

Single copies of The News in wrappers for sale at this office, at five cents per copy.

Notice.

A meeting will be held at Emporia, on Saturday, September 5th, at 3 o'clock P. M., for the purpose of electing two Delegates to the Convention to be held at Sac Agency, on the 12th September, to nominate members to the Territorial Legislature.

Notwithstanding the dull season, our town is progressing rapidly. Mr. Hadley is building a new store, and another will soon be commenced. Another blacksmith shop will be opened in a few days, by Mr. Kirk. Mr. Spencer has commenced the erection of a large hotel. Mr. Wm. Perry is about to establish a furniture warehouse, and will commence manufacturing as soon as the machinery can be put up.

Several dwelling houses are in process of erection, and many others will go up as soon as lumber can be had. As an evidence of the rapid improvement of this place and neighborhood, the three saw mills in this vicinity cannot supply lumber as fast as wanted.

Read E. P. Bancroft's advertisement in another column—and "If" you want anything in "his line," give him a "call."

Agricultural Meeting.

A mass meeting was held, in accordance with a previous call, at Topeka, July 16th, 1887, at which the following committee was appointed to draft a constitution for a State Agricultural Society: C. C. Hutchinson, of Lawrence; W. F. M. Army, of Hyatt; John Grable, of Waltham; Henry Harvey, of Council City; Dr. Hunting, of Manhattan; Moses C. Grimes, of Neosho City; Wm. Penneck, of Leavenworth; Martin Cave, of Richmond; M. L. Gaylard, of Topeka; Charles Robinson, of Quindaro; W. Y. Roberts, of Wyandot.

A meeting of the committee was appointed at Lawrence on Wednesday, September 9th, 1887. It has been impossible to consult with all the committee, but it is deemed expedient to call a general meeting of all friends of the cause (with which duty the committee were charged) at the same time and place. The committee will meet at 9 o'clock A. M., and the mass meeting at 1 P. M., at which time a State Agricultural Society will be formed. It is earnestly desired that every friend to the project should be present, as it is important that officers be elected who can be collecting facts and statistics concerning the crops, etc., of the country. C. C. HUTCHINSON, Chairman of Committee.

A Western "Harvest Home."

The following paragraph from the Chicago Tribune, gives an idea how harvesting is done in the West:

A friend of ours says that one day last week he went up on top of a hill called Mt. Zion, six miles from Janesville, Rock county, Wis., and counted on the plain one hundred and sixty-four horse power reaping machines, busily cutting down wheat. There were one thousand men, women and boys following after, binding and shocking up the golden sheaves. It was a sight worth seeing, to behold the grain falling and being gathered up at the rate of two hundred acres per hour!

A Masonic Movement.

We find the following announcement in the Richmond (Va.) Dispatch of the 6th inst:

We understand that one or more of the Masonic Lodges of this city have originated a plan for the purchase of Mount Vernon, which, if taken hold of in earnest by the "brothers of the mystic tie" throughout the Union, cannot fail of success. The plan proposed is to get the subordinate Lodges to contribute \$1 for each member. The price asked for the Mount Vernon estate is \$200,000, and the Masonic statistics show that the order numbers three hundred thousand; so that if all the Lodges in the Union accede to the proposition—and the probability is that they will—the purchase of Mount Vernon may be looked upon as a fixed fact. But the suggestion, as given out, does not stop here.

When the land which contains the last mortal remains of the immortal Washington is possessed by the Masons, they propose to present it to the State of Virginia, only reserving to their order the right to meet around the tomb of their deceased brother once every year, to celebrate his imperishable deeds, and to keep alive his great name. We have strong faith in this patriotic plan for the purchase of Mount Vernon, knowing as we do, that the order from which it emanates are ever ready for good deeds, and never look back when they put their hands to the plow. Let every true Mason feel that the tomb of WASHINGTON can only be preserved from decay by his efforts, and that a few short months will roll by ere it will be the property of that State which gave him birth, and to whose keeping alone his ashes should be entrusted.

Our citizens were somewhat surprised on Friday, by the appearance in our streets, of about one hundred and twenty-five Indians of the Kaw tribe. They were on their way to pay a friendly visit to their neighbors, the Osages, in the southern part of the Territory, and as they said, to "swap" blankets for ponies.

For some articles, against the "liquor traffic," published by J. M. Brown, editor of the Oskaloosa (Ia.) Herald, he was attacked, on the 3d inst., by J. W. Bowen, keeper of a drinking saloon in that town, and, in the affray the latter was shot.

