

EDITORIAL NOTES.  
Matta's objectionable reply to President Harrison's message has been withdrawn by the Chilean government.

Democrats in congress have given the president assurances of support to the administration in case of war with Chile.

A Berlin doctor is said to have discovered the bacillus of la grippe. He should lose no time in putting an end to the pesky thing's life.

Two deputies sheriff state that Dr. Graves had confessed to them, his connection with the murder of Mrs. Barnaby. The doctor says he didn't.

A Stockton, California, man has invented a flying machine. He says it will remain stationary in the air while the earth whizzes past it at the rate of 1,000 miles an hour.

The worst mine disaster that has ever happened in this country occurred near McAllister, Indian territory, last week, in which 300 men were killed by an explosion.

The San Francisco Chronicle's 40-page New Year edition was a valuable paper. Whenever the occasion demands it the Chronicle can always surpass all its contemporaries.

An evidence of the unfairness of the gerrymander is adduced from the last election in Ohio. While McKinley carried 50 of the 88 counties, he had pluralities in only 7 of the 21 Congressional districts.

Prof. G. B. Smith, of Cornell University, declares that the gift of oratory is departing from America. The professor should visit Prescott and listen to the oratorical efforts of some of our budding and blooming statesmen.

The Mexican press denies that there is any revolution in Mexico. The Mexican press seems to be right, too. What little attempt at revolution has been made down there seems to have been on the Texas side.

A democratic contemporary says that it has been discovered that wild monkeys when at war always cast empty or rancid cocoanuts at each other. We have known a great many democratic editors to carry on political campaigns on the same basis.

A Baltimore and Ohio railroad train attempted to make forty miles an hour the other day near Fairmount, West Virginia, but broke an axle in the attempt, and five coaches were derailed, killing several people and wounding thirteen more. As a man killer, the B. & O. has no equal.

The Journal-Miner editor does not feel his own importance to any very great extent, but when a bomb is fired at his head he is not so blind but that he can detect the aim of the thrower, even though the force said editor may be in a crowd at the time. He is able to detect whether it is fired at him direct or whether fired promiscuously at the crowd. Sabel!

A Massachusetts physician has succeeded in setting the broken neck of a young man and restoring him to life and health in a period of three months. If he could succeed now in the discovery of some means whereby the vertebral column of a grippé's bacillus could be permanently disjoined, he could "fill a long felt want" of the suffering human race.

Proposals of the disaffection over Speaker Crisp's committees among members of his own party, the Chicago Tribune dropped into the following bit of anti-Christmas poetry. 'Tis the day before Christmas, and all through the House everybody's as mad as a petulant mouse. There are too many Democrats—more is the pity—to make each the chief of some leading committee.

A bill has been introduced in the Georgia legislature, providing for taxing favorably. It has been reported favorably by a committee and stands a good show of being passed. Under its provisions becheolers of 30 years of age are to be annually taxed \$25, and the tax is to be increased on a rising scale of \$25 for every additional five years of becheolhood until the maximum annual tax of \$200 per annum is reached at 65 years.

If one were to believe the wails of A. C. R. and Justice, two anonymous correspondents of our contemporary, he would verily conclude that since Cleveland's appointment of the bench corruption and dishonesty prevails among the judiciary. The judiciary of to-day is not more largely partisan than the judiciary of a few years ago and will size up equally well in honesty and purity.

The Chicago Inter Ocean observes that we import 6,000,000 gallons of wine into the United States every year, but we sell something like 22,000,000 gallons of "imported" wine in the same period. That leaves a large margin for the domestic product which goes under foreign labels, and indicates the quantity of American wine that is consumed, while the consumer thinks he is taking the imported article into his stomach and relishes it accordingly.

A plot has been discovered that the Democrats intend to "Michiganize" the State of New York providing that the Presidential electors shall be chosen by the Legislature, and not by the popular vote of the people. Another feature of the alleged scheme is, that by this plan enormous sums of money usually spent in the State campaign for the election of electors by popular vote, can be reserved for distribution during the canvass in other doubtful States.

