

"I have suffered Our Washington Letter

several weeks with a very obstinate cold and malarial fever resulting from inactivity of the liver, and was feeling very miserable indeed. I procured a package of

St. Joseph's Liver Regulator

and used it as per printed directions, and after the first dose I felt decidedly better; a few more doses seemed to regulate my entire system and I am perfectly well again. I can recommend this Liver Regulator to all who suffer from such complaints as those named on the tin box."

S. G. GOSS,
Vice-Pres. Goss Printing Press Co.
Chicago, Ill.

St. Joseph's Liver Regulator has been on the market for twenty-five years—it is put up in large tin boxes—it is guaranteed to give satisfaction and keep its full strength in any climate. It should be used in all cases of indigestion, constipation, biliousness, dyspepsia, Sour Stomach, Dropsy, Liver Complaint, Heart Palpitation, Chills and Fever, and all derangements of the liver and kidneys.

Our Washington Letter

Story of Secretary Taft, Who Will Enter the Presidential Race—Comptroller to Rigidly Enforce National Banking Laws—Other Notes of Interest.

WASHINGTON.—The rumor of Secretary Taft's presidential ambitions is again broad. Although no authorized statement making known his candidacy has ever been given out by the ponderous head of the war department, the story that he will seek the Republican nomination at the next convention is circulated with great regularity.

The present rumor says the secretary is about to decline the offer of a seat on the supreme bench, made to him some time ago, and that he will then enter the field for the nomination.

Speaking of the big war the secretary recalls the following story: A certain colonel in the army, within two years of the retiring age, was ordered to the Philippines. He didn't want to go. He thought it ungracious on the part of the war department to send him so far away when he was almost ready to drop out.

His protests availed nothing, and as a last resort he had a few of his friends call on Secretary Taft and suggest to the secretary that it would be a very nice thing to allow the colonel, who had served the country well for so many years, to remain at home instead of being sent off to the tropics.

Secretary Taft listened patiently. His friends made all the arguments about long and faithful service.

Then, as a clincher, one of them said:

"And, Mr. Secretary, you have lived in the Philippines and you know about the climate there. To be frank with you, the colonel is not well. He is getting very fat and we are afraid he can't live over there."

Taft took a slow survey of his own 300 pounds. Then he asked gravely:

"Did Taft live?"

BLEW UP HIS OWN HOUSE.

The late Daniel V. Colclazier, whose death occurred the other day, was a conspicuous figure during the confederate attacks on Washington during the civil war. Mr. Colclazier and his family then fled to his farm not far from Fort Stevens. On the advance of the confederates he hastily brought his family to the city, and then immediately returned to the fort. By that time the guns of the fort were in action and the enemy was approaching. Mr. Colclazier, noticing a confederate ammunition wagon near his house and observing that one of the union guns was idle, went to the commanding officer and volunteered to work it, saying that he had had experience in that line as a militiaman. His offer was accepted and he trained the gun on his own house, which with a few shots was demolished.

When President Lincoln came upon the scene Colclazier being the only man not informed at the guns, the attention of the president was engaged and he, learning the circumstances of Colclazier's presence, the president directed him to call on the secretary of war the following morning. This Mr. Colclazier did and he was sent to Gen. L. C. Baker, who appointed him on his force of secret service men and one of the bodyguard of the president. Mr. Colclazier was made a sergeant.

On one occasion when Mr. Colclazier was in this bodyguard, a week or ten days before the assassination of the president, he had an exciting time near the soldiers' home. Mr. Lincoln had just alighted in front of his summer residence and had scarcely taken two steps on the walk when a sharp report was heard. The mounted men with all haste rode in the direction whence came the report, but failed to come up with the party of would-be assassins, who rode down Seventh street into the city. The secret service men learned that four or five men were in the party and that at Boundary avenue they scattered in different directions. The bullet first grazed one sleeve of the president's coat.

BANK LAW TO BE RIGIDLY ENFORCED.

Directors of national banks who, by constantly ignoring the law, threaten the solvency of the banks with which they are connected, are to be made examples of by the treasury department. Hereafter the law regulating the making of loans by national banks is to be rigidly enforced and the first bank that willfully and flagrantly violates it will have its charter forfeited. This statement was made by a treasury official the other day while discussing the failure of a Massachusetts national bank.

The downfall of this bank was due to an aggravated trouble of which a surprisingly large number of other banks are guilty—excessive loans to bank directors and officers.

The admission was made at the treasury department that two-thirds of the banks habitually disregarded the limitations of the law in regard to the amounts of loans that may be made. What is more, the department is regularly informed of these violations of law, which are duly reported to the controller of the currency by bank examiners.

