The Exposition. We have been persistent in our endeavors to have those who have the management of the details of the Exposition with that degree of energy which the occasion demands, and whether we did any good or not is a matter of little consequence, since the things for which we labored have been accomplished. We are therefore glad to announce that everything has been, or is being accomplished which is necessary to render success certain so far as the decoration of the building and other outside matters are concerned. We now take this last opportunity of urging upon our farmers and fruit growers the importance of contributing their might to the interest of the occasion. It is a duty which we owe to ourselves as citizens of Giles county to do everything in our power to magnify the interest of the forthcoming Exposition of fruits, flowers, produce, &c., of our rich lands, and surely it needs no more urging to convince the good citizens of the county of this fact. We simply do it to show that there is no falling off of interest on the part of the management and of those who are conversant with the strenuous exertions that have already been put forth. Failure is not probable, or even possible, for who dare assert that this enlightened, enterprising and wealthy people would suffer an effort of such vast importance to rest upon even the contingency of failure. We must show to the large number of visitors who are sure to present the finest and most magnificent array of the fruits of our lands as never greeted their eyes before. The question has already been demonstrated that such a thing is possible, and we must take the immense success of last year as a mark to be overreached. These remarks are only applicable to those who have articles of any kind that will do to exhibit, and we have delayed a special appeal to them from the fact that the articles to be exhibited are in their nature transient and destructible and such of them have to be brought as in a fit state at the time. We conclude the last remarks we will be enabled to make in this regard by joining with the managers in a special and urgent request to producers of all kinds of articles, housekeepers, &c., to bring in every article they have that is beautiful or good, and thus help to maintain the position we have gained as among the foremost in the production of these articles, and also for the entertainment of the large concourse of visitors; and then when you have thus contributed to the exhibition, come and bring your families and neighbors and help to swell the enthusiastic audience of admirers.

Hard on Sole Leather. The corporation authorities have gone to a large expense to macadamize the public square recently, without assistance from the county. The corporate authorities deserve credit for their enterprise, but this is not what we started out to see. The "plank" we wish to make is, that the rough condition in which they have left the square is calculated to advance the price of sole leather. This is all very well for the dealer in sole leather, but there are more people who wear boots than there are of those who sell them, and this thing is working for the advantage of the few to the detriment of the many. Now, one or three things has to be "did," as far as we are concerned: Sole leather will have to decline, gravel spread over the sharp rocks, or we go bare-footed. In the name of humanity we ask, which do you prefer? You must either be the means of bringing starvation to the doors of leather-dealers, stone-buses to heels of many poor devils, or sharp rocks, that you were once as poor, perhaps, as any of us, and unless you comply with the foregoing request, you will compel many indignant indigent to "take dirt." There is not now a whole-sold man in Pulaski, and we ask our countrymen, what is the lack coming to if such things are allowed to be and exist? Sole leather is the soles of men will be the soles of sole leather, and the designers of the scheme to rob them of their rights be held in everlasting dis regard. Haul away your rocks or cover them up.

Gen. Alfred Pleasanton is the man who was informed by the President that Senator Schurz could have all the patronage he wanted to control, provided he would support the ratification of the San Domingo treaty. Pleasanton states this pointedly over his signature.

On Saturday next there will be a public barbecue at Hollie's Spring on Leatherwood creek, to which all persons who feel any interest in a turnpike road from Pulaski out in that direction are invited. Now is a chance for Pulaski business men to manifest their interest in this matter. Let every one of them who wants to see a pike built be sure to go. We have dabbled with this question long enough, and now that our country friends are in earnest, let us encourage and help them.

A CALL. The Election. The result of the election last Tuesday is given in detail by a tabular statement elsewhere in this paper. The day passed off quietly, and we believe the people and the candidates too are glad that the agency is over. We hope and believe that all the county officers elected will make good officials, and though there may be regrets, that some who have heretofore been faithful and efficient have been displaced, and others good and true defeated, yet we feel assured that, all both candidates and people, will cheerfully acquiesce in the result. The saddest thing connected with the day, was the defeat of the best qualified man in the State for Criminal Judge.

A Series Loss. Our friend, Mr. P. H. Bass, of the Pisgah neighborhood, has just returned from a visit into West Tennessee, where he went for the purpose of finding a suitable place to locate. He informs us that he rented lands with a view to purchasing, and will soon move out. We regret to lose such a good man and citizen as Mr. Bass, and we hope the people among whom he intends settling will appreciate the sterling worth of such a gentleman.