Dr. Graves has been denied a new trial and sentenced to death at Denver.

A gentleman prominently connected with the Southern Pacific railroad, is reported to have stated in Galveston that the general offices of that company would be removed from New Orleans to Houston, Texas.

A New York pilot has been sent to the penitentiary for five years for criminal negligence in running down a yacht last summer and killing two men. It may seem hard to send a man to imprisonment where his intention to commit crime was lacking, but loss of life through criminal carelessness or negligence seems little less a crime than if the intention were present. It makes little difference whether one starts out deliberately to commit murder, or whether he assumes a "don't-care-a-straw" demeanor, in his acts, which result in the loss of human life.

From the manner in which the orators of the democratic party pitched into the McKinley bill during two campaigns it was supposed that the first act of the democratic congress would be to wipe this much maligned law out of existence. Not so, however. The rumor now comes from Washington to the effect that a majority of the ways and means committee are opposed to any interference with the present tariff law. They seem to think that the McKinley law will do more to develop the resources of every section of the country than any similar measure that has ever been enacted. The democratic party in this seems to be keeping up its reputation of following in the wake of the republican party and of adopting its measures.

The local items, published in the Prescott papers, present a fine appearance when they are dressed up as telegraphic news in the two morning papers of Phenix, three or four days after their appearance here. They look as crisp and fresh as if they had just been ticked off a wire instead of having been jolted and thumped against each other in a mail sack for about thirty hours by the long and tedious stage ride via Wickenburg and Congress. For original designs in newspaper enterprise we can not but admire this new departure in telegraphic service adopted by these Phenix papers.

A bold game was played on the pool rooms at Denver, Omaha, and Kansas City, January 6th. A telegram from Denver tells of the manner in which it was played in that city, the same game being played in the other cities named. The parties to it were arrested in Kansas City. The telegram is as follows: "Two strangers, giving their names as Perry and Rogers, have been in and about Austin & Co's race pool rooms here for the past few days. They have laid an occasional bet on several races with indifferent results until to-day. This afternoon 'Congress' a horse in the Guttenberg races, was put on the board as a 10 to 1 shot. Perry invested \$300 on this horse, and great surprise was caused when the returns were received, showing that 'Congress' had won, and Mr. Perry pocketed his \$3,000 and quietly disappeared. Shortly afterwards the man Rogers placed \$100 on Rosa G, a 15 to 1 shot. Strange to say this horse proved a winner also. The cashier of the firm paid the man, who lost no time in leaving the room with his \$1,500. This last extraordinary luck led the pool seller to thinking, and they requested the race bureau in New York to verify these winners. An immediate answer was received showing that the horses had not even got a place in their respective races, and that the pool room had been duped. The wire had been tapped probably between the race track and the New York telegraph office.

Governor Irwin has issued his proclamation giving the result of the recent election on the adoption of the constitution. From this official document it appears that 7,738 votes were polled, of which 5,440 were in favor of the constitution and 2,298 against, and 16 votes were thrown out. The majority in favor of the constitution was 3,182. An analysis of this vote, even with this majority, does not seem to indicate that the citizens of this territory were overwhelmingly in favor of the constitution. At the last general election there were in round numbers 12,000 votes polled in the territory. Advocates of the constitution worked energetically for the measure and raised large sums by subscription to assist in its adoption, and it is fair to state that a pretty full vote of those favoring the constitution was secured. Opponents of the measure did not spend a single dollar that we know of, certainly they did not in northern Arizona, to assist in its defeat, and they even remained away from the polls by the score. The result of the vote shows that 4,282 refused to vote at all, and it is a safe proposition to assert that nine out of ten of these were opposed to the constitution. Then when the floating vote is considered, men who take no interest whatever in elections, but who go to the polls and vote as they are requested, and who if the same exertion had been made by opponents of the instrument as were made by its friends, could have been secured to vote the other way, a still greater discrepancy would have been made in the result. It is safe to say that if a full vote had been polled and if those opposed had been as active as the advocates of the constitution, a majority of from 2,000 to 3,000 would have been cast against its adoption. The result as stands certainly does not show that a majority of the voters favored the instrument.

