

PACIFIC COPPER IN LARGE BODY OF ORE

Manager De Camp Well Pleased With Showing on the 450 Level Just Reached

(From Saturday's Daily.)

W. V. DeCamp, general manager of the Pacific Copper Mining company, at Silver Mountain, arrived in the city yesterday and reports that development in the past few days has incontrovertibly established the future of that property by the ore shoot being caught on the 450 level that was developed on the 300.

This important development was affected in drifting for 425 feet, and the purpose is to sink a winze from that point to make additional determinations. To expedite further exploration a new pumping equipment

is to be installed at once, owing to the large amount of water that has been encountered as depth is being reached.

Mr. DeCamp is optimistic over the future, and unequivocally states that at no time in the history of the property are the indications so attractive for the making of a great producing mine as are in evidence with the completion of the work on the 450 level. President John Kelly of the company, is due to reach this city early next week, to view the showing that is now in evidence.

ORES OF LOW GRADE YIELDING PROFITS

(From Thursday's Daily)

John Gray, of Deadwood, S. D., is in Arizona to escape some of the cold weather of his home state. He is interested in the Wasp No. 2 mine, which has the reputation of being the lowest grade gold mine in the country. The ore averages only \$2.02 and the loss in the tailings is 53 cents, leaving a net saving of \$1.49 per ton. The ore bodies are large and lie in a blanket so that handling is easy and on an economic basis. The net profit on a production of \$286,000 was \$87,000, this being the result of operations for the year 1911.

The secret of this production is that Mr. Gray has everything arranged so that it can be handled in an automatic manner. The success of this enterprise shows what could be done in Arizona on many properties of good size would carry values better than this South Dakota mine. There are a number of tunneling propositions in Yavapai county, and no doubt in other counties of Arizona, with average values on large bodies of ore better than \$2.50 per ton, and they are lying idle because no one cares to create an economic condition, which will handle them without unnecessary waste.

However, the time is not far distant, when a great many of this character of properties will be worked. There is so much good grade ore, running from \$5 to \$25 in value that have kept people busy trying to make money out of smaller propositions and without creating proper economic conditions for the cheapest methods of handling the ores, that the lower grade deposits of such large size have been overlooked in great measure.

Improvement in the methods of mine management, as well as new inventions in machinery are the main subjects which absorb the minds of the wide-awake mining people of the present day and generation, hence, Arizona may well expect a great mining awakening in the very near future. What the close corporation in charge of the Wasp No. 2 is doing can be done in many places in Arizona, and it will be done.

YAVAPAI METALS MAKING GOOD SHOWING

(From Friday's Daily.)

E. B. Staniland, president of the Yavapai Metals Mining company, who arrived from his camp near Humboldt yesterday, gives a good report of the outcome of late development. Drifting and crosscutting is being vigorously prosecuted from the 250-foot level, and he reports that large and rich ore bodies have been developed.

The company is going ahead on an economical basis, and for the present but one shift of six miners is maintained. The intention however is to increase the force later, and as soon as the ground is opened sufficiently to warrant the expense. Since machinery has been installed development is progressing more expeditiously and at less expense than formerly.

TEACHERS MEET AT OSHKOSH

OSHKOSH, Wis., Feb. 9.—Scores of teachers are here attending the twenty-first annual meeting of the Northwest Wisconsin Teachers' association. Every city and town in the territory covered by the association is represented, and it is said to be the largest convention ever held by the association. E. H. Deeman of Neesh is presiding over the sessions, which will last two days.

SANTA MARIA HAS REVIVAL IN MINING

Barkschat Claimsto Have Workable Body Of Shipping Ore

Stukey Also Reported To Be Opening Up Vein Of Lead Carrying Gold

Henry Barkschat, operating mines on the Santa Maria, arrived from his camp Friday night and left yesterday for Chicago, to consult with associates in connection with a big strike recently made. At a depth of less than forty feet in the main shaft he developed a streak of ore from six to ten inches wide that carries \$18 in gold, 75 ounces in silver and from 40 per cent to 60 per cent in lead.

The claim is situated between the properties of the Bagdad Mining company and the Cowboy mines. Speaking of the latter proposition he states that a crosscut is being run to tap the vein at a point about 200 feet distant, and that the property looks encouraging from work done at other points. He is also interested in the company, and is one of the original stockholders.

Mr. Barkschat reports considerable excitement over the big strike made by C. C. Stukey, of Walker, who is operating in the same zone. He says that at a depth of 100 feet a vein ranging from sixteen inches to over two feet had been developed that ran high in gold and lead, in fact it was regarded as the greatest mineral determination that has been made up to date in that field. Mr. Stukey is personally directing the work, and contemplates remaining in the camp indefinitely. Mrs. Stukey joined him a few days ago.

