

# WHALED BY WIFE, SOAKED BY THE COURT

(From Tuesday's Daily)

The following will be of interest to many Prescott residents who knew Frank Coon, a stalwart, good looking bartender and who was for a time part proprietor of the Windsor saloon. Mrs. Coon was before her marriage an employe of the millinery store of Mrs. Mollie Evans.

"Shades of Carrie Nation! Here is a woman who believes in the club cure for men who beat their wives! She has been upheld by a court, too.

"Her name is Mrs. Myrtle Coon, wife of Frank I. Coon, a bartender. Mrs. Coon recently entered suit against her husband for maintenance. When the case came up before Judge Bordwell, the defendant introduced evidence to show that his wife thrashed him. He thought this would mitigate the numerous charges against him. Ordinarily it might, but when Judge Bordwell heard Mrs. Coon's reasons he not only decided in favor of the woman, but ordered her husband to pay her a monthly allowance of \$25.

"Mrs. Coon testified that the only time she ever pummeled her husband was when he struck the first blow. She made no effort to excuse herself for giving her husband the same medicine he attempted to administer to her.

"I admit that I thrashed my husband," Mrs. Coon told the court. "He choked and beat me, though. My advice to every woman is that she whip a man within an inch of his life every time he strikes her. Any man who will beat a woman deserves anything that she has a mind to give him."

"Mrs. Coon does not believe a woman should hunt a club every time a difference springs up in the household, however. She advises the strenuous remedy only when the man starts the game.

"Judge Bordwell heard the evidence in the case and withheld his decision until yesterday. He wanted time to reflect. In the interim of twenty-four hours he decided the woman did perfectly right and rewarded her for it."

# ELKS ENTHUSIASTIC OVER ANTLERED SPECIAL TO LOS ANGELES

(From Tuesday's Daily)

Although the movement for the formation of an Elks' reunion club to attend the meeting of the Supreme Grand Lodge of the order in Los Angeles, July 13, 1909, was only officially launched last Wednesday, A. A. Johns, secretary of the club, announced last night that he had already received more than enough applications from members located out of town to justify him in hiring one Pullman car for the trip.

Applications are now coming in at the rate of from three to five a day and the members are so enthused over the prospect of a real genuine good time on the trip that he believes he will be able before the end of the year to engage an entire special train of Pullman cars for the trip.

# WEATHER STATIONS FOR NORTHERN ARIZONA

(From Sunday's Daily)

L. M. Jesunofsky, inspector of the weather bureau service, passed through here last night on his way home to Phoenix from an extended official tour, embracing all the principal points of Northern Arizona, from Wickenburg to the Grand Canyon.

Jesunofsky says that he will soon have stations all over Northern Arizona where correct records of the rain and snow falls will be reported and kept. He also intends to establish stations to find the flow of the different rivers and streams at all seasons. The department, according to his statement, is paying special attention to the latter as numerous inquiries are received daily concerning the agricultural and grazing possibilities and conditions of the territory. With such data gathered, he says, farmers will settle in the Big Chino, Little Chino and other valleys of the north and develop water resources, which he is confident will prove sufficient to justify the cultivation of these immense tracts of land on a large scale.

# AGUA FRIA BRIDGE TO BE PUSHED TO COMPLETION

(From Sunday's Daily)

Chairman Smith of the board of supervisors, Supervisor Harrington, Ar-

chie Grant and William Stowell will leave Monday for Dewey to commence the building of a new bridge over the Agua Fria river at that place. Grant will have charge of the work, with William Stowell, pile driving foreman. It is the intention to rush the driving of the piles and building of the bridge as rapidly as possible. The greater portion of the material for the structure is now on the ground. Work was delayed until the close of the rainy season as it was deemed advisable to wait until all danger from floods was passed.

The main span over the river will be eighty feet in length. It will be twenty-four feet above the bed of the river and will be anchored to both banks by two cables. The bridge will be several feet higher than the old structure destroyed by last year's floods.

Residents of Dewey have volunteered to deliver the material at the site of the bridge from the railroad station, free of charge. The railroad management has furnished the material at cost, thus reducing the expense of construction several hundred dollars. The rebuilding of the bridge will mean much to the farmers and fruit raisers of the Verde valley as well as to the miners and mining companies operating in the Cherry Creek and Black Hills districts as almost the entire product of the lower portion of the valley and all machinery and supplies for the mining districts are hauled over it to and from Dewey, one of the most important stations on the Bradshaw Mountain railroad.

