NO. 56

FOREIGN AFFAIRS.

The English Government Decides to Send Cavalry and Infantry to Ireland.

Emigration of Miners to New South Wales—Disappointment and Return of Many.

Austrian Comptrollers General of Finances in Egypt Depart for Their Post of Duty.

Prince Bismarck's Ailments Exaggerated—His Condition Not Serious.

LONDON, November 4.—It is stated in well-informed quarters that the government has decided to send two regiments of cavalry and a body of infantry to Ireland.

A dispatch from Capetown, dated October 22d, says Sir Garnet Wolseley has gone to the chief Secococaine country. All quiet in Transvaal. Colonel Lanyon has returned to Pretoria.

During the past few days the spirit of emigration has taken possession of a large proportion of the miners of Durham and Northumberland in consequence of most favorable news received from miners who recently emigrated to New South Wales, and who have been utterly deceived by promises of profitable employment there. This news will considerably check the emigration schemes. Large numbers of miners who left England during the recent strike in Durham are returning without having struck a pick.

George Augustus Sala, the well known writer, is about to start for a four months' tour in America.

A dispatch from Paris says that the first monthly united meeting of the English-speaking congregations in Paris to promote the progress of the Evangelical Alliance was held Monday, 3d inst. Rev. R. McAnagave an account of the operations begun by him eight years ago, and spoke warmly of the aid rendered him by the English and American ministers. Nearly all the English and American ministers in Paris were present at the meeting.

MANCHESTER, November 4.—The market yesterday was strong, producers asking higher rates. The demand for India and China was not large, but sufficient to sustain prices. The home demand continues small, though the activity is increasing.

VIENNA, November 4.—Baring and Debeigneras have left for Egypt, where their services as comptrollers general of finances are urgently required. The question regarding domain mortgages has been settled in the sense that rights of holders of those mortgages shall remain intact as against Rothschild's loan. Negotiation respecting commission of liquidation have so far been without any result, and if continued it will be through ordinary diplomatic channels.

BERLIN, November 4.—The reports of Prince Bismarck's ailments have been exaggerated and made to appear as if his life was endangered. There is no warrant for such statements. Bismarck suffers from neuralgia and gout. His physicians do not regard his condition as serious.

It is stated that Bismarck has requested the Russian government to withdraw a force of 20,000 cavalry from Poland, on the borders of German territory.

THE TRAIN ROBBERS.

Jesse James, one of the Notorious James Boys, Shot and Killed by a Companion.

St. Louis, November 4.—Dispatches from points in southwestern Missouri and Kansas say Jesse James, one of the notorious James boys, and supposed to be one of the gang who robbed the railroad train at Glendale, Missouri, a short time since, was shot and killed by a former companion named George Shepherd, about seven miles from Joplin, Missouri, and not far from Short Creek, Kansas, on Sunday.

The dispatches make different statements about the affair, but it seems that Shepherd and two or three men set out Sunday to capture part of the gang who were known to be on the road to Texas. Shepherd's companions were to hide in the brush while he joined James and his partners, consisting of himself, H. Miller, Jas. Coffman and Jas. Cummings. He found them in the woods, and after riding with them some distance suddenly shot Jesse James in the head, then wheeled his horse and fled. Cummings and Coffman gave chase and shot Shepherd in the thigh, but the latter escaped. Search was then made

for James's body but it could not be found, his friends, no doubt, having concealed it. Shepherd feels sure he killed James, having, he says, shot him squarely in the head. The country is much excited, and the woods far and wide are being scoured for the desperadoes. Shepherd was formerly a member of the James and Younger band, and was implicated in two or three robberies committed by them, and felt great enmity towards James for killing a cousin or nephew of his.

NEW YORK.

Severe Weather Encountered by Steamships Arriving from Europe.

Postoffice Box Receipts for Memphis Yellow Fever Sufferers.

Future Prospects of American Manufacturers—The Limitless Resources of the United States.

NEW YORK, November 4.—Steamships arriving from Europe report severe weather on the banks of Newfoundland, which detained them from twenty-four to forty-eight hours beyond schedule time. The steamship Albania from Cardiff, October 29th, was thrown so far over her side that it was difficult to keep her headed up to the gale, and the seas swept over her decks fore and aft, carrying overboard everything movable, and doing slight damage to the upper works.

The boxes which Postmaster James placed in the postoffice and at various stations in August last, to receive contributions for the Memphis sufferers by yellow fever, have been removed. Total amount received, \$1,031.

Postmaster James reports an unparalleled sale of stamps in his office during October. The sale of postage stamps amounted to \$282,762, and newspaper stamps to \$30,200.

