and refraction of the light rays.

The Eyes.
"Long, almond shaped eyes, with thick and creamy lids covering half the pupil and with a forehead that is full above the brows—there you have the eye of the man of genius." The speaker's own eyes answered that description strikingly, but he was far from being a man of genius, being, in fact, a magazine editor.

"Protruding eyes," he went on, "show mental and bodily weakness. Eyes close together denote cunning. Those far apart denote liberality. Thin lashes without any upward curve are signs of melancholy and indecision. The eyes of a voluptuary move slowly under heavy lids. Those of a miser are small, deep sunken and blue. In a boy and perpendicular forehead, brilliant and clear, gazing and flashing with a rapid motion—the most beautiful eyes denote elegance of taste, gaiety, some selfishness and a great interest in the opposite sex."—New York Press.

Archimedes.
As a mechanical Archimedes produced the correct theory of the lever and invented no less than forty interesting devices, including the endless screw, the pump, the organ and the "burning glass," with which latter novel weapon he is said to have set fire to the ships of an enemy's fleet from a considerable distance. The story is probably fabulous, but none the less interesting, as exhibiting the faith of the people in the man and as indicating the character of his pursuits.

As engineer Archimedes was looked upon as hardly less than a magician. He produced catapults which threw enormous stones and heavy pikes at long range to the ranks of the enemy or into his ships, and great derricks were built by him with which to lift the attacking craft out of water or to upset it, destroying all on board. His proposed use of the lever meant the production of the inconceivable inventions in machinery and engineering construction, and his own estimate of his importance was expressed by the familiar quotation, "Give me whereon to stand and I will lift the earth." Archimedes was the first and perhaps the most inventive and greatest of early engineers. His lever still moves the world, and his spirit is inherited by generations of the men who have made modern civilization possible.—Cassell's Magazine.

The Turks and Raki.
"Turks often get drunk. They cheat their religion, the dogs, to do so," said a converted Constantinopolitan.
"Mohammed forbade wine to his followers, but raki is made of grape juice. It was unknown in Mohammed's time or of course he'd have forbidden it, too, for you can get frightfully drunk on it. I know: oh, I know! It's a white drink, with a sweetish taste, a good deal like gin."
"A Turkish dinner is mostly a vegetable affair. If you can call a mastic vegetable, it consists of such things as lamb, a curried milk spread and scented and baklava cakes cooked in honey, sprayed with rosewater and coated with saffron flavored whipped cream.
"With each course you drink raki. If, getting drunk, you get miserable the thing to do is to crack your glass in your hand so as to give yourself two or three cuts. Unhappy Turks, you must know, express their wretchedness by cutting their hands. Look at these scars."—Minneapolis Journal.

Women in England.
In the seventeenth century, when Englishwomen were not recognized as possessing an economic and political status side by side with Englishmen, there was written an interesting entry in the church warden's accounts of St. Martin's-in-the-Fields, proving that one Elizabeth Bartlett was entrusted with the casting of the second bell and that all the women employed there were paid at the same rate as men for the same work. Another instance is to be found in the records of the Fleet Prison, of which the first female warden, appointed in 1217 on the death of her husband Robert, received the same salary "as the said Robert had been accustomed to during his life." There was no talk then of confining the woman's sphere to work that was paid badly.

Surf Birds.
That birds of the family termed surf birds in the Hawaiian Islands should leave that paradise of the Pacific to go and roost their young in the tundras of Alaska would seem to many an extraordinary proceeding yet the turnstone and the black bellied plover and the Pacific golden plover make the long journey of about 4,000 miles thrice annually.

Two Reasons.
"You mustn't play with Mr. Borum's hat, Bobby," said a young lady who was entertaining a caller to her small brother.
"Why mustn't I?" asked the youngster.
"Because you might break it," replied his sister, "and, besides, he will send it to you."

For Coughs and Colds

Troubled with a cough? A hard cold, bronchitis, or some chronic lung trouble? There is a medicine made for just these cases—Ayer's Cherry Pectoral. Your doctor knows all about it. Ask him what he thinks of it. No medicine can ever take the place of your doctor. Keep in close touch with him, consult him frequently, trust him fully. No alcohol in this cough medicine.
J. C. Ayer & Co., Lowell, Mass.

After these dates, I will be in the Treasurer's office from day to day until the 1st of December.
Five per cent. will be added the 1st of December.
Very respectfully,
J. C. HUTCHESON,
Treasurer Shen. County.