Bowen had made frequent threats to take the life of Brown. Emigration has again commenced. On Friday morning the air was filled with swarms of Grasshoppers, flying in a southern direction. We may be thankful if the unpleasant weather of the past week has caused these troublesome vegetarians to seek some more congenial clime.

The Lead Mines of Wisconsin.

"The Mines are giving out," is the constant song of a few "croakers" in this neighborhood. "Hereafter," they say, "we must look to Agriculture for whatever of prosperity we may desire or expect." And they say truly that no section of the State will or can yield annually and certainly, better crops of any grain or roots. But it is time for these prophets of evil to withhold some of their vain prognostications and look at the present fact in relation to the mines. As one instance only, let us refer to the Linden Mines. These are situated some six miles west of us. The range consists of three parallel ranges, worked continuously for nearly a mile in length. Of these, the South range has already been proved to be 84 feet in width of solid mineral from 16 to 20 inches thick. The middle range has been proved to be 45 feet in width and of nearly the same thickness. The North range at the eastern extremity has not as yet been proved at all; but from what has been discovered in other localities, will doubtless be equally large.

Now, let us ask what Mines of Lake Superior or elsewhere, will compare with this. A solid sheet of Mineral 20 inches thick, 84 feet wide, and from one quarter to one half a mile in length. It is estimated that more than one million pounds of lead will be raised from this Mine alone during the present year. Truly that a cause for discouragement; and the country is full of such ranges. We have no patience with such croakers. Let them go north and cut logs and dig stamps, fight mosquitoes, and shake with the ague; and leave this Paradise of Wisconsin to those who know how to appreciate it.—Mineral Point Tribune.

Capt. Pope's Artesian Well Expedition.

The San Antonio Ledger of the 25th ult., furnishes the following notice of this expedition:

"Capt. Pope's entire party and materials arrived here on Tuesday last, and proceeded immediately to the San Antonio river, where they encamped for the few days necessary to complete the most perfect organization that ever started for the western plains. 'The following are the names of the officers, assistants, and attaches of the expedition: Dr. Kelly, surgeon and physician; J. M. Reed, J. Young, Robertson, H. Seindell, Stuart, Supple, and A. Earl, civil engineers; T. H. O'Callaghan, assistant naturalist; J. M. Brown, superintendent of artesian works; J. and W. Skidmore, J. Lehman, and P. Maguire, mechanics;—Marks and—Pickering, engineers."

"These, as nearly as we can learn, together with wagon masters, teamsters, cooks, and laborers, compose the corps operative of this great enterprise. His escort consists of twenty-five cavalry and seventy five infantry. We understand the captain will first proceed to complete the unfinished wells on the Staked Plain and Mesilla Valley, thence to the Jornada del Muerto, thence to the great emigrant route from Leavenworth to Santa Fe, and thence to the California desert."

Ladies Should Emigrate.

We observe from a late census that Massachusetts has an excess of several thousand females over the male population of that State. The recent census of St. Louis shows a disparity in the sexes of nearly 7000 in favor of males. By the census of Iowa, the males are in a majority of nearly thirty thousand. Other Western States are also showing large reinforcements of the fair sex. We believe that in Kansas the disparity is still greater than in the States.—Who can doubt from these figures that more ladies should emigrate to the West? Broken down political hacks have for years been in the habit of going West to secure position, and sometimes they meet with success. Sterling ability is always appreciated and rewarded in the tougher sex "out West," and we believe real worth in the fair sex equally sure of appreciation and reward.—These figures also indicate to our hundreds of unmatched lords of Kansas soil where they may no doubt profitably spend a few weeks of their leisure the coming fall and winter, and from what we can learn of intentions to go East, not a few of them may avail themselves of the rare chances offered. Feeling as we do a deep and growing interest in the prosperity of this our chosen home, we wish all having an eye in that direction the most abundant success, and shall not fail to speak a good word as to the general character of the young unmarried men of Kansas whenever occasion shall offer.—Lawrence Republican.

Ole Bull's Last Night in America.

On Wednesday Ole Bull, accompanied by his son, a youth of seventeen, sailed from this port in the steamer America. We saw him for a few moments on the deck of the vessel as she left the wharf, looking in much better health than he has appeared during the past year. He has gone to his beloved Norway, for which country he has the affection of a true son. We understand that the evening before sailing, he spent the hours at a friend's house with his violin, playing to a small company which had assembled to shake hands with him for the last time. It is said by those who were present that his delightful music never seemed more wonderful—that his soul never seemed more closely allied with his harmonies.

