Died of Apoplexy.
A special to the Minneapolis Journal from New Richmond, Wis., says: C. P. Batchelder, died suddenly this morning of apoplexy. He was about 33 years of age, and a prominent Knight of Pythias. He leaves a wife and four small children. His body will be taken to Menasha, Wis., where his parents reside. He was a traveling man and made this city his headquarters.

"Batch," as he was familiarly known in this city, and his family had many friends. He only moved from this city to his new home at New Richmond about three or four months ago. He at one time traveled for the Hutchinson Wholesale Grocer company, and then for the Hutchinson Salt works. Securing a job with a Chicago queensware house of Chicago, he moved to Wisconsin, so he might be at home of tiner. Mrs. Batchelder will have the sympathy of many friends in this city by whom she was highly esteemed.—**News.**

Obituary.
Joseph Reeson, born May 8, 1833, died May 5, 1895, aged 61 years, 11 months and 28 days.

Thus are the early settlers of Reno county quietly passing away.
Born in England in 1833, he with his parents emigrated to America and located in Will county, Ill., in 1842, at which place he resided until 1875, when he removed to Hutchinson, where, with the exception of about two years passed in Rush county, has been his continuous residence up to the time of his death.

Uncle Joe, as he was familiarly called by all who knew him, was at one time possessed of considerable wealth, but like many other of our citizens who had too much faith in boom prices was forced to give up all of his possessions to make good some bad investments.

To those who knew him well he was a kind and true friend, especially to the poor was he kind and generous, giving freely, when he had it to give, to relieve the wants of those in needy circumstances. He leaves a widow and two step-sons, who have our sympathy in this their sad bereavement.
A FRIEND.

Two Curable Deformities.
The hollow in each side of the neck just above the collar bone is a deformity which could be easily cured. It is occasioned by allowing the chest to sink and not breathing properly, and is not the result of advancing age, as generally supposed. Another deformity, seen more often in women who have passed the age of forty, is what is sometimes called a "web" chin. This lumpy, useless formation may be avoided altogether, or reduced if not of too long standing. The prevention lies in the exercise of the muscles of the throat and in breathing correctly. The cure, or reduction, is effected by prolonged and regular exercise of the throat muscles and by massage.—From "The Bones and Muscles: Their Relation to Symmetry and Deformity," in Demorest's Magazine for June.

The Senate.
Today the case is different. The senate has become not only a clog in the wheels of legislation; it is a veritable agent of national corruption as well. Most of us are reluctantly losing our respect for an assembly which acts alternately as a tool of special legislation, as an obstruction to popular demands, and as a "Rich Man's Club."

At present the senate does little else than multiply the chances for spoils-hunting, and in a general way add to the alarming array of political crimes annually perpetrated upon the long-suffering American public. It must be understood that the objection to the prevailing millionaire senator is not his wealth in itself, but his lack of statesmanship, of expert knowledge, of enthusiasm for the public good. How can a man who has made his fortune by special privilege be expected to legislate impartially? The same popular odium attaches to poor men who are pushed into the senate from the lobby to look after certain interests, as the phrase is. Their conduct is outlined for them at the start; their policy is mortgaged, and they simply pay the interest on their borrowed capital by voting as they are told.—W. D. McCrackan, in June Lippincott's.

Strayed.

DISEASE OF WOMEN
Will be Treated Free by Dr. Hartman During the Summer Months.

"Female disease" is a term which has come, by constant use, to be applied to all of that very distressing class of affections which are peculiar to the female organism. At least three causes should be recognized. The cause which is perhaps most frequent is displacement of the womb. The second cause is congestion of one or more of the pelvic passages. The third cause is known as inflammation or ulceration. Per-na should be taken in tablespoonful doses before each meal in all varieties and stages of the disease. This dose should be gradually increased after several weeks' use of it to two tablespoonfuls. Vaginal injections should be taken three times each day, two or three quarts at each injection.

Any woman wishing to become a regular patient of Dr. Hartman should send name, address, duration of disease and symptoms at once, and specific directions for every detail of her treatment will be promptly sent. The doctor will direct every item of the treatment free of charge. The patient can obtain the necessary medicines at the nearest drug store, and every patient will be expected to report once a month. This gives every woman in the United States a chance to receive the benefit of the extensive experience of this renowned physician in all forms of female diseases.

Book on female diseases sent free by The Per-na Drug Manufacturing Company, of Columbus Ohio.