APACHE COUNTY'S MAJORITY.  
Analyzing the vote, in Apache county, at the late election, we are enlightened as to what caused the large majority for the constitution. This county is completely in the hands of the Mormons. Out of a total vote of about 900 cast at the late election in 1890, the Mormons polled 360 votes. At the election in last December only 481 persons exercised the elective franchise or about one half the voting strength of the county. Of this number 397 were for the constitution and 84 against. An accurate count shows that over 300 of these votes were cast by Mormons. To put it in another way, the majority for the constitution must be credited to the saints.

Leaving out the Mormon vote, Apache county was about evenly divided on the question of statehood, under the constitution adopted to suit the peculiar ideas of the Mormon church.

Not a Mormon in this county voted against the orders of the church; and they voted almost their full strength.

In the following precincts the residents are entirely Mormons, except probably six or seven persons. See how the vote stands on the constitution:

	For.	Against.
Alpine.....	9	0
St. Joseph.....	12	0
Woodruff.....	26	0
Snowflake.....	50	0
Taylor.....	28	0
Nutrisio.....	17	2
Pinalde.....	9	2

In the precinct of St. Johns, 112 votes were cast for the constitution and four against. The entire majority represents Mormonism. So too in Springerville, Concho and Holbrook. Winslow and Pinetop are American precincts. In the former there was a majority of nine against the constitution and in the latter nineteen against and none for. This is convincing evidence that the Mormon church is greatly pleased with the constitution. And she would be hard to please if she didn't feel that way.

In round numbers there are 2,000 Mormon voters in the territory. At the election in the fall of 1890, Mark Smith received every one of these votes and was elected by a majority of 1,100. Does it need any further argument to convince the unprejudiced that the Latter Day Saints, with polygamy as their watch word, hold the balance of power in the territory; and will dictate her policies and command her legislation, if she becomes a state. The Mormons know this to be true and the entire influence of the church is to-day at work in Washington urging statehood for Arizona, knowing full well the power she will sway and the benefits which will inure to polygamy and the union of church and state.

PROCLAMATION.  
TERRITORY OF ARIZONA,  
EXECUTIVE DEPARTMENT.  
To all to whom these presents shall come greeting:  
WHEREAS, by an Act passed by the 16th Legislature of Arizona, at its session in 1890, it was made the duty of the Governor to declare the result of the vote cast and returned on the adoption or rejection of the Constitution, by proclamation, when the same is certified to him by the Secretary of the Territory;

Now, therefore, I, John N. Irwin, Governor of Arizona, by virtue of the authority in me vested, do by these presents declare the result of said election, as certified to me this day by the Secretary of Arizona, to have been as follows, to-wit:

For.....	5,440
Against.....	2,282
Number of votes thrown out.....	76

Total number of votes cast 7,738  
Majority in favor of adoption 3,182

In testimony whereof I have hereunto set my hand and caused the Great Seal of the Territory to be affixed this 28th day of December, A. D. 1891.

JOHN N. IRWIN,  
Governor.

N. O. MURPHY,  
Secretary of Territory.

Speaking of possible presidential candidates the New York Herald says: "Mr. Cleveland maintains impregnable silence, but he is by no means indifferent to the prospects of the future. Mr. Hill, on the contrary, has taken the whole world into his confidence and says, by his broadest intimations, that he wants to be president and will do his best to win the day. The next candidate of the republican party will be Blaine, and no one else. The candidate of the democratic party will hail from the west, and for the present is a dark horse. If the democrats see that they see a good deal, and the probability is that they will see victory."