At other points in the immediate vicinity Mr. Barkschat states that more activity than in many years is noticeable, and the district faces an attractive future.

ANOTHER BASIN CAMP BEGINS OPERATION

(From Thursday's Daily.)

"Bob" Griffith, who is associated with Al Finch in Copper Basin, visited their interests yesterday and will establish a permanent camp and follow out an extensive system of development. Appreciating the importance of the Commercial strike, which occurred in close proximity to his group, situated to the north of Garbarino Hill, during his trip he outlined the work that is to go ahead immediately.

Mr. Griffith says that he was permitted to enter the tunnel of the Commercial company, as well as to inspect the big dump that carries the bonanza ore. He was astounded with the showing, which he says corroborates all the reports in circulation of a big property being proven. He picked from the dump several samples of the rich ores taken from the winze and is enthusiastic over the future of that zone.

THIS LADY'S GOOD APPETITE

Mrs. Hansen, in a Letter From Mobile, Tells How She Gained It.

Mobile, Ala.—"I suffered for seven years, with womanly trouble," writes Mrs. Sigurd Hansen in a letter from this city. "I felt weak and always had a headache and was always going to the doctor. At last I was operated on, and felt better, but soon I had the same trouble.

My husband asked me to try Cardui. I felt better after the first bottle, and now, I have a good appetite and sleep well. I feel fine, and the doctor tells me I am looking better than he ever saw me."

If you are sick and miserable, and suffer from any of the pains due to womanly trouble—try Cardui. Cardui is successful because it is composed of ingredients that have been found to act curatively on the womanly constitution.

For more than fifty years, it has been used by women of all ages, with great success. Try it. Your druggist sells it. N. B.—Write for Ladies' Advisory Dept., Chas. Pfizer & Co., Chatterbox, Tenn., for Special Instructions, and 64-page book, "How to Treat Women," sent in plain wrapper, on request.

SIR GILBERT BACK FROM SOUTHLAND

(From Wednesday's Daily) After a delightful fortnight at Castle Hot Springs, a week in Phoenix during which he played golf at Ingleside, was the guest of honor at several social functions, and made a trip to the Roosevelt dam. Sir Gilbert Parker returned yesterday to Prescott, more than ever convinced of the great future of Arizona, more enraptured with its incomparable climate, and more enthusiastic over the personality and hospitality of the Arizona people.

Looking browner of skin and appearing even more exuberant in spirits than when he first arrived in Prescott, he said yesterday:

"Well, I go back to England much younger in health and much younger in spirit. Arizona has done more for my health in these seven weeks that I have been here than all the doctors and all the watering places of the world. Egypt and the Sudan did me good but Arizona has done me better. I think you have the most wonderful climate in the world. The dryness of the air night and day, its bracing quality, its tonic, are unsurpassable. I say this deliberately and will repeat it whenever I get the chance.

"I have found health and inspiration here and I have found wealth. I have found a wealth of good companionship. Nowhere in the world have I ever run up against a people so great hearted, so generous, as my Arizona friends—for I will call them that. There are only two places where anything like the same hospitality and frank and tactful generosity may be found in anything like the same degree. Those two places are up-country in Australia and the western provinces of Canada, but Arizona in my experience, has no rival and I leave this state with greater regret than I have ever left a country where I came as a stranger to learn only that I was at home.

"I believe in the future of Arizona. I believe that it will be one of the most prosperous states of the Union. Naturally large portions of its territory will not be available either for industry or for agriculture but you have enough territory left to yield you, and mining and an agricultural production which will in the ultimate sum make you the successful companion of many northern, eastern and southern states."

The eminent statesman and author is particularly impressed with the possibilities of Arizona as a premier place for both summer and winter resorts, and his ideas on this subject will be related through the Journal-Miner in a day or so. He plans to remain here for ten days before he journeys towards the rising sun.

For the first time since 1896, Sir Gilbert yesterday greeted his cousin, Richard Parker, of Denver, Colo., at the Yavapai Club.

They have met but twice in their lives. The last time was in London, during the Boer war. Richard Parker was an associate engineer in the Transvaal, at the time of the Jameson Raid and made his escape to England.

The cousins held their second meeting at the bedside of Richard, who is slightly indisposed. It is probable that the cousins will journey to the Verde Valley within a week. Sir Gilbert will go to New York direct, at the expiration of his visit here. There, Lady Parker, who is sojourning with relatives will join him on the voyage home to London.

