

RICHMOND HOWITZERS.

CONTINUATION OF THE PAPER ON THAT COMPANY.

Transpirings During the Year 1861—Description of the Country Where Some of the Battles Were Fought—The Advance Upon Longstreet.

It will be remembered that the First company of Howitzers with Bonham's brigade had reached the south side of Bull Run about sunrise on the 15th day of July, 1861. They were posted behind some light works composed of felled trees and earth, and were immediately supported by Bacon's Seventh regiment of South Carolina volunteers. By 9 o'clock A. M. clouds of dust and the distant rumbling of wagons on the opposite hill indicated the arrival of the enemy in front of Beauregard's army. An hour or two afterwards his batteries opened fire upon the line occupied by Bonham at Mitchell's ford, an advance which held back Bonham's force to the right. In order that the reader may understand the position of a Confederate army at this time, a short description of the country is necessary. Beauregard's forces were now on the south side of Bull Run, facing northward. His line stretched from west to east about eight miles. Roads from different parts of the country behind him crossed Bull Run at intervals of several miles. These roads were named successively from east to west as follows: Lee's, Miller's, and his extreme right, then McLean's, then Black-Burn's, then Mitchell's, then smaller crossings. Roads from the north crossed Bull Run at intervals of several miles. These roads were named successively from east to west as follows: Lee's, Miller's, and his extreme left bank of the army.

THE COUNTRY. Behind Bull Run the country sloped upwards as a rule, and was at intervals cut by a small stream. This was especially the case at Mitchell's ford, to the right of which the Howitzers were posted. This was the right flank of the army, an important point, and one which it was supposed the enemy would first assault with the hope of breaking the line. In fact, on the 15th and 16th of July, the Howitzers were called upon to fall back upon the works at Manassas, five miles to the rear. The hills in front of Beauregard's line were higher than those on the south side of Bull Run, and commanded all the approaches to the stream just described. At the foot of these hills were low lands of more or less extent, through which the current of Bull Run ran. To the right of Bonham's brigade at Mitchell's ford was Longstreet's brigade, holding Beauregard's right flank. On the 15th of July, the enemy advanced upon the opposite hills, sending a shell into the Howitzers' position. This was the first time the volunteers of the Howitzers were called upon to fire. The enemy's advance was entirely composed, had ever been under fire, it is not known. The distance was too great to allow of their returning the compliment with the small, smooth-bore artillery at their command. Towards midday the firing of the enemy became much heavier, and was directed more particularly towards Black-Burn's ford. It became evident that he intended something more serious in that direction than merely shelling the woods. It was also noticed that he appeared to be concentrating a large force of infantry immediately in front of Longstreet's position.

RECONNOISSANCE. At this juncture, and when it had become important to find out something more definitely in regard to the movements and numbers of the enemy at that point, a daring and successful reconnoissance was effected by two young soldiers of the company, viz., Virginia Volunteers, George Martin and Tazewell. They volunteered on this duty. Leaving the line, while the regiment was under cover of the trees and grass, they crept along through the bushes and brush, and masses of felled trees across the bottom at the foot of the opposite hills. They were long enough to reconnoitre. Then they slowly and cautiously crawling up the slope they finally reached a point some thirty rods from the enemy's position, and from some estimate of his numbers. Had they been discovered instant death would have been their fate. In fact, they were so close to their line of skirmishers at this moment, their safe return would have been impossible. As it was, after having accomplished their mission, they returned to their command and gave confirmation of the designs of the enemy.

ADVANCE OF THE ENEMY. An hour later the enemy advanced in force upon Longstreet at Black-Burn's ford. This was the battle of Bull Run, which was fought and won in sight of the Howitzers, but as they were every moment expecting to be needed in defeating the adjacent Ford Mitchell's, they could take no part in the action. After three ineffectual attempts to carry Longstreet's position the enemy was repulsed with heavy loss, and finally driven off the field. During the last assault made upon the Confederates in this conflict, the Howitzers were called upon to fire. The first shot fired by the Howitzers was a long range shot, which was fired by the Howitzers at Mitchell's ford. The Howitzers were called upon to fire by the Howitzers at Mitchell's ford. The Howitzers were called upon to fire by the Howitzers at Mitchell's ford.

DAMAGE TO THE GUNS. Preceding the damage done by Eschelman's guns, Captain Ayres' batteries were called upon to fire. From this commanding position he fired upon the Washington artillery at first with great effect. Captain Eschelman could not directly make out the location of his opponent, and had to direct his fire chiefly by the smoke of Ayres' guns. Under these disadvantages the Howitzers were called upon to fire. The Howitzers were called upon to fire by the Howitzers at Mitchell's ford. The Howitzers were called upon to fire by the Howitzers at Mitchell's ford.