FOLEY'S HONEY-TAR
Cures Coughs, Whooping Cough, Sore Throat, Bronchitis, Asthma, Hay Fever, Eczema, Itch, and all Skin Diseases.

The Power of Habit.

After having been a faithful devotee of the automobile two years or more Mr. Bragdon suddenly was seized with the violent fancy for motor boats. "A beautiful river runs by this town," he said. "Why not have some enjoyment out of it? In a motor boat you don't have to dodge policemen and rural constables."
So he bought one, took a day's instruction in the art of managing it and keeping the machinery in running order and started out on his first trip with it one bright morning in July.

It was late in the afternoon when he returned home. He came in by the back way. His clothes were water soaked, and he had a generally limp and bedraggled appearance.
"For pity's sake, Alfred!" exclaimed his wife. "What has happened to you? Did the boat upset?"
"No, Lucy," he answered. "Don't say anything about it and I'll tell you the boat's all right, but when I had been out on the water an hour or two something went wrong with the motor."
"Well?"
"Well, before I—er—knew what I was doing I was over the side of the boat and trying to get under it to fix the thing."

A Shrewd Doctor.
"This incident," said a doctor, "happened in France two or three centuries ago, in the days when public criers were always in evidence. There was a physician of Montpellier who used to go from place to place to practice the healing art. He employed a very ingenious trick to help him on his way. When he came to a town where he was not known he pretended to have lost his dog, which he declared was a very valuable animal, and ordered the public crier to roam about, beat loud on his drum and offer a reward of 25 louis to whoever should bring the dog to him. At the same time the crier was directed to mention all the titles and academic honors of the doctor as well as his place of residence. Of course it happened that the doctor was not long in becoming almost the sole topic of talk in the town. The people made up their minds that he must be a famous physician as well as a very rich one, as he could offer 25 louis for finding his dog. You might reasonably judge that the dog was never found, but plenty of patients were."

Curious School Customs.
Mexican schoolmasters show their appreciation of a pupil's efforts in a curious manner. The diligent student is allowed to smoke a cigar during the lesson. When the whole class has given a general promise, permission is given for a general smoke, and even the little Mexicans are allowed to light a cigar of a size and quality proportionate to his superior position. But the scholars are not allowed to drink, this privilege being accorded to the master only. On his desk he always keeps a bottle of liquor, which, when empty, occasions much dispute among the parents of his scholars, as it is considered an honor to be able to fill the schoolmaster's bottle.—London Standard.

Winning a Jurymen.
It is related of Lachland, the most famous of French criminal lawyers in the last century, that in pleading a certain case he perceived that one of the jurors seemed to be hostile to him and his argument.
In the faces of all the other men in the box he saw with his practiced eyes that his oratory or his shrewdness was having its effect, but this man, in spite of all Lachland could do, remained frowning, suspicious, obstinate.
Lachland continued with his work, however, and presently saw that his opportunity had come. It was a hot day, and a ray of sunlight had penetrated a crevice on the curtain and was shining on top of the head of this jurymen, who was quite bald. The lawyer paused in his argument and addressed himself directly to the court.
"If your honor would please," he said, "to order that the curtain in yonder window be lowered a trifle I am sure that the sixth jurymen would appreciate it."
This sign of watchful attention won the obstinate jurymen's heart and Lachland's case—New York Tribune.

Walking on Your Hat.
"Nothing is wasted in this house" is the proud remark which you may often hear from the lips of an expert housekeeper. It is a boast, however, that few people could really justify. Take the case of a worn-out derby hat. In the majority of instances this discarded article of headgear finds its way to the rubbish heap or perhaps into the hands of a passing tramp. If only people were aware of the fact, the most excellent fit soles for the inside of their boots and slippers are thus being discarded. These soles can be cut from the sides of an old hat and are much more comfortable than the ordinary cork ones.

The Japanese and Their Prisoners.
The Japanese have a rather kindly way of treating prisoners. The regulation prison dress is a kind of straw-berry red colored kimono, but men on remand wear light blue as a sign that, although under strong suspicion, they have not yet been found guilty. When prisoners in this class have occasion to pass through the public streets a curious extraneous like has been placed upon their heads—Wide World's Magazine.

