THE BULLETIN.

The New York, New Haven and Hartford railroad will not run postal cars after April 1, unless an increase of price is given by the post-office department.

The importation of pepper is confined to a few Boston houses and two or three New York houses. These sell to two or three dealers on arrival, and often before arrival, who hold and control the supply of pepper for this country.

It is said the brewers of Philadelphia produce 600,000 barrels of malt liquor annually, giving employment to nearly one hundred thousand men, and consuming in the manufacture a million and a half bushels of barley of the value of \$1 10 per bushel.

Several attempts to make a change in the Richmond postoffice were unsuccessful, and Miss Bettie Van Lew remains in quiet possession. The Missouri Republican's Washington special says:

The defeated Virginia politicians who sought to make a change in the post-office at Richmond are now put to their wits' ends to explain their discomfiture. A Petersburg paper in the interest of Senator Lewis endeavors to account in the following manner for the president's action. It says the reappointment and confirmation of Miss Bettie Van Lew as post-mistress of Richmond ought to have been expected when it is remembered what faithful service she rendered Grant when he was besieging Richmond. She established a daily communication with him, and kept him informed as to the progress of events in the confederate capital, and then she sent him flowers. Nosegays clipped in her garden in the morning have been known to be on his supper table at City Point at night. When Richmond fell Grant sent a trusted member of his staff there with instructions to say that her property was protected and her wants supplied.

THE STATE CAPITOL.

COPPERAS CREEK DAM—AN INVESTIGATING COMMITTEE—APPROPRIATIONS—JOURNAL PUBLICATION—THE LAKE FRONTIERS.

[Special Despatch to the St. Louis Globe.]

SPRINGFIELD, Ill., March 26.—The house this morning was mainly occupied in the discussion of the bill to authorize the construction of a lock and dam on the Illinois river at Copperas creek. Mr. Johnston made a long and labored speech in opposition to the measure. He indulged in a great deal of very intemperate language, and charged the government and senators with having been introduced in an improper manner to support the measure. Upon the vote being taken the bill was lost, merely for the reason that several friends of the bill were absent, who if they had been present, could have passed it. The discussion waxed warm, and when the debate was ended, Mr. Johnston moved to reconsider and make the bill the special order for next Friday, which motion prevailed.

Mr. Oberly offered a resolution as follows, which was adopted:

Whereas, the member of this house from Rock Island county (Mr. Johnston), in a speech made in the house March 26, 1873, charged that the governor of the state has used improper means to influence the general assembly to pass the bill appropriating \$200,000 to improve the Illinois river, and that improper and dishonest means and influences have been used by parties interested to induce members of this house to support the said appropriation; therefore,

Resolved, That a committee of five be appointed to investigate and report to this house in regard to the truth of said charges.

The chairman appointed Messrs. Oberly, Hawes, Swinton and McPherson as such committee. Of course nobody believes that there is the slightest particle of truth in the allegations made in regard to improper means used for the passage of this bill. It stands upon its merits, and a proper consideration of those merits will insure its passage. In this case of corruption it is only made to delay action upon the bill, or to defeat it, if possible; but it will not succeed. It passed the senate by a very handsome majority, and when there is a full house—if such a wonder should happen—it will be passed by that body and become a law.

Mr. Whiting introduced a bill which provides for the daily publication of the journals of the general assembly which shall be laid upon the desks of members, and when corrected, to be for the volumes of journals.

There was a lively fight in the house on the motion to "Laid Front" windle. The effort to repeal the act is meeting with little opposition, except such as the railroad companies can command.

THOMPSON'S FEVER & AGUE POWDERS,
FOR THE PERMANENT CURE OF
CHILLS AND FEVER, DUMB AGUE OR ANY FORM OF INTERMITTENT FEVER.

THE GREATEST DISCOVERY OF THE AGE!

There are no diseases so debilitating in their effects upon the constitution as the above, and none more difficult to cure by the usual mode of practice. The Fever and Ague Powders will effect a cure in cases of the longest standing as well as prove a preventive in the forming stages of the disease. Being purely vegetable, they act with certainty on the system, totally eradicating it from the system, and prevent a return at any future period.

Why waste your money and health in trying every medicine you hear of, when Thompson's Fever and Ague Powders have never failed to cure the illness in any case.

REASONS WHY THEY ONLY SHOULD BE USED.
Their reputation is established. Thousands of testimonials have been received, showing that these powders have performed miracles in curing cases of long standing, many of them considered hopeless. They are not a risk in using them. They contain nothing injurious, and therefore none of the lingering diseases so often the result of the many nostrums of the day. Physicians recommend them as a safe and reliable remedy, and they have been used by the patient beyond the probability of a return.