Till midnight he continued to draw forth his ravishing sounds, possessed as it were by the very Genius of Music. During the last piece he performed he seemed spell-bound, and continued to lay his fervently on his instrument, as if unwilling to end the strains. At last he ceased—it seemed as if the old Norse spirits had been whispering to him of his home. The earnest good wishes of thousands in America will follow this great genius in his native mountains.—Boston Traveller, July 31.

Gen. J. H. Lane had an appointment to speak at Atchison last week. About twenty Free State men went up from Leavenworth to hear him, and found about three hundred Missourians on hand, armed with all manner of warlike weapons, and swearing that Lane should not speak. Some of Jim's friends sent word to him, and prevented his coming to address such a meeting.—Not content with breaking up the meeting, the blustering ruffians turned their attention to insulting the Free State residents of the town.—Lawrence Republican.

Secretary for Utah.—John Hartnett, late Comptroller of the city of St. Louis, has been appointed Secretary for the Territory of Utah.

Fruit Trees.

The season for planting Fruit trees is rapidly approaching. It seems unnecessary to urge upon an intelligent community the importance of early attention to this subject; yet the history of every new country, furnishes an example of the procrastination, almost universal, in regard to planting fruit and shade trees. The farmer says: "I cannot spare the money this year; next year will do as well." Not so, my friend; this year is the best time you will ever have to attend to this matter. If you cannot plant a hundred trees, plant ten, plant one, but plant, and keep planting, it is certainly the best investment you can make. Deny yourself almost anything else, rather than the pleasure of seeing an orchard growing up around you; rather than not derive the profit which is sure to reward you.

As the Apple is the "great staple" with Horticulturists, I will confine the present article to the consideration of the time and manner of planting this tree, with a few remarks as to its general culture.

In this climate the Autumn is undoubtedly the best time to set out apple trees. The roots have ample time to adapt themselves to their new position, which they do by becoming hardened at the cut, or broken extremities; the earth has time to settle and become thoroughly packed about each root, and the tree becomes firmly fixed in its place and is ready to grow with the first opening of spring. Then, our trees must be brought from a distance, and from a colder climate, which cannot be done early enough in the spring.

Now is the time to prepare your ground for the reception of trees. The ground should be thoroughly and deeply pulverized for a considerable distance around each tree.

It is utterly useless to plant trees in the hard earth, only digging a hole just large enough for the tree, as you would for a post hole. Dig a hole from four to six feet in diameter, in proportion to the space occupied by the roots; and at least a foot deeper than you wish to plant the tree. This may be done during any leisure time, for weeks before you plant the tree. When you are ready to plant the tree, fill up the extra depth with the surface earth, making it very fine, then drive two strong stakes, large enough to last five or six years, one at the east and one at the west side of the hole.—Then place your tree as you wish it to stand, and hold it there, while another person covers the roots, and fills all the crevices about them with fine earth, being careful to place the roots in their natural position. Fill the hole level with the surrounding earth, and press it over the roots firmly. Secure the stock to each of the stakes by a strip of cloth or bark, and the tree is properly planted. Do not pour water around the roots, if the earth is properly pulverized, it is not only useless, but injurious.

In selecting trees get those whose growth has been steady, and the wood well hardened; this is of more consequence than the thrifty growth, to which the nurseryman will call your attention. Do not waste your money on trees of which you know nothing. Buy only of those who know what they have got, and will warrant them. Nothing can be more aggravating than to wait years for an orchard to bear, and then find that you have been nurturing nothing but natural fruit. A good tree, of a good variety of fruit, is worth all it will cost you, while a poor tree of an inferior kind, is dear at any price. Examine each tree closely, late in the fall before the ground freezes, scrape away the earth an inch or two deep, to ascertain if any of the enemies of the tree have deposited their eggs; if so, be careful to destroy them, and wash the whole stock with strong soap suds. This will remove the mould which often accumulates in nurseries, and also destroy the larvae of insects.

This washing should be repeated at least twice a year; it gives a smooth healthy appearance to the bark, and prevents that rusty, cracked appearance, too often seen in orchards.

If danger is to be apprehended from mice or rabbits, wind the stock with tarred cloth. If these directions are attended to you will in due time reap your reward.

HORTICULTURIST.