The bridge over Granite Creek immediately south of town was opened to traffic last night. With the exception of the roof, which will be thirteen feet and four inches above the floor, the structure is finished. Chairman Barney Smith of the board of supervisors, who superintended its construction, with George Sines, the contractor, were the first to drive over it. W. J. Mulvenon was the first to drive over it from the south. His horse stopped on it but was urged to cross by its master.

The bridge is 89 feet in length. It is built fifteen feet north of the site of the bridge carried away by one of the July floods and seven feet higher. Bridge experts who have examined it say that it is high enough to be out of danger of any high water and substantial enough to last for a generation.

# TAFT HAS TOUGH JOB ALREADY STAKED OUT

WASHINGTON, Aug. 29.—The next president of the United States is going to have "congress on his hands" with a vengeance. Both parties are pledged to immediate revision of the tariff and Judge Taft is specifically pledged, in the event of his election, immediately upon his inauguration to call an extraordinary session of congress to begin work on constructing a new tariff law. The extra session probably would begin not later than the 20th of next March. Even with the preliminary work now under way, it would be well along in the summer and probably fall before the measure was ready for the president's signature. Even if a republican president and a republican house are elected, there is such a difference of opinion among republicans as to how far tariff revision should extend that the job is going to be a difficult one. The election of a democratic house or a democratic president or both, with the senate remaining republican, would make it all the harder.

The session to begin the first Monday in December of next year will be the regular "long session" and an accumulation of matters that were passed over last winter will make it unusually long. As is always the case, as little business as possible was done on the eve of the presidential election; and as there were more of them last winter than ordinarily there will be unusual work for the next long session. In addition to this accumulation, the matter of currency reform will likely be taken up at the second session of the 61st congress. The commission provided for in the Aldrich bill is now in Europe and has interviewed the Rothschilds, the Bank of England governors, and other old world financiers. It probably will be ready to report by December of next year, and the legislation expected to follow will be even more difficult than revision of the tariff. The country still has a fresh recollection of how hard it was to pass the Aldrich bill, which provided only a temporary arrangement for giving elasticity to the currency. When it comes to a complete change in the financial system, there will be as many minds as there are men in congress.

# FORTY FOOT LEDGE UNCOVERED IN HOATSON

(From Sunday's Daily)

An important news item of the Warren district is the announcement made by General Manager Powell to a Bis-

bee Miner representative of the biggest find yet made by the Superior & Pittsburg. A body of ore forty feet in width has been opened up on the 1300 level of the Hoatson mine on the Del Norte claim and although no report of assays has been made public, it is understood that the ore is of excellent grade and the outlook for a very heavy tonnage from this body is said to be very good. Rich ore has been struck recently in the Hoatson claim owned by the Copper Queen company and on that side the ground will be explored from the Lowell shaft. Further information regarding the new strike in the Hoatson will be made public in the near future.

The Junction is rapidly approaching the stage where it will be classed among Bisbee's great mines. The 1300 foot level is showing up extremely well, all workings being in ore. The last samples from crosscut No. 23 on this level averaged 19 per cent, the best average yet obtained on this level. The crosscut is the richest working in the mine. In almost every instance the formation in the different workings on this level consist of a porphyry and lime and pyritic limestone.

This week work was resumed on the 1400 foot level drifts 1 and 2, after a week's delay on account of the heavy flow of water. A streak of sulphide has appeared in the breast of No. 2 drift with good indications of large quantities of ore. The face of No. 1 is in leached material.

The 1500 foot station has been begun and the work is progressing nicely. When the station is completed pumps will be installed, including a crank and flywheel Prescott of the same size as the two recently installed on the 1000 level, where the main pumping plant is located.

The Superior & Pittsburg properties are at present shipping about 100 cars of ore to the C. & A. smelter at Douglas weekly, and the shipments will be increased as soon as the smelter is enlarged to accommodate the ore.

The Calumet & Arizona company continues operating along the same lines as for some time in the past. Shipments continue to be twenty and twenty-five carloads daily. No great amount of new work is being done.

