

BIG BAND OF ELK REACHES WINSLOW

Noble Animal Brought From Wyoming And Will be Turned Loose On Arizona Ranges.

All praise to the Elks of Arizona. The noble animal that symbolizes their order is to receive humane consideration, as was reflected on Wednesday afternoon when the first herd of eighty-three arrived at Winslow, in fine condition and were accorded a welcome that brought every resident of that city out to witness their unloading.

Dr. R. N. Looney, who was the representative of the Prescott lodge, viewed the interesting proceeding, and states that the animals were very much admired and the incident appealed to all from the standpoint that the bunch had found a home that in the future would not be burdened with the cold blasts of the northland and that food in plenty would be their lot hereafter.

The bunch was brought from Gardner, Wyoming, and only two died on the long trip of twelve days, both by accident. Of this shipment all are fawns, with two old cows that will act as leaders on the range. Seventy are does and thirteen are bucks. They were corralled near the depot and all were as gentle as cattle on the range. Their keeper who accompanied them on the long trip stated that thousands are dying in the north every winter from lack of food, and with the rapid decimation going on it would be only a few years more until they would be as

scarce as the buffalo. After the herd is rested at Winslow for a few days they will be crated and taken to Chevelon creek, about fifty miles south, where a large corral awaits them. They will be kept enclosed for the next five weeks, and will be well fed, a large stock of hay being on the ground for that purpose. Later they will be permitted to range at will and will have as fine a feeding ground as is to be found anywhere in the southwest, and with water abundant everywhere.

This beautiful movement had its inception many months ago with the grand lodge of Elks of the state and the subordinate bodies crystallized the movement by acting generously and expeditiously, taking the matter to Washington, and receiving the hearty support of the Agricultural Department.

This shipment is the initial one, and will be followed next year by another. The reserve set aside for these animals was formerly the home of the elk, but they were exterminated over fifty years ago by the nomadic tribes of Indians who were at war with each other. A bill is to be presented to the legislature now in session imposing a heavy penalty for the killing of any of the herd that has arrived and that hereafter may be imported.

MONEY ENOUGH TO LAST TWO YEARS

(From Thursday's Daily.)

Active development operations are being carried on at the United Verde Extension property under the supervision of George Kingdom of the Old Dominion as consulting engineer. Work is at present concentrated in clearing out the old workings which filled up while the mine was closed down. There are some 300 feet of those workings which will have to be attended to but before the end of the present month it is hoped that it will be possible to locate the new shaft. At the point selected for the shaft an upraise will be started and a winze will also be sunk to depth, so that by the time the shaft is holed through to the surface, or before, considerable knowledge will have been obtained of conditions at depth.

Present expenses are at the rate of about \$6,000 per month so that by the terms of the Douglas stock purchase the company has funds sufficient to last for at least two years.

Directors Douglas and Tener are visiting the property now and on their return it is expected that additional information as to the progress of developments will be available.

Stockholders of the Jerome Verde Company at a meeting on January 31st ratified the terms of the option which the United Verde Company obtained on their property. The option runs for a period of three years and at the end of that time the company can be taken over on a stock basis. This property is believed to possess considerable value and can be worked most advantageously from the United Verde Extension new shaft while the former workings of the Jerome Verde Company were in another part of the tract.

Among the members of the Douglas syndicate, which is now in control of United Verde Extension, are the following: John D. Ryan, of the Amalgamated; W. D. Thornton and L. D. Ricketts of Greene Cananea; John C. Greenway, of Calumet & Arizona; H. B. Hovland, of Inspiration; W. A. Corey, the steel man; Gordon R. Campbell, C. A. Congdon, George T. Oliver, Charles Briggs, Thomas Hoatson and others scarcely less well known.—Boston Financial News.

LIVED ON RAW EGGS

Mr. Richard's Experience With Different Diets. Peaches and Buttermilk for Three Years.

Cecil, Md.—Mr. George Richards, of this place, during the past 12 years, has probably tried more different diets than the average person would ever use in a lifetime.

What he has to say about his experiments, must therefore be highly interesting to anyone suffering from indigestion or stomach troubles of any kind.

He says: "For more than 12 years, I suffered with stomach troubles, and paid hundreds of dollars for doctor bills and medicines. I was also operated on for piles.

I lived on dried peaches and buttermilk for nearly three years. The only thing that would not give me pain was raw eggs.

I was a physical wreck. I could not sleep, and was as near crazy as a man could well be.

I must say that after taking two 25-cent packages of Thedford's Black-Draught, it did me more good than all I ever spent for other medicines.

I have been working daily on the farm ever since, and I am as hard as iron. This purely vegetable remedy has been in successful use for more than 70 years.

Try it. But be sure that it's "Thedford's."

The old mill is being re-built and the camp is now the scene of lively times.