Gang Plow.

The Loda (Ill.) Garden State announces that a gang plow, invented by a Mr. Cravath, of that place, has been tried on the prairies there and works admirably. With three yokes of oxen, five furrows, each one foot in width, were turned in the most superior manner. The Garden State adds: "The success of this important undertaking is no longer in doubt. The gang plow does work! and Cravath will be counted among the Fultons, the Franksins, and the 'big fellers' generally. Mr. C. will soon solicit orders for this new and important implement."

Why the New Cents are Short Weight.

The Directors of the Mint say in explanation of the short weight in some of the new cents, that they are composed of materials never before melted together for coinage, and there is some difficulty in obtaining an invariably accurate weight. The difference is yet within the limits allowed by law. When the workmen become more experienced in the new manufacture it will be corrected. Forty-six tons have been coined since the work began, and the variations are trifling in view of the rapidity with which the coin has been issued. Every coin of gold and silver is tested separately by weight—a superfluous care in the small valuation of the cent.

Destruction of a Church by a Mob.

It is reported that Mount Carmel Church, in Alexandria County, Va., about three miles from Georgetown, has been pulled down and burnt by a mob. It will be recollected that it was at this church that the late unfortunate affair occurred, in which James Burch was shot by young Austin, the latter being a Sunday school teacher at the Church. It has not yet transpired whether or not this outrage has any connection with the one alluded to above.—The States.

The Paris correspondent of the London Court Journal, writes as follows:

"His Excellency Plenipotentiary Mason, having been reprimanded for throwing his arm round the back of the Empress Eugenie's chair, is making up his pack to fly to some retirement, where he means—so says report—to study the affinities, in order to behave better next time."

Farming in The West.

A farmer who lives at Port Byron, told us yesterday that he came to this country five years ago, with a family of nine and just seven dollars in cash, to begin with. He has now a farm of nearly two hundred acres of as rich soil as the sun shines on; good house, reapers, mowers, plenty of horses and stock, and "silver to spare." He will harvest this year a hundred and thirty-five acres of wheat, fifty of corn and about fifteen of oats. He will have several thousand bushels of grain, which will be worth, if there is an average yield and price, not far from five thousand dollars. During his residence in Rock Island county he has sold all his wheat at an average price of a dollar a bushel. This is only one instance out of the many, how farmers succeed in the West.—Rock Islander.

THE MARIPOSA GRANT.—We learn that a share in this famous estate, which is variously estimated as worth any amount, from ten up to twenty-five millions of dollars, has been purchased from Col. Fremont by Benjamin Wood, brother of the Mayor of this City. Col. Fremont left for California in the steamer which sailed yesterday, and it is the intention of the parties interested to render the grant in question as productive as possible. It comprises, as is known, the whole of Mariposa County, embracing over 44,000 acres of gold land, and including seven towns within its circumference.—N. Y. Times, 6th.

General Land Office.

It is understood that a Circular is shortly to be issued from the General Land Office, in which the whole system of pre-emption is to be discussed, and the principles upon which it is founded are to be explained in all their bearings. This will be an important document, and the more so because it has been so long needed.

NEW MATERIAL FOR BALLASTING RAILROADS.—Gravel or broken stone in many places it is difficult to get. Experiments have been made by the Ohio and Mississippi Railroad Company with burnt clay for ballast. The officers of the Road are satisfied that clay, properly burned with coal screenings, will prove the best, as it is the cheapest material. It raises no dust, and costs but 50 cents per cubic yard.—N. Y. Tribune.

SUICIDE OF A PRINTER.—A printer, lately from Hartford, Ct., named Geo. Kershier, committed suicide in Cincinnati, recently, by cutting his throat. Poverty and want of employment are assigned as the cause of the act.

Mike Walsh, late Democratic Senator from New York, says "that corner groceries are the nurseries of Democratic sentiment."

An Exchange replies that Mike ought to know.

ADVERTISEMENTS.

READ THIS! READ THIS!! IF, IF, IF, IF, IF you wish to buy a Claim, apply to E. P. BANCROFT.

IF you wish to sell a Claim, apply to E. P. BANCROFT.

PERSONS at the East wishing information concerning the country, or any kind of business here will do well to correspond with E. P. B.

CAPITALISTS at the East, who wish to invest in this Territory, will be guaranteed 12 per cent, and half the gains above that figure. E. P. B.

THREE THOUSAND SHARES SOLD IN THREE WEEKS!

