The last named physician seems to have the inside track for the place.

The social hop given by the Grays last evening was well attended by members of the company and their friends. The armory was beautifully decorated for the occasion. The music by the orchestra of the 9th Infantry band was excellent and everything passed off very pleasantly. Dancing was kept up until nearly 1 o'clock. We congratulate our friends of the Grays on the success of the affair.

The late Peter Cooper, who was not only a philanthropist, but also a very practical business man, once said: "In towns where a newspaper is published, every man should advertise in it, even if nothing more than a card, stating his name and the business he is engaged in. It does not only pay the advertiser but it lets the people at a distance know that the town you reside in has a prosperous community of business men."

We understand that over fifty applications have been made for admission to the territorial Normal school at Tempe, but that Professor Farmer has but twenty-two pupils. This is all that he can attend to, and applicants not coming up to the high grade of his classes are rejected. It is a grammar school department were provided, together with another teacher, at least fifty pupils could secure tuition. This is a matter that demands the attention of the next legislature, and to which we will refer more fully subsequently.—Gazette.

Without Adequate Cause. Or, with apparently no cause at all, chills and fever, thought to be cured, germinates and re-erupts in the system. This giant among diseases cannot be laid out with quinine. The only way to give it a final and extinguishing quietus, is to use persistently the national antidote to miasma poison, Horder's Stomach Bitters, which roots it out completely. The process of cure is, of course, much easier if the Bitters is used as a preventive, when the first chill is felt, but persons who are not acquainted with the nature of the symptoms are sometimes in error as to their cause, and neglect the simple and pleasant remedy of all others best suited to check the progress of this dreaded and destructive miasma. Visitors to, or sojourners in, malarious localities will, moreover, act the part of wisdom if they use the Bitters as a preventative. Rheumatism, constipation, biliousness, indigestion and kidney troubles are removed by the Bitters.

The "Horror" of Tooth Pasting. One Dr. D. and J. Pentland have, after considerable expense, commenced the manufacture of "nitrous oxide gas" for the absolutely "painless extraction" of teeth. They will continue to keep a good supply always on hand of pure fresh gas, so that the most timid may go longer and dread the extraction of troublesome teeth.

Watch Repairing. If your watch is out of order take it to George H. Curry. Established in Prescott 9 years. Satisfaction guaranteed, and price consistent with good work. All watches repaired by him have card in back case and none others warranted.

One of the requisites for membership is that its members must have come to Arizona during from 1875 to 1885, and in every instance the person applying for membership must establish that he came to Arizona for the good of Arizona, and he must prove by at least two persons resident of his old home that the same he assumes here is the one he was known by at home.—Star.

Lieutenant R. B. Watkins, superintendent of the United States military telegraph lines in this department, has received telegraphic orders to report at Washington for duty. He will be relieved by Lieutenant W. A. Glasswood, who has been in charge of the signal offices of the division of the Pacific. Before leaving, Lieutenant Watkins will inspect the stations, eleven in number, of Arizona and New Mexico.

There are people in this oddly constructed world who can gulp down with smiling complacency all the good things (gratis) that a newspaper can say of them, in blatant disregard of the fact that a reciprocity of the favors would be proper and appreciated, but let an obscure item touch the hem of their virtuous garments—then listen to the treasure of invective that pours forth from the paragon's throat of the victim(?) This item is C. O. D. It can be returned if not satisfactory.—Albuquerque Journal.

It is quite evident to the observing that there are evidences on every hand of a near and permanent prosperous future for Arizona, not of one section only, but of every section of the territory, and of every industry. Those who have weathered the storm and have not lost their grip and courage, will yet be compensated for all they have endured, all they have lost and the discouragement they have met. The important thing for the old timers is to gird up their loins and once more strike out and determine to win what they have lost during the dark and evil days brought upon the territory by Apache depredations and wild speculations.—Star.

The Epitaph, speaking of the defeat of General D. K. Wardwell, for the Lemhi Indian agency, gives the old man the following plaintive send-off: "The sunrise of his prosperity is fast receding from view, and the government to which he gave the best years of his life on the field of battle, fighting for the liberties of her people, now under the administration of a democratic president, he is left to the tender mercies of an ungrateful party. The Epitaph is of the opinion that an old soldier, who fought for the stars and stripes, is not in good standing with the present administration. The old man has his faults, as has all men, but the many years of gallant service given to his country entitles him to be considered in the declining years of his life."

United States court will not be opened until next Monday, December 20th. Judge Porter has not decided whether the business will require the calling of a grand jury or not.

SCIENTIFIC TRUTH

Regarding the Functions of an Important Organ

Of which the Public should have the most careful consideration.

To the Editor of the Scientific American: Ever aware as we all are of the fact that the public has been misled by the false facts we have learned during the past 8 years, concerning disorders of the human kidneys and the organs which discharge their waste matter. You are conducting a scientific paper, and are unapproachably in favor of TRUTH, and especially speaking of the kidneys, you are bound to state the truth. You are bound to state the truth for the benefit of the human race.

H. H. WARNER & CO., Proprietors of "Warner's Safe Cure."

That it may emphasize and clearly explain the relation the kidneys sustain to the general health, and how much is dependent upon them, we propose, respectfully speaking, to take the case of the human body, place in the wash-bowl before us, and examine it for the public benefit.

You will imagine that we have before you a body shaped like a bean, smooth and shining, about four inches in length, two in width and one in thickness. Ordinarily weighs in the adult male about five ounces, but is somewhat lighter in the female. It is made up of two poles through these filters or sieves, as they may be called, many times a day, as often as the heart, making a complete revolution in three minutes. From the blood they separate the waste matter, working away steadily night and day, and discharging it into the bladder.

We also this delicate organ open lengthwise, and you will be able to describe its interior: We find
