### Special Notice

Revolution in the Dressing Room!

By the almost unanimous action of the Parisian dress-makers, the hair is now being dressed in a new and more effective manner. Unlike the compounds that upon the health of the hair and dry up and consume the hair, which is the best experience of years had, this is found to be a vitalizing as well as a coloring agent.

**Cristadoro's Hair Preservative**, a valuable adjunct to the hair, is dressing and promoting the growth and perfect health of the hair, and of the scalp, arriving at the root of the hair, and protecting it from decay under all circumstances and under all climates. Manufactured by J. CRISTADORO, No. 57 William St., New York. Sold by all druggists. Applied by all hair dressers.

### Are Moles a Pest?

There is a great difference of opinion as to this question. Our own is that the mole is harmless as a rule; sometimes it damages lawns and gardens in pursuit of its food, which usually is the earth worm. If it should go through a hill of corn and injure it by loosening the roots, it is still in pursuit of the earth worm, which is in dry times found about the roots of corn and other vegetables, grass, etc., more abundantly than elsewhere. So far as our observation extend we have never known the mole to eat vegetable matter. It would seem to be strictly a carnivorous animal. And on this head here is something to the point:

Mr. Weber, one of the savants of Zurich, Switzerland, recently examined the stomach of a number of moles caught in different localities, but failed to discover therein the slightest vestige of plants or roots; whereas they were filled with the remains of earthworms. He shut up several of these animals in a box containing earth and sod with growing grass and a small case of grub or earthworms. In nine days two moles devoured 341 white worms, 193 earthworms, 25 caterpillars and a dead mouse. Fed with a mixed diet of raw meat and vegetables, the moles ate the meat and left the plants; and when the vegetables, exclusively, were dealt out to them, in twenty-four hours both died of starvation.

### Central Coal Co.

MINERS AND DEALERS IN Coal Creek Coal.

one who has used the Coal testifies to its SUPERIOR QUALITIES or making BRIGHT FIRES, it being FREE FROM SLATE AND ALL OTHER IMPURITIES.

full stock of LUMP, EGG AND NET COAL always on hand.

MANUFACTURERS BAR IRON, CASTINGS, MACHINERY, IRON FENCING, Railroad Spikes, Cut Nails, &c.

MINERS AND DEALERS IN Coal Creek Coal and Coke.

### Is the Collection of Taxes Postponed?

MARYVILLE, TENN., Feb. 5.

MR. EDITOR: The question to be settled now is, is the collection of taxes, postponed under the recent act of the Legislature?

The act passed amends an act passed March 23d, 1875, and amends the second and third lines of section 5 of said act, which said lines fix the time to be "on the first Monday of the third month next following the receipt of said tax book," when it shall be the duty of the County Trustee to make out and deliver to the Constables a certified statement of the unpaid taxes, etc. This section will be found on page 130, Acts of Tennessee for 1875.

On page 117, Acts of Tennessee for 1877, will be found an act passed March 26, 1877, in which it is provided by section 1, "that the County Trustee shall hereafter make and deliver the certified statements of unpaid taxes, now required by law to be prepared. On the first day of February, after his receipt of the tax books," etc. Further, section 5, of said act of March 26, 1877, declares, "That an act passed March 23rd, 1875, entitled, 'An act more cheaply to collect the State, county and municipal revenue,' be so amended as to comply with the provisions of this act."

Now, the act passed January 29, 1879, amends that part of the act of 1875, which was omitted by the amendment made in the act of 1877. In other words, the act just passed amends that which does not exist, because it was made void by the act of 1877, so the question now is, "is the collection of taxes postponed?"

### Our Wives

A woman ten years after marriage is often a tiresome sort of a person whose whole mind is absorbed in her housekeeping and children, her conversation seldom rising above the level of gossip and servants.

There is a great evil somewhere, but what is it? The husband acknowledges to himself that he is disappointed in the wife he has chosen, and yet he finds difficulty in pointing out his mistake, and hardly finds cause to blame her, for is she not a faithful wife, a devoted mother, and a most frugal manager? The mistake is a national characteristic. So passionate and intense is the American mind in pursuit of its temporary interests, that men will suffer the chains of business to bind them down and throttle them, while their wives bend beneath a similar yoke of duty at home.

What is lacking is the power to rise above the petty annoyances of daily life; we need to learn to distinguish trifles from affairs of moment, to know that every mole-hill is not a mountain. We need not forsake the upper stratum of sentiment, thought and idealism—the atmosphere of the soul—because we know there is a lower one of routine and smaller vexations, in which our feet are told to tread. To breathe in one is to receive strength and refreshment for exertion in the other. It is a good plan to pick up needles and pins from the floor, but picking pins ought not to be made the chief object of existence; for if we move along with our heads constantly downward, we most assuredly will see nothing better than pins and needles to the end of our days.