A MAP OF KANSAS AND A SHARE IN SARATOGA CITY, consisting of Five Lots, with a chance of drawing the Principal Prize, Valued at \$10,000, FOR ONE DOLLAR!

The subscribers, in satisfaction of many shareholders, are induced to alter their original plan for disposing of Saratoga City, and have adopted the following: viz: Saratoga City has been divided into 500 Shares, each share consisting of Five Lots. There are three Springs, the largest Sixty by Seventy-five feet. These Springs will have Ten Acres of Land connected with them, and will constitute the principal prize, being valued at \$10,000. These Springs are worth a fortune to the person who draws them. The water that discharges from them would supply a large city; and is pure, cold and sparkling, and possesses mineral properties which must render this city the Saratoga of Kansas. These Springs constitute one of the Five Hundred Shares.

There will be 10,000 Certificates issued, and each holder of a Certificate will draw a MAP OF KANSAS, WORTH ONE DOLLAR! or ONE OF THE FIVE HUNDRED SHARES IN SARATOGA CITY!

The location of Saratoga City. Saratoga City is located in Calhoun co., in Sec. 22, Township 18, Range 15—about 14 miles North of Topeka; 16 from Tecumseh, 25 from Leocompton and 35 from Lawrence; is adjoining the Potawatomi Reservation (30 miles square) which will soon be open for pre-emption.

10,000 MAPS! We are happy to state that one of our most respectable Land Agency firms are engaged in getting up the most authentic Map of Kansas that has been forwarded. This Map we have engaged 10,000 copies for the first edition! We can now supply a beautiful colored Sectional Map of Kansas to those who do not wish to wait until the map is published.

Plan Suggested for the Distribution. It has been suggested by a shareholder that 10,000 Envelopes be procured, and into 9,500 of these a slip of paper or card be inserted, with the words: "This Card entitles the holder to a Map of Kansas, which can be obtained by forwarding this Card to the Committee appointed to receive it," and into 500 of the Envelopes a slip or card be inserted, with the words "This Card entitles the holder to a Share in Saratoga City, which can be obtained by forwarding this Card to the Committee appointed to receive it." The Envelopes to be sealed and to be precisely alike—then to be indiscriminately mixed together, and numbered from No. 1 to No. 10,000, and those persons holding Certificates, by forwarding them to the Committee appointed to receive them, will receive the numbered Envelope which corresponds with the number of the Certificate which they forwarded to the Committee, and which will exhibit to them the result. This plan will probably be adopted, as it will guard against imposition.

THE DISTRIBUTION Will take place as soon as the Maps are ready, about the 15th of November.

Land and Land Warrants taken in exchange for shares, and a liberal discount allowed those who purchase by the quantity.

AGENTS WANTED In every city and town in the Territory. Inducements will be offered which will warrant attention to this enterprise.

AGENTS WANTED In every city and town in the Territory. Inducements will be offered which will warrant attention to this enterprise.

Steam Fire Engines. MILL MACHINERY, PRINTING PRESSES, Iron Fronts, Columns, Gutters, Conductors, Window Lintels and Sills, Mowing Machines, Thrashers, and Little Giant Corn Mills, furnished to order by ALLEN & GILMORE, Cor. Mass. & Winthrop sts., Lawrence, June-1y.

Flour and Bacon. FLOUR and Bacon for sale in Emporia by N. S. STORRS.

WE are Agents for FORMAN'S CELEBRATED FLOURING MILLS, manufactured at Cincinnati. PLUMB & McCLUNG.

Scales! Scales! Scales! COUNTER and Platform Scales of all sizes, and patterns furnished to order by ALLEN & GILMORE, Cor. Mass. & Winthrop sts., Lawrence, June-1y.

BLACKSMITHING. J. B. COX.

HAVING established himself in the above business at Emporia, would announce to the people of the surrounding country that he is fully prepared to do all manner of work in his line of business, in the best manner. He flatters himself that with his long experience at the business he will be able to give the fullest satisfaction to all who may favor him with their patronage. His prices will be reasonable. Emporia, August 1, 1887.—4

Plows! Plows! Plows! WE call special attention to the following advertisement, from which it will be seen that we are the only agents in Kansas, for the sale of the Celebrated Moline Center Draft Plow. We have sold several hundred of them this season, and all give perfect satisfaction. ALLEN & GILMORE.

