A Bold Robber Attacked. Mr. J. B. Yancy, of the station, was the victim last Sunday morning of a murderous attack by a negro named Ellis Inman. Mr. Yancy is a merchant and was sleeping at the hotel on the corner of the street in the morning. He was awakened by a knock at the door. Opening it, the negro, whom he knew very well, entered and said he wanted to buy some goods. Mr. Yancy pointed to the shelf on which stood his customer ordered until the bill amounted up to about \$15. The negro told him that he wanted a card of business. Mr. Yancy turned to the shelf to get his card, and the negro, who had his back to the door, and was in the act of taking them down when he was struck a very heavy blow on the back of the head with a stick or pole, which he had thrown across the counter at him. He was completely stunned though not knocked down, and when some moments afterwards he came to his senses he saw that his assailant was still in the room and run some steps from the door, but had stopped and was looking back to see what had been the effect of his murderous assault. Mr. Yancy called to the negro to stop, but he fled before he did. That is to say, "You must pay me for not marrying my wife yourself before I got a chance to marry her." But this view does not seem to be the true merits of the case. A report of this comprehensiveness would compose such literature as the Citizen don't publish.

Last week they concluded to try it off the pike and the very first load the wagon broke down and the rest of the load was more than several months' pikeage. Is there a man out in that country who travels and hauls to town at all who has not saved more in wear and tear of vehicles than he has paid out for pikeage? Some may deny it, but we believe it can be proven. These immense loads did no appreciable damage to the pike.

The Ed. B. Craig baseball club hereby challenge the Lan. R. Coopers to play a match game of ball on Thursday, August 6th.

1. Harry Biddle. 2. Aaron Grigsby. 3. Ross Bumpass. 4. Sam Orr. 5. Nathan Adams. 6. Thos. S. Shuman. 7. Ed. Robertson. 8. Earnest Dyer. 9. Charley Bunch. 10. Howell Graham.

HON. ROBT. GATES COMING.

The Assistant Commissioner to Address the People of Giles.

Col. Robt. Gates of Jackson, assistant commissioner of agriculture, etc., will address the citizens of Giles county on agricultural topics in Pulaski, Wednesday, August 12. Col. Gates is a scholarly gentleman and an original and practical farmer. His whole heart is imbued with the great importance of agricultural and industrial development. He has done some valiant work for the masses and his labors have been so effective that he was induced to resign his newspaper and enter regularly into the service. Ought not the farmer's association have a barometer of something of the kind to attract a large assembly of farmers? Col. Gates wants an intelligent ear for he has things to say that pertain to our material welfare. Let it be the purpose of each farmer who reads this notice to find out why and bring his neighbors with him and have one big farmers' day.

The Public School Status. It is a desirable thing that the free graded school may be established this fall in Pulaski. The plan proposed is a concentration of the district and corporation funds in one school for this term, allowing all children in this school district to enter. This must not be a permanent arrangement, however, for it is of vast importance that the school and its benevolent friends to actualize the plan of the corporation. The board of aldermen held a meeting last Thursday and made arrangements to make the refunding bond required by the charter of the school. The district has already about \$2200 on hand and this is ample for a five months' start. We are informed that there is very little opposition to this consolidation of schools. At the August election next month of a school director free schools will be made a square issue and the strength of the opposition to it is being tested. It begins and its benefits are realized the opposition will subside. An incident happened Tuesday which illustrates its effects. A gentleman from the country was found making overtures to rent a house in Pulaski and the man from whom he sought to rent is one of the most restless enemies of the system. He was inquiring that house was inside the corporate limits here he rented, when a bystander said: "Why surely, Mr. Smith, you don't wish to come to town to be taxed to death." "Yes, sir, I do," he replied, "I want to have free schools and I want to move in and be taxed and get the benefits. To move in and well take care of the school. It took the breath clean out of the arguments that have been used against it. It promises to be a parallel case of that in Columbia where a houseowner earnestly protested that they would not allow a building to be taken his house for free schools. They persisted in it, however, and in the end it was found the tax was just \$6 and the house rented for \$100. They robbed \$9 and gave him \$100 in return.

July Term Circuit Court. Judge W. S. McMenore and Attorney General Fussell arrived here on the morning of the 23rd inst. and the July term of the circuit court of Giles county convened before their arrival. The court was occupied nearly all day yesterday and Tuesday afternoon trying a very novel damage suit, which attracted large crowds to the court room. The complainants in the suit are man and wife who are suing the defendant for breach of promise of marriage, alleging the offenses to have been committed before their marriage. One view of the case presents the novel spectacle of the complainant suing the defendant for not marrying her (the defendant) before he did. That is to say, "You must pay me for not marrying my wife yourself before I got a chance to marry her." But this view does not seem to be the true merits of the case. The Prospect in Giles.

For a while it seemed that the growing crops were going to be drowned out by excessive rains. It rained almost every day for more than a month. Everybody got blue on account of it and the farmers made themselves blue by prognosticating a heavy loss. In fact, at the time corn should most need rain. The dark side of the picture was that cotton and wheat would be ruined by the rains and when they should be reaped they would rot in the field. The other side of the picture now. True, the light wheat crop was somewhat damaged by the heavy and continued rains at planting time and the corn on low lands was damaged or perhaps killed, but the loss in these instances was greatly overbalanced in others. The rain pushed the old corn and fat on uplands and at the same time gave body and size to the cotton plant, and for the last few weeks we neither had too much rain for the latter nor too little for the former. Corn is almost made up and the prospect is for an abundant yield all over the county, as we learn from our correspondents from the various districts and other sources. One or two more rains would be a blessing in plenty of fat hogs in the fall. As to cotton, an experienced farmer, who was living and farming in Giles many years before the writer was born, told us one of the weeks that he never in his life saw finer weather for the development of this crop. The plant is large as a general thing and is not shedding to hurt. The hot sunshine of the last few weeks has done much for the cotton in Giles and without a very unfavorable change in the weather there will be a good crop. With this prospect of plenty of cotton and the fact that more could be made happy and contented. Without asking, however, they have in addition, as the gift of a magnificent providence and a reward for their industry, one of the most abundant yields of fruit that has occurred for many years. This of itself, if the immense crop is not permitted to waste, will more than compensate for the deficit in the wheat crop. All that is necessary for the farmer to do to make this a most prosperous year is to save the fruit. Though the crop is immense there is a market for it in some cases it must necessarily be sold at low figures, but all that is realized by its sale is clear gain, and none of it ought to be allowed to rot. If it is inconvenient to market it, green, haul it to an evaporator or dry it over the old style. There is always a market for evaporated or dried fruit. When has there been a brighter prospect for the farmers of Giles than at this time? They ought to be happy and thankful.

Knights of Pythias Picnic.

Twenty-four persons composed the K. of P. picnicking party that went to Elkton Springs last Thursday morning. A jollyer than a dozen than they were for the thirty hours spent in making the trip have rarely, if ever, visited that watering place. At 3 o'clock, p. m. Thursday morning they left town by train, in vehicles, each Knight accompanying a lady, and arrived at Elkton just in time for supper. Pulaski's best string band had been ordered to be on hand and those who preferred dancing to rolling ten pins or strolling in the moon light, spent the evening in the ball room, the campers joining in all the sports and adding much to the enjoyment of the picnickers. Friday was spent most pleasantly. There was dancing, ten pins, cards, a splendid buffet dinner, a neat address on Phylanthropy by Capt. C. P. Jones and other sources of enjoyment, all of which were drawn forth for a full measure. The party returned to Pulaski that night, reaching here about 10 o'clock.
