

PHILLIPSBURG HERALD.

Published by Herald Publishing Association. PHILLIPSBURG, MO. KANSAS.

Ismael Pasha and Egypt.

The reign of Ismael Pasha was a gallop at full speed. He was the moving spirit of progress; but unfortunately by this untiring energy he had gained a reputation for "governor-in-chief" of the system.

The idea that American grapes are unsuitable for the manufacture of raisins must be considerably staggered by the announcement in the Riverside Press, of a vineyard in California, Cal., that the crop of that State this year will aggregate more than one hundred and fifty thousand boxes.

Mr. Ernest Kutz, editor of the Fall River (Mass.) Sun, thus discourses upon the merits of St. Jacobs Oil: "Suffering with rheumatic pains I was told by a friend to read of St. Jacobs Oil and I have remedied. I read of St. Jacobs Oil and I have remedied."

There won't be any need of searching for the North Pole for the next four months. Col. C. W. HERBERT, of the Forest Park Restaurant, St. Louis, Mo., was entirely cured of rheumatism by St. Jacobs Oil, says the St. Louis Post-Dispatch.

Winter Care of Live Stock. There are a few general rules for the care of live stock in winter, which are of universal application: First—They should lie dry, whether bedded or not.

Second—Shelter saves fodder, wherever lumber can be easily obtained, to a degree that few practical men are aware of. The warmer the stables are, the better, except perhaps for sheep.

Third—As to feed. This should be given with the utmost regularity and uniformity—never more than will be all eaten up, and never less than the next feeding time. Then the animals have an appetite for their food, so that coarse fodder may be first given, to be followed with better, and by grain in some form, if this be a part of the daily ration.

Fourth—Grooming and care of the animals are a most valuable means of keeping them in health as well as of saving feed. The skin of an animal existing in a state of nature is washed by every shower, brushed and matted by every bush, licked by its mates, rubbed by the ground in rolling, and in various ways kept free from accumulations of its own exfoliations.

Fifth—Sunshine. Fresh air and sunshine are health-giving and invigorating principles and not one of our living dependents should be without them. In the thorough ventilation recommended, good air is provided for, nevertheless all well fed animals enjoy and are the better for air breathed out of doors even on our coldest days, and a sun-bath of an hour or two is of the highest value.

Sixth—Give all animals free access to salt. With plenty of feed, horses and sheep will stand any degree of dry weather and pile on the hay stack. In sheltering all animals and poultry, which we do from motives of economy, it is well to bear in mind their natural instincts, that those which need it most are best protected.—American Agriculturist.

FARM AND HOUSEHOLD.

Good straw is better cattle food than poor hay. Wild mit scattered about the house will rid it of rats and mice. To relieve hiccough at once, take a lump of sugar saturated with vinegar.

According to the report of the Fruit Committee of the American Pomological Society, the Concord Grape has the highest recommendation throughout the Union, being recommended in thirty-five States, and in twenty-four of these is reported as possessing great superiority and value.

The idea that American grapes are unsuitable for the manufacture of raisins must be considerably staggered by the announcement in the Riverside Press, of a vineyard in California, Cal., that the crop of that State this year will aggregate more than one hundred and fifty thousand boxes.

While a Maryland hotel cost \$3,000 in eighteen months the porter thereof laid away \$275, in the same length of time. All landlords would be porters if there was room in the profession.—Detroit Free Press.

Food Adulteration in Paris.

Food is much adulterated in Paris. Out of sixty-two samples of butter analyzed at the municipal laboratory last month, only eleven were found to be pure. Most of this had butter isoleomargarine, large quantities of which are shipped from Holland to Paris in Normandy and thence sent up to the Paris market.

Flour, of which more than 16,000 tons are used daily in France, is very generally adulterated; and only eighteen out of thirty-one samples were found to be free from any admixture. The most common form of adulteration consists in the mixture of flour made from beans, peas, lentils and Indian corn with the wheat flour; but in some cases it has been found that the flour has been adulterated with deleterious substances, such as composites of lead, copper and zinc, sulphate of lime and chalk; and it is reported by the official analyzer that a steady trade is done at Rotterdam in corn adulterated with thirty per cent of rye flour, for importation into France.

Chocolate is adulterated by the addition of mineral, powdered date stones, and bean meal, and coffee is very rarely to be had pure when purchased abroad. There is no certainty of getting pure coffee, even by buying the whole; for a short time ago there was an establishment in one of the suburbs of Paris where artificial coffee berries were made from a paste composed of ground acorns, burned wheat, and coffee dregs.—N. Y. Sun.

Mr. Ernest Kutz, editor of the Fall River (Mass.) Sun, thus discourses upon the merits of St. Jacobs Oil: "Suffering with rheumatic pains I was told by a friend to read of St. Jacobs Oil and I have remedied. I read of St. Jacobs Oil and I have remedied."

Poverty and Distress.

That poverty which produces the greatest distress is not of the purse but of the blood. Deprived of its richness it becomes scant and watery, a condition far more menacing to medical writings. Given this condition, and scrofulous swellings and sores, general and nervous debility, a condition far more menacing to medical writings.