John Deere's Moline Plows in Kansas! ON the opening of navigation in the spring, I shall send to Messrs. Allen & Gilmore, Lawrence, K. T., a large assortment of Brokers of all especially of my extra Two-Horse Moline Board Breakers, which has received the highest commendations from all who have used them; also a great variety of Stirring, or old Ground Plows, among which I would mention the Improved Clipper No. 4 or 5, each steel Plow, and the Michigan Double or Subsoil Plow, which should receive the special attention of those who wish to raise a crop the first year. I have made some improvements on this plow from last year, and I believe it is now perfect to use. It is a double and single Share Plow, Rolling Cutters and Claws, Gauge Wheels, Truck Wheels, and other Plow fixtures. The quality of the stock used in my plows is not equalled by any establishment in the West, and the plows are finished in a very superior style. Having been engaged for eighteen years in the manufacture of plows for use in the Western States entirely, I can confidently say to emigrants from the Eastern States, that these plows will clear and plow perfectly in any soil in the Mississippi Valley. All orders addressed to ALLEN & GILMORE, Lawrence, K. T., or to me at Moline, Rock Island Co., Ill., will receive prompt attention. JOHN DEERE, June-1y.

E. B. Kirkendall, PRACTICAL SURVEYOR. Office—Four miles west of Emporia, Kansas. June-1y.

A. J. BAKER, Attorney and Counsellor at Law, AGNES CITY, KANSAS TERRITORY. Will practice his profession and collect debts in all the Neosho River counties. Office 375 Residence at Agnes City, eight miles East of Council Grove, on the Santa Fe Road. Agnes City, July 25th, 1887.—4.

EMPORIA HOUSE, THE EMPORIA HOUSE has changed hands, and is now ready to receive a home for all who may visit the Neosho Valley. N. S. STORRS, Proprietor, has been for many years engaged in public business, and will do as well for the public in the future as he has done in the past. N. S. STORRS, Emporia, Kansas, July 18-4 Proprietor.

J. V. RANDOLPH, EMPORIA, KANSAS. Holds himself in readiness to attend to Surveying in all its branches. June-1y.

DAVID A. POWELL, Steam Engine and Boiler Builder, Butler St., bet. Congress and Front, Cincinnati, O. All sizes of Portable Circular Saw Mills, Cast Iron Water Wheels, for Saw and Grind Mills, Saws, Grind Mill Irons, Planers, Lathes, Boring Mills, Upright Drills, Screw Cutters, etc., made to order. Second hand Engines and Boilers for sale. June-1y.

BURLINGAME HOUSE.

BURLINGAME, (LATE COUNCIL CITY) KANSAS. GEORGE BRATTON, Proprietor. This House is now open for the reception of Travellers and Boarders. Terms reasonable. June-1y.

INSURE! THE undersigned is Agent for the Union Insurance Co., of Janesville, Ia., and is ready to effect Insurance against loss or damage by Fire, Lightning, Tornado and Hill, on Buildings, Grain, Cattle and Horses. P. B. PLUMB, Emporia.

G. M. WALKER, Surveyor and Civil Engineer, Lawrence, Mo., Jan. 1887. Emporia, Kan. Is prepared with superior instruments to lay out town sites, to plain surveying, levelling, mapping and draughting. Bridge Plans and Bills made to order. July 18-4.

Boots and Shoes. A LARGE and complete stock in store and for sale by N. S. STORRS, Emporia.

LAND AGENT. JOHN B. WOOD, respectfully gives notice that he continues to carry on the Land Agency business at Lawrence, Kansas Territory. All business entrusted to him shall be attended to with fidelity and dispatch. Lawrence, June 6-3m.

BOOKS, STATIONERY, & O. WILMARTH, LAWRENCE, KANSAS.

WOULD inform his friends and the public generally, that he keeps on hand as good an assortment of articles in the above line as found in the Territory, consisting of School, Children's and Miscellaneous Books; also, Blank and Memorandum Books; Writing Books, Slates, Pencils, Musical Instruments, Musical Memorabilia, etc. HIS CIRCULATING LIBRARY is supplied with some of the most popular works published, and is constantly receiving additions from the East June-6-4.

C. V. ESKRIDGE, GENERAL LAND AGENT.

ALSO Agent of the Emporia Town Company. TOWN SHARES bought and sold—Lots donated to the town, and a certain amount of improvements on them. Declaratory statements for Pre-Emptors made out, and all business in relation to pre-emption promptly attended to. Claims bought and sold.