The Copper Queen company is busily engaged in preparing for the use of the new ore handling system. In almost every mine work is being done towards widening the drifts to permit of the operation of electric trains to haul ore to the Sacramento shaft, where it is raised by the Skip system and loaded in the cars by a conveyor belt system. The new ore handling device is being used at present, but only one of the two skips is used to raise the ore on account of only one ore bin being completed on the 1200 station from where the ore is raised. This ore is being shipped to Douglas daily. The ore handling system is being used for a short time every day until everything is finally arranged to run perfectly. About eight cars are loaded daily and shipped.

There have been no new developments at the Shattuck, Denn or Swelverine properties this week.

# AWOKE IN GRIP OF DEADLY SKUNK

(Continued from Page One.)

face and imbedded its teeth in his forehead. He grasped it with both hands and crushed it to death while still hanging to his face. After releasing his death hold he found it to be a small striped skunk, generally known as the hydrophobia species. He does not anticipate any bad effects from the bite, but intends to submit to the Pasteur remedy as a precaution against future complications.

Scantling is a hunter and trapper. He showed the scare of many bites of different wild animals last night to a group on the train, all of which are needed. He stated that this is the first time he was ever bitten by any member of the many skunk families, although he had trapped and killed several. He came here from Kansas a few months ago.

As a proof of his prowess in trapping bounty animals he deposited the scalps and hides of twenty-four wild cats, twenty-two coyotes and two raccoons with Clerk Peter of the board of supervisors yesterday. He also filed his demand for the bounties amounting to \$142.50, which will be paid by the board today to assist in defraying his expenses to the Pasteur Institute.

Other contributions to the supervisors' collection of bounty hides received yesterday were the outer covering of nine wild cats and five coyotes from Cal and W. L. Greer and one wild cat from Charles McNary of Walnut Grove, who is here on business accompanied by his brother, James McNary.

Mining location notices for sale at the Journal-Miner office.

# FABULOUS FLOAT PICKED UP IN WEAVER

(From Tuesday's Daily)

After his arrival here yesterday from Congress Junction, from where he shipped a carload of rich sulphide ore Sunday to the El Paso smelters from the "Sixty-five" mine owned by the Mildred Gold Mining Company, Dan B. Genung was informed by telephone from his brother, George Genung, that the latter had picked up several pieces of rich quartz, almost half gold, on a parallel vein to the one from which the carload of ore was mined. George Genung says that one of the rich pieces of float carried over \$20 in gold.

Dan Genung has a small tin box filled with specimens found two weeks ago on the apex of the vein where the rich find was made by George Genung yesterday. Some are almost pure gold and others are gold and quartz. He is confident of finding a very rich stringer of ore on the claim, as the pieces found indicate coming from a quartz ledge. He presented John Duke with a ten-pound sample of the sulphide ore shipped which samples \$200 to the ton. Duke will have the rich chunk on exhibition at the territorial fair with Yavapai county's mineral exhibit.

The Sixty-five claim is one of a group of five locations owned by the Mildred Gold Mining Company on the west slope of Rich Hill from the summit of which almost a million dollars' worth of gold nuggets was mined in the latter 60's.

It is opened to a depth of 80 feet by a shaft from which drifts are being run on the ledge each way. Sinking will be resumed as soon as the returns from the carload shipment made Sunday are received.

Dan Genung is general manager and a large shareholder of the company. He placed a block of stock owned by him among his friends here yesterday.

# JEROME CONFIDENT OF WINNING BIG TUG

(From Tuesday's Daily)

Constable Charles King lodged in the county jail here Sunday night Jack Donnelly, sentenced to serve thirty days in the county jail on the charge of petty larceny by Justice of the Peace Adams of Jerome. Donnelly, who is alleged to belong to the bobo class, was caught in the act of tapping the cash register in the turf saloon in Jerome. He was only a few days in the Copper City when arrested for the attempted theft.

Constable King hopes to have the giant Jerome team here on the cleats Labor Day contesting in the tug of war. He says four of the six men were members of the all nation team that carried away the tug of war prize in Butte, Montana, a few years ago. He met the tug of war committee here Sunday night and discussed some of the rules governing the contest. The rules were gone over so that no disagreements are looked for on the day of the contest. It was agreed between the committee and King that in case any of the cleats were broken that the pull would be declared off until the cleat is replaced.