In other words, the treasury department winks at violations of the law which every now and then wreck a bank.

It has long been the custom of the controller of the currency to ignore the law, to permit the banks to ignore the law, and to permit the banks to ignore the law. This is a step which controllers of recent years considered too drastic to be taken, with the result that not a single bank has been subjected to anything more severe than a reprimand.

A new policy has been decided upon by the controller of the currency. Hereafter he will require banks to live strictly up to the law, and in order to convince the banking world that he is in earnest the controller will inflict the full penalty—forfeiture of charter—on the first bank whose directors willfully violate the law limiting the making of loans. A new law was passed at the recent session of congress, giving to the banks greater latitude in lending money. Prior to this enactment individual loans were restricted to ten per cent of the capital of the bank. The new law permits loans of ten per cent of the capital and ten per cent of the surplus, but in no case shall they exceed 50 per cent of the capital. These provisions are to be rigidly enforced.

STRANGE OCCUPATIONS OF WOMEN.

Someone with a talent for figures and an earnest interest in the sex has been making over the last government census and extracting therefrom a bundle of statistics showing some of the strange occupations in which the women of our country are engaged.

A brief glance at this interesting list is enough to reform any mere man who might have thought that woman is a "frail creature," only fit for fancy feather sticking and similar dainty pursuits, and so entitled to the gentle consideration of the sterner sex.

The sex has surely "arrived" and no longer stands in need of protection when it is stated that about one-third of the adult women in the United States are earning their own living, not counting those who are surely earning a living after the good old orthodox fashion, in cooking, sweeping, sewing and spanking, and performing the other duties incident to raising broods of children and maintaining homes for husbands.

It is well known by this time that women have invaded the business world as stenographers, bookkeepers, confidential secretaries and what not, and that they have become doctors, lawyers and ministers without number, and that thousands of them have achieved proprietorship in many lucrative branches of business.

Yet a glance at the official list of occupations in which thousands of others are gaining a livelihood is calculated to scare the breath out of sturdy manhood. Who, for instance, would imagine that there are feminine fishermen and oystermen to the number of 1,805 in the United States? That is the number according to the census schedule, and further than that, there are 1,947 stock raisers and drovers and 1,320 women are listed as "guides, trappers, hunters and scouts."

These are some of the leading occupations, but there are others without number, and when a list of the sort contains 213 lumbermen and woodchoppers, 154 sailors, 43 hack drivers, 136 blacksmiths, 31 bricklayers, 26 switchmen, six ship carpenters, 167 masons, 126 plumbers and 879 policemen and watchmen, who will dare to say that woman's sphere is in any way restricted?

The census figures help to explain, perhaps, why it is that a man out of a job has so hard a time trying to land another one that will give him a living.

RULES TO REGULATE FOODS.

A syllabus has been prepared by the commission appointed by the secretary of the treasury, the secretary of commerce and labor and the secretary of agriculture to formulate rules and regulations for the foods and drugs act, commonly known as the pure food law, in order that the suggestions interested parties may have to offer may be presented in a systematic and compact manner. These suggestions will be offered at a hearing to be held in New York between September 17 and September 23. The syllabus divides the questions of ruling into 12 groups.

They deal with the original package as prepared for export, the collection of samples, hearings and publications, the use of colors, flavors and preservatives, misbranding of foods and drugs, mixtures, compounds, imitations and blends, proprietary foods, drug adulteration and misbranding confectionery, the establishment of the government guarantee and the inspection of imported goods.

Circulars announcing the field to be covered are being sent out to all the food manufacturers interested and those who wish to appear either in person or by proxy or who wish to file briefs are directed to make their request to Dr. Wiley, of the department of agriculture.

North Dakota Solves the Adulteration Problem.

North Dakota seems to have found the key to the question, "How shall we protect the people from frauds in manufactured products?" A new law has recently gone into effect designed to make it impossible to deceive people into buying inferior and adulterated paint under the impression that they are getting real paint, viz.: pure white lead and linseed oil.

The North Dakota lawmakers did not attempt to absolutely prohibit the inferior pigments, or mixtures of pigments. They adopted the slogan, "Let the label tell," and then left to the people to buy whichever they wished.

Under this plan, if any one wishes to buy a mixture of rock-dust, ground quartz and other cheap elements which are found in many paints and so-called "white leads," no one can object; for they do it with their eyes open. But if they prefer genuine white lead and linseed oil, they can be sure of getting it, for none but the genuine article can bear a label which says "pure white lead."

In all other States mixtures are often sold as pure white lead which contain little—sometimes no—real white lead.