A Perfectly Independent Lady. The Queen Dowager of Portugal doesn't care for shows. She recently bought 1,000 pairs of shoes in Paris, and ordered several dresses from Worth. The dresses were lost on the way from Worth. The dresses were lost on the way from Worth. The dresses were lost on the way from Worth.

A Long-Lived Sovereign. The Queen has now completed her 71st year, an age which has been exceeded by three only of her predecessors on the throne. viz., George III., George III., and George III. The Queen has now completed her 71st year, an age which has been exceeded by three only of her predecessors on the throne.

Honors to the Italian Prince. It is believed, from the extraordinary honors recently paid to the Italian Crown Prince in Germany, that a match between a German Princess and this heir to the Italian throne is contemplated. If at the same time Crispieri carries out his intention of making King Humbert Emperor of East Africa, the Italian monarch will have pretty nearly reached the summit of his earthly ambition.

How to Cure All Skin Diseases. Simply apply "Swayne's Ointment." No internal medicine needed. Cures itching, eczema, itch, all eruptions on the face, hands, nose, &c., leaving the skin clear, white and healthy. Its great healing and curing power is unexcelled. It is sold everywhere. Ask your druggist for Swayne's Ointment.

Sick Headache. Can be and is daily cured by Dr. David's Liver Pills.

Act Well Your Part. Yes, this is what Dr. David's Liver Pills do, and everybody praises them.

ROUND ABOUT GOTHAL.

LATEST FADS AND FANCIES OF THE BIG METROPOLIS.

Strauss' Orchestra to Open Madison Square Garden—A Magnificent Amusement Palace—Cleveland and Lamont—Odds and Ends of Various Kinds.

NEW YORK BUREAU. RICHMOND DAILY TIMES, June 14, 1890. Edward Strauss and his Vienna court orchestra, will be heard for the first time in New York at the opening of the new Madison Square Garden, on the evening of June 15th, when the great amphitheatre, with its two hundred boxes and two thousand seats, will be occupied for the first time. Built on the old site of former structures, devoted to similar objects, the new garden will be the natural goal for seekers after the variety of entertainment, of which the promoters of the garden propose to make it the home. The garden is like a huge shell, enclosing a little less than the entire area of the square which it is to occupy. It is expected the stage is at the eastern end, and opposite the stage are the stalls, rows above rows, arranged with an elevated invitation to exclusiveness and exclusivity. On the opening night the stage will be a veritable scene from fairy land. The miralicious of life, known only to fairy land, and the romantic extravagancies of grand opera, will lend their scenic effects to the work. It is expected beams that cross each other in the superstructure of the vast auditorium are strung with lines of electric globes that make the roof seem like a starry firmament. To have the garden ready for the reception of the public on the date set for the opening night, armies of men have been kept at work. It is expected that the garden will be ready two or three days before the appointed time, so rapidly are the departments being finished.

THE GARDEN. The Garden was erected at a cost of \$3,000,000. It is built of cream-colored brick and terra cotta in the renaissance style. The pillars supporting the entrance are of polished granite, and the entrance hall and porch are in marble with mosaic floors and marble. There are also grand entrances on the west and east sides. The decorations are chiefly in quiet tints, which lend harmoniously and are in perfect taste. The stage contains more superficial space than any stage in the world. The floor is divided into orchestra and parterre, containing chairs and the parterre tables and chairs. There are two tiers of seats and three tiers of boxes, with a large promenade extending all around the interior of the building. The box of state is directly over the main entrance. This box will hold fifty people when thrown open, or it can be divided into ten boxes holding five persons each. The enormous sliding skylight, covering nearly half the roof, is a notable feature. It is made of machinery, and on hot summer evenings it can be raised back, and the great building perfectly ventilated. On the Madison square side is the restaurant, first floor, which is just double the size of the Brunswick or Belmont's. Its location is unrivaled, looking out as it does on the park with its beautiful lawns and brilliant flower beds. The concert hall is just over the restaurant, and is connected with it by a broad marble staircase. The garden theatre, which will be open in the fall, is a large building of the main entrance. The height of the tower will be 200 feet, and as it will command an extensive view, it will be an object of interest to tourists and visitors as well as New Yorkers. Electricity is used in lighting the entire building, and in the amphitheatre alone there are 4,000 lights.