### Valuable Tree Wash

William Saunders, of the government garden at Washington, uses the following wash for fruit trees: Put half a bushel of lime and four pounds of powdered sulphur in a tight barrel, slaking the lime with hot water, the mouth of the barrel being covered with a cloth. This is reduced to the consistency of ordinary whitewash, and at the time of application half an ounce of carbolic acid added to each gallon of liquid. Mr. Saunders says: "I generally applied it in the spring, before the leaves make their appearance, but I am convinced that it would be more effective if applied later. But then it is difficult to do so when the tree is in foliage."

Pruning omitted last fall should be attended to now, as soon as the weather will allow. Grape-vines need the first care, and should be pruned long before the buds begin to swell. Currants and gooseberries start early, and should be pruned early.

Preparatory work in the way of trellises and other supports may be attended to and materials got ready. In the family garden, the best support for raspberries is a single wire, trained between posts at the ends of the rows, and we think that the best grape-vine trellis, is that with horizontal slats four feet apart, with upright wires where needed.—*American Agriculturist.*

### Whig and Chronicle

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma, and Consumption.

The reputation it has attained, in consequence of the marvelous cures it has produced during the last half century, is a sufficient assurance to the public that it will continue to realize the happiest results that can be desired. In almost every section of country there are persons, publicly known, who have been restored from alarming and even desperate diseases of the lungs, by its use. All who have tried it acknowledge its superiority; and where its virtues are known, no one hesitates as to what medicine to employ to relieve the distress and suffering peculiar to pulmonary affections. CHERRY PECTORAL always affords instant relief, and performs rapid cures of the milder varieties of bronchial disorder, as well as the more formidable diseases of the lungs.

As a safeguard to children, amid the distressing diseases which beset the Throat and Chest of Childhood, it is invaluable; for, by its timely use, multitudes are rescued and restored to health.

This medicine gains friends at every trial, as the cures it is constantly producing are too remarkable to be forgotten. No family should be without it, and those who have once used it will never be without it.

Minister, Physicians throughout the country prescribe it, and Clergymen often recommend it from their knowledge of its effects.

THE NEW YORK SUN FOR 1879.

The Sun will be printed every day during the year to come. Its purpose and method will be the same as in the past: to present all the news in a readable shape, and to tell the truth though the heavens fall.

The Sun has been, and will continue to be independent of everybody and everything, save the Truth and its own convictions of duty. That is the only policy which an honest newspaper can follow. That is the policy which has won for this newspaper the confidence and friendship of the people. It is the policy which is not enjoyed by any other American journal.

The Sun is the newspaper of the people. It is for the rich as well as for the poor, for the poor man against the rich man, but it seeks to do equal justice to all interests in the community. It is not the organ of any party, class, sect or party. There need no mystery about its policy. It is the honest, the honest Democrat as against the dishonest Republican against the dishonest Democrat. It does not take its cue from the utterances of any politician or political organization. It gives its support unreservedly when men or measures are in accord with the Constitution and the principles upon which this republic was founded; and it opposes them when they are in violation of those principles as violated as in the outrageous conspiracy of 1875, by which a man of the name of Hayes was elected President, where he still remains—it speaks out as freely as it can, and it is not afraid of any man or any party. It is in this respect there will be no change in its program for 1879.

The Sun has earned the hearty hatred of rascals, frauds, and humbugs of all sorts and kinds, and of all the dishonest politicians of the country. It has both the disposition and the ability to do this, and it is doing it. In this respect there will be no change in its program for 1879.

The Sun is printed for the men and women of the country, and it is printed for the sake of the day. It has both the disposition and the ability to do this, and it is doing it. In this respect there will be no change in its program for 1879.

The Sun will be printed every day during the year to come. Its purpose and method will be the same as in the past: to present all the news in a readable shape, and to tell the truth though the heavens fall.

The Sun has been, and will continue to be independent of everybody and everything, save the Truth and its own convictions of duty. That is the only policy which an honest newspaper can follow. That is the policy which has won for this newspaper the confidence and friendship of the people. It is the policy which is not enjoyed by any other American journal.

The Sun is the newspaper of the people. It is for the rich as well as for the poor, for the poor man against the rich man, but it seeks to do equal justice to all interests in the community. It is not the organ of any party, class, sect or party. There need no mystery about its policy. It is the honest, the honest Democrat as against the dishonest Republican against the dishonest Democrat. It does not take its cue from the utterances of any politician or political organization. It gives its support unreservedly when men or measures are in accord with the Constitution and the principles upon which this republic was founded; and it opposes them when they are in violation of those principles as violated as in the outrageous conspiracy of 1875, by which a man of the name of Hayes was elected President, where he still remains—it speaks out as freely as it can, and it is not afraid of any man or any party. It is in this respect there will be no change in its program for 1879.

The Sun has earned the hearty hatred of rascals, frauds, and humbugs of all sorts and kinds, and of all the dishonest politicians of the country. It has both the disposition and the ability to do this, and it is doing it. In this respect there will be no change in its program for 1879.

The Sun is printed for the men and women of the country, and it is printed for the sake of the day. It has both the disposition and the ability to do this, and it is doing it. In this respect there will be no change in its program for 1879.