The reports which come from southern New Jersey in regard to the ravages of a grippé are of a most alarming nature. In many of the little towns and villages on the coast there is so much sickness that not enough well people are left to nurse those that have been prostrated. In Atlantic county, which has always been regarded as one of the healthiest localities in the entire country, over one thousand people are down, and new cases are being reported almost hourly. In one large village every resident, from the babes to the oldest inhabitant, is a sufferer.

An exchange says: "No doubt many ordinary ailments, such as coughs and colds, are wrongly attributed to the grip. The epidemic manifests itself in various ways. Its most characteristic symptom, which is manifested in almost all cases, is a great loss of strength, usually near the inception of the malady. The grip is nothing if not weakening, and often to the extent of prostration. On the other hand a common cold, even though severe, is not usually attended with the weakness and disability which characterizes the grip."

Deputy United States Marshal John V. Paul, son of United States Marshal Paul, was married recently in Tucson.

GOVERNOR ZULICK'S KREMY.  
The greatest enemy that Governor Zulick has at present is truth. The doughty, puffed up, little statesman, from New Jersey, seems to have fallen out with truth several years ago in his native State, and has been waging an active warfare on it ever since. In his brief political career as governor of this territory he would wallop and warp the truth every time that it came between him and his own selfish interests. He would make a positive assertion one day, and the next would swear by the board of Senator McPherson, of New Jersey, his political patron saint, that he had said something entirely different. He is not what might be termed an ambitious liar, as he does not apparently make any effort to eclipse the fame and reputation in this direction of Tom Ochiltree or Eli Perkins, but confines his operations to the little pettifoggery untruths characteristic of a small-souled charlatan. In fact, many of these are so insignificant that they are often overlooked, and being allowed to pass unchallenged, have the effect desired by him. They creep out very largely in his interviews with newspapers, and the ex-governor fired off a good crop of these little fellows in his recent interview with the San Francisco Chronicle reporter. Passing by several minor ones, we come to his statement about Arizona and statehood, in which he says: "Arizona is more entitled to be a State than either Idaho or Wyoming. She has as many people as either of them, more taxable assets, greater resources, consisting of her rich mines, large cattle interests and immense forests." That the little fellow from New Jersey possesses a certain amount of cunning shrewdness is admitted by all, but that there is no real depth of intellect to him is evidenced by the above statement. Such an assertion, made to a coterie of his non-reading constituents, in his own ward where his power is most potent, might be received and pass current for truth. But that such an assertion should be made for publication in a metropolitan journal where it will meet the eyes of intelligent readers, who know what the population and taxable property of Arizona is, as compared with Idaho and Wyoming, shows a shortsightedness on his part which can only be attributed to a very small brain. Statistics showing the above are not in a sealed book, as Mr. Zulick seems to imagine, but are open to all, and the untruthfulness of such an assertion can readily be detected. Sundry other misrepresentations in the interview follow the above, but which are passed by and we come to the following: "A special clause has been engrafted in the new Constitution declaring polygamy to be a felony. This was favored by the Mormons themselves, who in Arizona are a law-abiding people, and there are no cases of polygamy in the Territory." The untruthfulness of this consists in its omissions. He does not state that this clause depends on future legislative enactment for its becoming of any force and effect. Neither does he state that the Mormons hold the balance of power in the territory and can and will successfully resist any and all legislation looking towards making the clause effective. He does not state anything about the Mormon colonization scheme for the future State of Arizona, nor of the active interest which two evangelistic Mormon bishops took in framing the Constitution and afterwards working for its adoption. He does not state that this clause in the Constitution is absolutely of no force and effect and will continue to be.

Of course, Mr. Zulick will carry this interview with him to Washington, where he has gone to grind his own political ax. To use his own language, "Mc and McPherson will admit the treaty without delay, and I will be one of its first United States senators."