Constable King is almost fully recovered from the wounds received in the recent cutting affray in a Jerome saloon between Spaniards and Mexicans in which nine men, including King, were more or less dangerously wounded. The others are recovering fast from their wounds.

# BUSINESS CHANGES.

(From Tuesday's Daily)

Timmerhoff, the druggist, is now moving into the new store specially fitted up for him in the quarters formerly occupied by the postoffice. The place has been entirely remodeled and renovated the fixtures are new and attractive, and altogether this drug store will be one of the modern business concerns of the town. The quarters vacated by Mr. Timmerhoff will be occupied by H. W. Laskey, the clothier, and his establishment will be known as "The Hub." Mr. Laskey, as was his custom when in business before in Prescott, will make a specialty of the finest qualities in men's clothing and furnishings, and his leader will be Alfred Benjamin's clothing, recognized everywhere as the best in the United States.

# The Social Mirror

Social interest for the past month has been centered in the wedding of Lieutenant Ralph Rigby Glass, of the Twenty-first Infantry U.S.A., and Miss Helen Frances Burmister, the only daughter of Mr. and Mrs. Robert Henry Burmister, which was celebrated last evening in the Congregational Church. It was a large and fashionable affair, with all the brilliancy of a military marriage. The church decorations were beautiful and elaborate, consisting of greens and quantities of Shasta daisies, while service flags lent their brilliant colors and graceful folds in carrying out the artistic arrangement. A very pretty sentiment has been carried throughout Miss Burmister's engagement days—that of the Shasta daisies which was her class flower, and was the flower used in profusion at her engagement announcement party, and then last evening formed the scheme of decoration at her wedding.

It was a beautiful church wedding with nothing wanting in the way of decorative effect. The altar was banked with California peppers and Shasta daisies, and the general effect was of white and green arches. Professor Grunn of the Conservatory of Music at Phoenix, officiated at the organ during the evening. Long before the lovely bride made her appearance the church was packed with beautifully gowned matrons and maids with their escorts; and all of the army officers stationed at Whipple in their striking full dress uniform.

Company F of the Twenty-first Infantry of which the bridegroom is the second lieutenant, attended the church ceremony in a body and all in their full dress uniform.

When the strains of the Lohengrin wedding march sounded throughout the church, the ushers led in the bridal procession. First came Laurence Keller, then Orleans Longacre, Jr., and Harry Leland. Miss Florence Herndon followed, and then came Miss Olive Fisher and Miss Lila Hawkins. Preceding the bride was the maid of honor, Miss Winnifred Fredericks. All the maids were most becomingly gowned alike in white chiffon over green silk, and carried baskets of Shasta daisies and maiden hair fern.

The bride's gown was of white tulle chiffon over white satin, trimmed with quantities of beautiful Princess lace. Her flowing tulle veil was crowned with orange blossoms and she carried a shower bouquet of lilies of the valley. Very handsome and stately did she appear leaning on the arm of her father, who gave her into the keeping of the bridegroom.

On account of the absence of the Reverend H. B. Lathe, the pastor of the Congregational Church, the Reverend Coates, of Phoenix, was the officiating clergyman.

The bridal party was met at the altar by the groom and his best man, Lieutenant Charles Sherman Hoyt, who was a classmate of Lieutenant Glass at the West Point Military Academy. Both the officers were in full dress uniform.

The reception given at the bride's home immediately after the ceremony was a merry affair and was attended by all of the more intimate friends of the popular couple.

Mr. and Mrs. Glass received their friends standing in the bow window of the large living room, beneath an arch of Shasta daisies and foliage prettily combined, and in the middle of the arch was tied a large white tulle bow.

The wedding supper served in the living room included the bridal party and the family of the bride. This room, which was beautifully decorated in white and green, resounded in toasts and earnest wishes for the happy couple. Other guests were served in the dining room.

Immediately after the wedding supper the bride appeared in her traveling gown, which was a very stunning tailor made gown in the latest mode shade. Lieutenant Glass and his bride left on the Coast Limited for their honeymoon which will be passed in Southern California, and upon their return will be at home at Whipple Barracks.