Albert D. Shaw, United States consul at Manchester, in answer to the question "What is your opinion of the future prospects of the manufactures in England?" says: "Knowing as I do the almost limitless resources of the United States in raw material, I naturally incline to the opinion that American enterprise, backed by adequate cheap capital, will be equal to the future; and that our raw material, so wonderfully distributed over our vast continent, will be manufactured cheapest near the place of production. The genius of American inventors and growing skill of American operators, coupled with cheap lands and cheap food, certainly places us in a favorable position for winning the race in the international contest for the controlling position in manufacture."

In answer to another question, Shaw said: "Beer is the great curse of the poor classes in England. It deadens the moral and physical forces, and at the same time robs them of much of their hard earnings. This drink question is a serious one at present in England. Once an operative, as a rule, always an operative." In the matter of placing American farm produce, the consul said: "If shipments were made to responsible houses interested in produce, where sales would be made under their guarantee as to quality and condition, a great improvement would follow. I have known fifty packages of American butter to be sold at auction at Liverpool at sixteen cents per pound, forty packages of which, a week later, were resold by the purchasers for twenty-eight cents per pound, and the price of butter had not advanced in the general market in the meantime. This dealer sent the butter to his warehouse, carefully assorted it, branded it with his firm's name, and made a handsome profit, because he became responsible for the quality of the same."

There is a popular brewery in Munich called the Hofbrauhaus—Court Brewery—in which noble and plebeian mingle freely, the best of lager, like the cold hand of death, rendering all equal. The quantity of beer there imbibed may be judged from the recent observations of a visitor, as recorded in a German newspaper. At thirty-five minutes past ten in the forenoon two fresh hogsheads were tapped. One of them was empty at forty-eight minutes and the other at forty-nine minutes past ten. This would be about sixteen hundred glasses sold in sixteen minutes—doubles an exceptional occurrence even there.

The new Austrian Reichsrath is composed as follows: Sixty-eight lawyers, 135 landed proprietors, forty employes in active service or pensioned, eleven employes in private service, thirteen professors, thirty-six merchants and manufacturers, six railroad directors and engineers, six medical men, twenty-one clergymen of various professions, seven military men not in active service, four literary men and two members with no particular avocation. From this it will be seen that the class of landed proprietors heads the list, and next to them the legal profession.

At a coroner's inquest in Troy, New York, the other day a policeman on a witness stand was asked: "What are the duties of a police officer?" His reply was: "To see that everything is carried on; the different kind of drunkards; if a man's drunk and ain't disorderly he's all right."

RAILROAD ACCIDENT.

An Engine and Passenger Coach Run into a River.

HACKENSACK, N. J., November 5.—The passenger train this morning on the New York and Greenwood Lake railroad, composed of one engine and one coach, ran into the Hackensack river, owing to a drawbridge being open. Engineer Dexter was wounded by jumping before the locomotive reached the chasm. There were about twenty persons in the coach, mostly business men, living at Arlington, Mount Clair and Greenwood Lake, on way to New York. J. D. Walen, baggage-master, was sitting on the front seat of the passenger coach. He saw the fireman leap on the front platform coach, and running to the edge jump into the river. He then rushed to the door, and seeing the forward part of the engine just going over the draw, he himself jumped into the river. The particulars are not yet received. Only one person thus far is reported killed—Ira Baley, engineer, aged forty, and residing in Jersey City with his wife and family. His neck was broken and his head crushed. The wounded known are J. D. Wood, baggage master, back injured internally; F. D. Tuttle, of Mt. Clair, merchant in New York, badly cut and bruised—he was taken back to New York; Harrison, of Woodside, head cut and suffered internally—he swallowed water, which he vomited with blood—also taken back to New York; John Masker, fireman, seriously struck by striking a bridge; Wm. Stark, badly bruised, but not seriously hurt; Jesse Williams, brakeman, bruised about the head, side and arms. Others suffered from drenching and exposure of fifteen or twenty minutes in the cold water.

NEW YORK ELECTION.

ALBANY, N. Y., November 4.—The weather is cold and lowering. There has been great activity at the polls, indicating a heavy vote, but it is impossible to discover which ticket is receiving the most votes, scratching has been so general. Each party is divided on local issues, and all sections are earnestly at work. Never were there so many posters used at an election here.

INDICATIONS.

WASHINGTON, D. C., November 4.—For Tennessee and the Ohio valley, rising temperature and falling barometer, with east and south winds, and clear or partly cloudy weather.

For the upper Mississippi and lower Missouri valleys during the rest of Tuesday, southeast to southwest winds, falling barometer, slight rise in temperature, and partly cloudy weather.