It would seem that were this same principle applied to food, beverages and all other prepared articles, where deception is practiced upon the buyer, the question would be solved. It would leave us free to buy what we pleased, but would protect us from unwittingly buying what we did not want.

DONKEYS TURN UP TOES.

Don't Know Enough to Get in Out of the Rain.

The war department has learned through experience that the American donkey has no sense enough to live in the Philippines.

Some time ago, more in the nature of an experiment than for any other reason, the bureau of insular affairs sent a dozen American donkeys, commonly known as "burros," to Manila for use among the Spanish-speaking people. The natives did not take kindly to the new species, however, but rather looked at them from afar off.

Seven died. Such was the news received at the bureau recently. When the torrential rains set in the little animals were caught out in the open, and not knowing how to shelter themselves like the native beast of burden, seven docile, dumb beasts turned up their toes.

"They ought to die," said a war department official who has deep interest in everything pertaining to the Philippines; "they ought to die if they don't know enough to get in out of the rain."

All Chemically Pure.

The mistaken idea of a few years ago, about Alum in Baking Powders being injurious, no longer prevails, or scarcely exists. It is a well established fact by chemical analysis that Cream of Tartar being less volatile than Alum, when exposed to heat, is not entirely vaporized as is the case with Alum, but leaves a residue in the bread, which is injurious. Alum, on the contrary, is entirely evaporated while performing its function during process of baking, leaving no atom of injurious residuous substance. The words "Chemically Pure" erroneously used to designate Cream of Tartar from Alum baking powder is a misnomer. Baking Powder made of pure Alum is as chemically pure as made from pure cream of tartar. These words mean nothing more nor less than pure chemicals, and in no way can they imply that one baking powder is Alum and another Cream of Tartar. Alum has been declared to be wholesome; an established fact. Every large water system in the cities along the Missouri river use Alum in large quantities to purify the water before pumping it into their water mains for consumption. Cream of Tartar baking powder is perhaps good enough for any one; Alum baking powder is better, and very much cheaper.

The Central American Soldier.

These barefooted soldiers are antagonists not to be despised. Nearly worthless in attack, they are nevertheless tenacious in holding a position, a trait that comes from their Spanish descent probably. In the Cuban campaign Gen. Garcia is said to have veiled in reply to the remark of an American officer: "The Spaniards never attack." This may have been true in the main, but the defense of the trenches at Caney showed that the Spaniards would hold a position with as much courage and tenacity as any other troops. The Central and the South Americans have not generally showed much steadiness in war, but there have been occasions when their conduct has been conspicuous for gallantry, and all the virtues which go to make up the stalwart soldier.—N. O. Times-Democrat.

To keep your auto looking bright use the following mixture for all painted parts: Spermin oil, one-half pint; common vinegar, one-half pint; oil bergamot, one dram. Mix and rub with clean cloth. For all brass work use lubricating oil, one-half ounce; gasoline, three quarts. This is one of the best cleaners for all polished brass.

If you contemplate buying a medium priced automobile and want to be certain of securing a car suitable for touring on country roads, up hill as well as down hill, you will make no mistake in buying either a Buick, Maxwell, Mitchell, Reo, Knox, Franklin or Queen. These range in price from \$750 to \$2,000.

Automobilists in Shanghai.

There is no speed limit for autos outside the city of Shanghai, China. Within the city 30 miles an hour is allowed.

THE WINNING STROKE

If more than ordinary skill in playing brings the honors of the game to the winning player, so exceptional merit in a remedy ensures the commendation of the well informed, and as a reasonable amount of outdoor life and recreation is conducive to the health and strength, so does a perfect laxative tend to one's improvement in cases of constipation, biliousness, headaches, etc. It is all important, however, in selecting a laxative, to choose one of known quality and excellence, like the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., a laxative which sweetens and cleanses the system effectually, when a laxative is needed, without any unpleasant after effects, as it acts naturally and gently on the internal organs, simply assisting nature when nature needs assistance, without griping, irritating or debilitating the internal organs in any way, as it contains nothing of an objectionable or injurious nature. As the plants which are combined with the figs in the manufacture of Syrup of Figs are known to physicians to act most beneficially upon the system, the remedy has met with their general approval as a family laxative, a fact well worth considering in making purchases.

It is because of the fact that SYRUP OF FIGS is a remedy of known quality and excellence, and approved by physicians that has led to its use by so many millions of well informed people, who would not use any remedy of uncertain quality or inferior reputation. Every family should have a bottle of the genuine on hand at all times, to use when a laxative remedy is required. Please to remember that the genuine Syrup of Figs is for sale in bottles of one size only, by all reputable druggists, and that full name of the company—California Fig Syrup Co., is plainly printed on the front of every package. Regular price, 50c per bottle.