Late in the autumn, Sir Gilbert will again visit Arizona, this time to be accompanied by Lady Parker, who vows she will see the country of which her husband has written so often and so enthusiastically.

POPULAR COUPLE UNITED IN WEDLOCK

(From Thursday's Daily.)

Cards announcing the marriage of Miss N. Lelia Lee and John Randolph McDonald have been received in the city. The event was celebrated at Wenden on January 28, of this year, and was pronounced the greatest social event that has ever taken place in that town. The bride is the station agent of the A. & C. railway company and in addition to her capability enjoys a splendid name as a courteous woman. She has filled this responsible position since the road was built in 1907, and is very popular with the traveling public.

The groom is also an employe of the above railroad company, and at present is in charge of the material yard at Cedar Glade of the new railroad under construction. He is frugal in habits and industrious in his line. They have a host of friends in the country to wish them happiness and prosperity in their journey through life. Mrs. McDonald will retire on March 1 from the position she has so ably filled, and is followed by the good will of the railway company.

PIONEER FOUND DEAD IN CABIN AT M'CABE

D. Townsend Reported To Have Shot Himself With Revolver

Remains Will be Brought Here and Prepared For Burial

(From Saturday's Daily)

Lying in his lonely cabin at McCabe last night, D. Townsend, son of the late John Townsend, the famous Indian fighter, shot himself to death with a six shooter. At least that is what is indicated by all the circumstantial evidence at first investigation. However, those who know Townsend and who talked with him recently would never have thought that he would be a suicide. Even the day before his death he was in a cheerful mood and had no complaint of any kind to make against any one or of any thing.

Only a short time ago deceased was in Prescott and the Journal-Miner chronicled the fact narrating some of the deeds of his father in fighting Indians in early days. During that visit, he went to see the approximate place where the remains of his father rest, being the first time he visited that place in thirty years. By a stretch of the imagination some might think that he was then brooding over something, and had the suicidal idea in his head, but if such was the case, any moroseness of feeling was carefully hidden behind a most cheerful demeanor.

Townsend had never been married, was aged 46, and lived alone in a cabin near McCabe. He was among his comrades the evening before his death, and was as cheerful as usual, being of a particularly genial disposition. He is survived by two sisters, Mrs. Al. Vroom of Mountain Springs in Sierra Prietas, and Mrs. C. A. French, of Chino Valley, near Jerome Junction, and two brothers, Ben Townsend, residing at Jerome, and Chauncey Townsend, living in California.

The Townsend family were among the earliest settlers of Yavapai county, and were well and favorably known. There are hundreds of friends and acquaintances of the dead man who will sincerely regret his untimely end and will genuinely sympathize with his brothers and sisters in their sad loss.

Undertaker Ruffner left for McCabe last night and will bring the remains here and prepare for burial, but arrangements for the funeral will not be made till relations of deceased are heard from.

EASTERN VICTORS

(From Friday's Daily.)

Mrs. E. R. Van Olstean and daughter, Miss Florence Van Olstean, of Urichville, Ohio; Mrs. Crew Wilkins, of Washington, D. C., and Miss Emily Wright, of Alabama, are visiting the city for a few days and are house guests of Mr. and Mrs. F. W. Foster. Mrs. Van Olstean is the aunt of Mrs. Foster. The party are making a tour of the west and are en route to Los Angeles to spend the rest of the winter.

Journal-Miner—High class job work

JUDGE SMITH ON TRAVELS SEES PROSPERITY

(From Thursday's Daily) Judge and Mrs. F. O. Smith returned Tuesday night after a two weeks' trip of recreation in the Verde Valley, Oak and Beaver creeks. In speaking of industrial conditions in the country, Judge Smith states that the farmers are all prosperous, and the largest crops ever known are expected for the current year. While at Camp Verde the oil fields were visited, and much excitement caused by the determinations of the Verde Valley Oil company. The advent of the new railroad, the artesian wells that are flowing, and the generally good outlook of all interests, are attracting investors and prosperous conditions seem assured.

PEOPLE OF MAYER ENTHUSIASTIC AT GROWTH

(From Wednesday's Daily)

Mr. and Mrs. Joe E. Cook, Warren G. Davis and H. B. White, all of Mayer, were in the city yesterday on business and pleasure. All visitors give a good report of industrial conditions in that section and are confident that Mayer in the near future will rank as the second only to the metropolis of the county.

It is becoming favorably known as a center of homes, and during the past year the population has nearly doubled, necessitating the increasing of school accommodations to twice the former capacity.
