Round Stoves That Burn Wood and Coal.

The Universal at \$21.00 and Peninsular Hopper Feed at \$22.00 are two of the world's best heating stoves. These stoves are specially designed for burning hard and soft coal, but wood can be used nicely. We think that we can show you very conclusively that no other round stove made will burn coal as successfully.

We claim that they burn coal with less dust and smoke than any other oaks. The Hopper Feed and the Hot Blast attachment make this possible. The repair bill for grates, bowls, etc., on these stoves will positively not exceed 1/4 of those of any other stove having a double fire box. Look into this feature and see if what we say is not true. You can perhaps pay more money, but you cannot get a better article—we doubt if as good.

Some Little Jottings About Our Business.

We have just closed contracts with Frank Crowfoot of Almena and A. Buckhout of Oshtemo for Peninsular Furnaces.

From this date we will sell Portland Cement in lots of three barrels and over at \$1.50 per barrel.

We have 200 rods of No. 1155 American Fencing that we are closing out at 38c per rod. We expect a car of White Brick in a day or so.

We have about 50 dozen Bushel Baskets with covers on hand that we want to sell to parties having apples and pears to ship.