THE FAMOUS LEADER. The famous orchestra leader has been the idol of the women of Vienna for a great many years. The manner in which he leads his orchestra will be a subject of interest to New York. It is claimed that it is peculiar like all his famous family, Edward Strauss leads with the assumption that he actually feels the effect of the music in every fibre of his body, and he sways to and fro, flourishes his arms, and twists his body with a rhythmic motion suggested by the strains of the dances which he leads. His stature is small, but he is quite lively, which adds to his apparent height. His sole interest in life is his leadership of his orchestra, which he has made almost a part of himself.

CLEVELAND AND LAMONT. Daniel S. Lamont and ex-President Cleveland are the modern edition of Damon and Pythias. In Mr. Lamont's law office, in the Mills building, occupying the place of honor, is a photograph of the late President, which was taken towards the close of the administration to Washington. Represents the President and members of the cabinet, Mr. Lamont says, it was taken while the cabinet was in session. The photograph was taken by the instantaneous process, and the subject never fully conscious that their pictures were being taken.

ON THE EAST SIDE. An Italian funeral is about the liveliest and gayest sight that can be seen on the streets. The way to the cemetery is northward through several streets, and the sight is almost daily seen. The windows of the carriages are open and the curtains fly. There are no signs of mourning to be seen except in the first carriage. The women wear their gayest head-dresses, and the children are clad in the costliest of their dresses. Bells with red and black flags, and all chatter as if for a holiday.

With some of the water-side characters of New York, we served the double purpose of soap and water. During the noon hour many of the workmen along the river front may be seen scrubbing away at their grimy hands with a piece of soap and water. This is the way they do it, and it is the best way to keep the hands clean.

On the East River front the small form that trade between this port and the tropics have their pier. Of the many things they bring to us, the most interesting is a kind of soap, which is made of coconuts. They are brought up from the hold in baskets, and the coconut handler takes a tin in each hand, cracks the two together, and the soap is ready for use. The soap is very good, and is used for many purposes. It is used for washing clothes, and for many other purposes. It is used for washing clothes, and for many other purposes.

Why do you suffer with Catarrh? It is the most common of all ailments, and is caused by a diseased condition of the bladder. It is characterized by a burning pain in the urethra, and by a discharge of a thick, yellowish fluid. BUENA VISTA.

The Growing Manufacturing Town of the Virginia Valley.

Situated in Rockbridge county, 187 miles from Richmond, 30 miles from Lynchburg and 9 miles from Lexington, on the spur of the Blue Ridge, it is connected with the principal centers of the county by the Chesapeake and Ohio, Baltimore and Ohio and Shenandoah Valley Railroads, and enjoys a delightful climate and splendid water, besides boundless quantities of

Superior Iron Ores, Manganese and Other Valuable Minerals and Clays.

A COMMODIOUS AND WELL-MANAGED HOTEL IS ALWAYS OPEN TO THE PUBLIC. The town now has a population of 1,200 souls, with two Churches, Public Schools, Electric Lights, National Bank, and is modern in all its details.

A PLACE FOR INVESTMENT. As a place for investment it offers opportunities rarely presented. The following is a list of some of its industries: Buena Vista Company, Advocate newspaper and job office, Furnace Plant and Iron Company, Steam Tannery, Stationery and Paper Mills, Harness and Saddle Company, Woolen Mills, Tin Works, Electric Light Plant, Printing Mills, Saw Mills, Fire Brick Works, Wire Wagon Works, Fence Factory, Water Works, Four Building and Improvement Companies.

A. T. BARCLAY, President. Buena Vista, Va.

Or J. D. ANDERSON, Secretary and Treasurer.

Bedford City Land and Improvement Co.

J. M. BERRY, President, Bedford City, Va.

Sales of Bedford City Stock will be discontinued on and after MAY 31st at PRESENT FIGURES. Only a limited amount to offer until that date. This is SOLID and SAFE.

LOTS will be offered for sale Privately after JUNE 3d. Call and get Prospectus. See Plats at office of QUARLES & McCURDY, 1212 Main Street, Agents.

Sole Agent for the Richmond Cedar Works' Celebrated MOTH-PROOF RED CEDAR CHEST.

VERITABLE WORDS OF REV. SAM P. JONES.

The following is an extract from a letter written by the World's Renowned Evangelist: "I returned from Tyler, Texas, on the 12th. I find my wife has been taking ROYAL GERMETUER to the great upbuilding of her physical system. She is now almost free from the distressing headaches with which she has been a martyr for twenty years. Surely it has done wonders for her. I wish every poor suffering wife had access to that medicine."

Again, on February 6th, he writes: "My wife, who has been an invalid from nervous sick headache, has been entirely cured by six weeks' use of Dr. King's ROYAL GERMETUER. Her health is perfect. In three weeks two of my children were cured completely of nasal catarrh. It is truly a great remedy."
