You folks in and around this town should read the advertisements in your home papers. Do you want the stores to shut up shop and quit business? Do you want this community to lose half its population? No. Well, then, do not buy goods out of town by mail. Boost for your home town. Some of you pore over the advertisements of foreign concerns and then send a lot of money to out of town merchants. You are lead to do this very largely by the clever advertising of these merchants who employ experts to attract your attention.

Give your home stores a show—a plain square deal. Give them a bearing by reading what they have to offer in their advertisements. We all admit that the old-fashioned advertising is mighty poor reading, and I am trying to bring the merchants in the smaller towns all over the country to realize this. I am trying to bring all of them to see the value of using the pages of their home paper to tell you folks what they have to sell and the prices they are asking.

When you read in the weekly paper that So-and-So's store is headquarters for dry goods, you have not been much enlightened about the business. You have known this store for a long time, and every time you observe their advertisement they are claiming to be headquarters but never tell you any good reason for the assertion. I am hoping this merchant will wake up and tell you what he is doing. Watch the paper for he may tell you about those attractive new waists he has just received. Ten chances to one they are better waists than you can buy out of town for the same money. If you will make the comparison you are very apt to find that they are better bargains than those offered by Cashin-Advance & No Return of Goods & Company.

Read the advertisements in your home paper. Keep in touch with the people who pay taxes in this town and are a part of your community, and who are doing what they can to help give commercial service.

Why will some of you people believe everything you read in the catalogue and doubt the statement of your home merchant? Well you knew, a prophet is not without honor save in his own country, and Barnum said that the American liked to be humbugged. There is a large grain of truth in both these assertions.