Miss Burmister has been one of Prescott's most popular society maids, and has been extensively feted since her betrothal. Her popularity was further attested by the splendid display of costly and beautiful wedding gifts.

received the high score prize for the ladies, which was a very pretty hand-painted plate; Mrs. R. E. Sloan received the second high score prize, a silver sugar spoon, and the ladies' consolation, a pretty deck of cards, went to Mrs. Fred W. Foster. Mr. E. A. Kastner received a very handsome silver desk set for the high score; Mr. Leslie B. Larimer was awarded one of the late novels for the second high score, and Mr. Hugo Richards received a deck of cards for the consolation. Major and Mrs. Walcutt's guests were Judge and Mrs. R. E. Sloan, Major and Mrs. Fred W. Foster, Mr. and Mrs. Hugo Richards, Mr. and Mrs. Edward A. Kastner, Mrs. H. D. Aitken, Mrs. J. J. Hawkins, Mrs. Dixon Fagerberg, Mrs. Edward A. Sturges, Miss Belle Boyes, and the Messrs. G. E. Meany and Leslie B. Larimer.

Mrs. Fred W. Foster entertained the Whipple Bridge Club very delightfully on Tuesday afternoon at her home at Whipple Barracks, and had as her guests Mrs. R. E. Sloan, Mrs. C. C. Walcutt, Jr., Mrs. J. J. Hawkins, Mrs. Putnam, Mrs. H. D. Aitken, Mrs. Edward A. Sturges, and Miss Harriet Jean Oliver.

Tuesday afternoon Mrs. Morris Goldwater was hostess to the Prescott Bridge Club and very pleasantly entertained Mrs. Paul P. Hastings, Mrs. J. C. Herndon, Mrs. Frances L. Wright, Mrs. Dixon Fagerberg, Miss Ann McKensie, Miss Olive Fisher and Miss Theresa Fredericks.

Sunday evening Mrs. Charles F. Heney returned to Prescott, after a four weeks visit with friends in Oakland, California.

Mrs. Doyle and Miss Kitty Doyle, mother and sister of W. H. Doyle of this city, returned to their home in Buffalo, N. Y., after several weeks pleasantly spent in Prescott as the guests of Mr. and Mrs. W. H. Doyle.

Mr. and Mrs. J. M. Aitken returned home Saturday evening from their trip east, where they visited in Boston and at Mr. Aitken's home in Nova Scotia.

Lieutenant John S. Baker arrived at Whipple Barracks on Tuesday after a three months leave. Lieutenant Baker is in command of Company F of the Twenty-first Infantry.

Miss Edith Gatfield returned home Wednesday from a month's visit in Chicago.

Mrs. Robert H. Burmister and her two children arrived in Prescott Wednesday evening from their vacation spent at the coast, and Mrs. Robert H. Burmister arrived in Prescott Saturday morning from Phoenix to attend the wedding of his sister, Miss Helen Burmister.

Miss Daisy Blain returned to her home in Detroit, Mich., on Tuesday, after a very pleasant month spent in Prescott as the guest of Dr. and Mrs. J. Harvey Blain.

Mrs. Thomas E. Campbell and her two boys returned home on Tuesday from a few weeks pleasantly spent at Catalina, Cal.

# BULLION SHIPMENT MADE BY 'MT. ELLIOTT

(From Tuesday's Daily)

A thousand dollar bullion shipment was made by the Mount Elliott Consolidated Mines Company yesterday, the second one of this size last month. A carload of concentrates is being loaded for shipment to the El Paso smelters. This makes the fourth carload shipment in the last three months. The estimated value of the concentrates being loaded is \$3,000.

The bullion and concentrates shipments are the result of a recent clean-up in the mill. The plant will be running again steadily in a few days when some minor repairs now under way are finished.

The company's properties, comprising eleven patented claims, are located west of and adjoining the Jessie group and north of and adjacent to the Lela group, both proven properties of merit. The Dividend mine, the scene of present underground operations, is opened by a shaft to a depth of 400 feet and by several hundred feet of drifts. Large bodies of milling ore are exposed in the workings and besides the mine has produced a large amount of very rich ore.

Journal-Miner for high class job work.
