Mr. Mayhew is in business, and he speaks of the old time price prevailing and that there are no accommodations worthy of the name. Moore, and report having had a most delightful time viewing the wonders there. They had a correct idea of seeing the canyon as they remained there a week. It had been arranged to have Mr. Moore's nephew and niece, George and Blanche Moore meet them at Williams and visit the canyon with them, but on account of the railroad washouts they were sent around via El Paso and arrived in Prescott last Wednesday during their absence. The latter will remain here during the winter.

Instead of the registration of voters falling below what it was two years ago it promises to be greater. When Recorder Farley closed his office at midnight he had enrolled 5,032 names on the great register. At the close of the office at midnight two years ago there were 2,801 names on the register, those coming in during the few days following but which had been registered during the legal time and which were placed on a supplement, swelled the total registration to 5,320 and the probabilities are that the lists received during the next few days will undoubtedly increase the number to more than that of two years ago. A feature of the registration is the large number registered from Prescott, the number amounting to 1,691, which is certainly a good indication that the town is not retrograding.