The Tucson Star gives the following very sensible advice, which is recommended to all: "Every person should make an effort to square up their subscription for the old year and pay one year in advance. It makes business easy for the newspaper, it puts the publisher on the best of terms with himself and patron, and it eases the subscriber's conscience, for he realizes he has performed an important duty, and has in all probability been the means of making it possible for the proprietor of the paper to pay promptly his just debts. Pay up the subscription to your newspaper, and if you are not already a subscriber lose no time in subscribing for one or more of your local papers. It is your duty so to do. If you are interested in the prosperity of your community, if you want to contribute a part of the expense of advertising the resources of the territory, you can do so by subscribing and paying for your local paper."

An exchange give the following as being remarkable: "Open the hand naturally and place a copper cent on the palm, then ask someone to brush it out with a whisk-broom. After repeated efforts, it will probably be suspected that the cent is fastened in your hand in some way. In order to prove that it is not, let the sweeper place it on his own palm, and he will find that it remains as immovable there as when he tried to sweep it from your hand or the other person. A few persons have flat palms. The cent may be easily swept off such palms, but they are not common." There is nothing very strange or unnatural about the above. We have seen men right here in Prescott that if a dime were placed in their hand it could not be swept out by a broom, or a whisk-broom, or a sweeping machine, while a twenty dollar gold piece laid in the same position could not be budged by a Nebraska tornado.

John Sherman has been elected Senator from Ohio.

MORMON POWER.  
The undisputed power of the Mormon church, over its members, is as great to-day as in the days of the Mountain Meadow massacre. In Arizona, this has been demonstrated, time and again, in the elections.

The Thirteenth Legislature enacted a law which in effect took the public schools out of the control of this immoral aggregation of foreign, opaque ignorance. It also placed upon the statute books a Test Oath. These laws were passed by that body, and voted for by both Democrats and Republicans. When the Church saw this state of things, she at once began feeling around for relief; and in the bosom of the Democratic party her emissaries found consolation. Previous to this the Mormons voted without orders, and C. C. Bean had been elected to Congress. A coalition was made, with this understanding, that the Mormons were to vote solidly for Mark Smith and the Democratic candidates for the legislature. In return for this unholy support, the legislature, which would have a Democratic majority, would repeal the laws which were obnoxious to the Apostles of lust and licentiousness.

Just before the election in 1890, written instructions were sent to the bishops of the Mormon Church throughout Arizona, commanding the Saints to vote the Democratic ticket. This was done with blind obedience, and, as a result, Smith was sent to Congress, where, he tells the Mormons, he has introduced the Mormon Bible. The 14th Legislature was largely Democratic, and among the first acts of that body was the keeping of the promise of the party, by repealing the Test Oath and so amending the school laws, that to-day in Mormon precincts only Mormons are permitted to teach in the public schools.

Will this condition of things be changed under statehood? Not in the least. But on the contrary, Arizona will become a Mormon state, and such laws will be made as the Church commands, and is always watchful of her interests and only those who will come under the rod can expect political preferment.

Polygamy as a crime, under the Constitution, will become a dead letter, and the Church will not permit the passage of any act which will carry into effect the provisions of the Constitution.

And so a multiplicity of wives will again become the rule, and the day dream of Judge Zane and others, who say that the Church, herself, has struck polygamy the death blow, will go by contraries, as dreams usually go, and our American civilization will be blighted with the sulphurous atmosphere surrounding our fair land, in which woman's degradation will be complete and her fair fame a by-word.

### CONSTITUTION.

Attends half the American people yet there is only one preparation of Sarsaparilla that acts on the bowels and reaches this important trouble, and that is Joy's Vegetable Sarsaparilla. It is recommended to all. People suffering from constipation, indigestion, headache, etc., should take a few bottles of Joy's Vegetable Sarsaparilla. It is a powerful purgative, and acts on the bowels and reaches this important trouble, and that is Joy's Vegetable Sarsaparilla. It is recommended to all. People suffering from constipation, indigestion, headache, etc., should take a few bottles of Joy's Vegetable Sarsaparilla. It is a powerful purgative, and acts on the bowels and reaches this important trouble, and that is Joy's Vegetable Sarsaparilla. It is recommended to all.
