A movement is on foot to stock Arizona with Chinese pheasants. The birds have been successfully introduced in the Puget Sound country and it is thought that they will also prove a success in this territory. The birds are of a good size, being fully as large as a prairie chicken, of a good game flavor, and a game bird in every sense, running swiftly and flying like an arrow.

It is a Budapest chemist who originates the most scientific way of making every burglar his own witness. He proposes to pack the hollows in safe doors with a perfectly harmless aniline color in the form of a dry, fluffy powder which blows around on the slightest excuse, and which will stain the nefarious gentleman burglarizing that safe a beautiful light blue, warranted not to wear off for a month.

The Agua Fria and lower Lonesome valley section was visited by a terribly heavy rain storm last Wednesday evening. Two exceedingly unique and amusing documents can be seen among the records in the courthouse at Tombstone. One is a complaint charging the defendant with using vile, abusive and opprobrious "epitaphs" toward one John Smith. The other is a bond given by a party to whom a contract was awarded for burying the indigent dead, and starts out as follows: Whereas, I have this day been given a contract by the board of supervisors of Cochise county, Arizona, for burying the "indignant" dead, etc. The dead have never been interviewed in the premises, but it is safe to say that they were justly indignant if buried by such hands.—Prospector.

A letter was received from County Assessor Frank Luke, who is at Los Angeles, saying that his brother John, who submitted to a surgical operation there, was improving rapidly and that he would be able to be about within ten days. A curious thing about it is that though the Luke brothers have been almost constantly together for several years the county assessor knew nothing of his brother's affliction until recently.—Republican.

The announcement of Joseph I. Roberts appears in this issue as a candidate for sheriff, subject to the action of the republican convention. Mr. Roberts was one of two republican candidates elected at the last election, and as he has performed the duties of his office in a faithful, conscientious manner and as there seems to be an unwritten law in this county that an official who does this is entitled to re-election, Mr. Roberts enters the campaign under favorable auspices. With the present feeling which exists throughout the county the prospect for the success of the republican ticket at the polls was never better.

The biggest flood ever known in the history of Silver City, N. M., and one which did great damage on Sunday night was the result of a cloudburst in the mountains above that city. No lives were lost, but many narrow escapes were had and fifty homes were completely washed away. As the flood came early in the evening every one was warned in time to escape. The Santa Fe railroad was washed out in many places and seven bridges are out between Silver City and White water. An arroyo twenty feet deep and a hundred feet wide runs through the town and this was overflowed. Goods were damaged in many stores.

She was brought to Mercy hospital where the bullet was removed. The wound is a very dangerous one and may yet result in the accomplishment of the end intended by her.

The story told by the Tucson Star, of Thomas Grindell's trip to Tiburon, differs very materially from the hair raising story published in the Examiner and is tame in comparison to it. According to the Star, Mr. Grindell reports the Seri Indians, who inhabit Tiburon, to be a very inferior race and perfectly harmless. If they have fish and oorn they are well satisfied. There are about thirty of these Indians on the Island of Tiburon, whose sole occupation is that of fishing. Their only domesticated animal, according to Mr. Grindell, is the mud turtle. The island, he says, is a desolate waste of sand and rock with little or no vegetation and no evidence of mineral, notwithstanding the exaggerated reports to the contrary. The tales told of the richness of the island are absolutely false. The west coast has been extremely dry until the past two weeks when ample rains have fallen.

Ed. S. Wright makes announcement in this issue of his candidacy for county treasurer, subject to the action of the county democratic convention. Mr. Wright has served as deputy treasurer for a number of years and is thoroughly familiar with all the duties of the office. He has been courteous and obliging in the position which he has so successfully occupied and there is no doubt of his competency. The only weak spot about him is his democracy, which of course will preclude the Journal-Miner from assisting to elect him.

Dr. John Dennett, of Congress, has been appointed administrator of the estate of the late A. L. Sroor, of Congress. The appointment was made at the request of the widow of deceased. Dr. Dennett has qualified as administrator by filing a \$30,000 bond with F. M. Murphy and Wallace Fairbank as sureties.