Quitting Him Down.
A farmer sued a Seattle dealer for damages in the local county court. "When I bought the bull," said the defendant, "he told me it was gentle and perfectly harmless—a child could play with it in fact. Half an hour after I got the animal home he disabled a couple of my farm hands and then turned on me."
"Perhaps the animal was excited by the public proceedings," suggested his lawyer. "Is he quiet enough now?"
"Well, yes; but you see—"
"Ah," remarked the defendant, "then my description was correct, after all. I said if he did get excited at first he would quiet down."
"Yes," responded the plaintiff grimly, "but you didn't tell me I should have to shoot the beggar to quiet him down. That's what I had to do!"—London Scraps.

Malaprops.
The pious old lady, returning from a visit to the zoo, announced that she "always did enjoy a visit to the theological garden" and the servant, who, describing her master's last illness, explained that the "doctors held a consolation and found that it was something eternal" have found a recent equal in the lady who observed that when she was in Italy she "saw so many people in the garbage of monks with tonsils on their heads."

Modern Art.
Art in our time seems like an iridescent oil spread about on the surface of the muddy waters of our civilization; it and life don't mix.—London Saturday Review.

A Patient Sufferer.
Boy (to tramp)—Don't you get awfully tired of doin' nothin', mister?
Tramp—Terrible! But I never complain. Everybody has their troubles.—Philadelphia Inquirer.

Walking on Your Hat.

Gave Him All the Lot.

"So that is your final word?" said the rejected one. Very well, then, Arabella, in your presence I will end the life you have brightened."
He drew forth a small bottle and handed "Poison," drank off the contents and fell senseless at her feet. Did she stink beside him sobbing with remorse? No. She hastily left the room and in two minutes had returned and was kneeling beside him. Then she forced between his lips the following: Half a cup of turpentine, one pint of milk, a cup of warm soap-suds, a tablespoonful of aromatic ammonia, a cup of black coffee, a glass of mustard and water, a gill of vinegar, the juice of a lemon, the beaten whites of six eggs and one cup of four and water.
"Algeron," she observed coldly as he slowly opened his eyes, "I am a graduate of a correspondence course in first aid. My one regret is that, as I could not on the instant ascertain whether you had taken an acid or an alkali, I was compelled to administer all the antidotes I had learned."—London Scraps.

A Picture Romance.
It is said that one of the most beautiful ladies in French society today was first revealed to her husband on the walls of the salon. It was while visiting the salon in 1878 that the youthful Marquis de C. was struck by the childish beauty of a young girl one of the prominent figures in a picture of a village fete. Her tumbled golden locks, her dancing blue eyes and the freshness and graceful abandon of her figure so fascinated him that he sought out the artist and learned from him that the "little witch" was the daughter of a poor peasant near Avranches, where the picture was painted. To seek out the peasant and to make the acquaintance of his fascinating daughter, child of nine summers, was soon accomplished, and the marquis lost his heart even more completely to the real than to the pictured girl. With the father's approval he had the girl educated at one of the best schools in Paris, and nine years later, on her eighteenth birthday, the maid of the village fete blossomed into the still more lovely Marquise de C.

Parents' Rights and Duties.
It is the duty of parents to protect the hair of parents the front of their children's hair. Two hair eyes, straight haired parents will have only two eyes, straight haired children. Two wavy haired parents may have straight, but the chances are they will be slight. Two curly haired parents may have children with other curls, wavy or curly hair, but the possibility of curly hair offspring is probably large.—American Standard.

Parents' Rights and Duties.
It is the duty of parents to protect the hair of parents the front of their children's hair. Two hair eyes, straight haired parents will have only two eyes, straight haired children. Two wavy haired parents may have straight, but the chances are they will be slight. Two curly haired parents may have children with other curls, wavy or curly hair, but the possibility of curly hair offspring is probably large.—American Standard.

J. H. DOWNEY & SON.
MT. JACKSON, VIRGINIA.

Wagon Wisdom
It's wagon wisdom that prompts a farmer to select a Weber Wagon. He knows that the 61 years experience in wagon building which stands behind every wagon is a guarantee that when he buys a Weber he buys the highest quality. Sixty-one years of wagon building have resulted in the Weber wagon of today, which, for correct design, excellence of material and conscientious construction, stands without a peer—King of all farm wagons.
Farmer's Union.

INDIGESTION AND DYSPEPSIA.

CAUSES AND CURE.
Indigestion exists when the food is not properly digested. Dyspepsia means literally a lack of pep in the stomach,
