An Entire Village Destroyed,
MASSILLON, OHIO, Sept. 10.—The little village of baiton, located nine miles both of here, was totally destroyed by the early this morning. The fire originated in a stable, and while the direct origin is unknown, it is presumed that it was prompted by tramps taking quarters there for the night. The entire loss is estimated at \$200,000, the heaviest losers being the Royal Insurance Company. The post-office department and entire contents are included in the fire. The Canton, Massillon and Orville fire departments were hastily summoned, and responded, but their presence was of no avail, as sufficient water could not be procured to do any good. The clusens are frantle with grief over the loss of their business blocks and residences, and homeless women and children are seen on every corner, crying bitterly. An Entire Village Destroyed.

campaign for Congress is in progress.
The feature of the occasion was a relaying talking match, participated in by Mr.

procession and "death of Ilberty"
spectacle is abandoned, owing to
use obduracy of certain farmers, who
were expected to bring teams to help and
provisions for thirty men and twenty
horses. The crowd at the afternoon meeting numbered 1.200. The tent seats 8.00.
Mr. Coxey raked the plutocrats, and his
hearers cheered him to the echo.

Cardinal Taschereau Resigns. Coxey's Unique Campaign for Congress, of making an escape to the Union lines. The department thereby returned to the rule followed in all similar cases by Secretaries Usher. Cox. Dehano. Chandler, Schurz, Kirkwood. Teller, and Lamar-in fact, by every Secretary of the Interior since the war, except Secretary Noise.

Under previous rulings, notably in the case of Louis Perles, although it was conclusively shown by the record and admitted by the claimed a pension was a focured while he was actually serving in the Confederate army, pension was althowed, and also in numerous other cases upon the unsupported statement that desertion and joining the ranks of the case may was intended as a device of escape. Thus, there were placed on the pension rolls a class of men who deserted the Union cause for the Confederate service, and were held as prisoners of war at the close of the rebellion; or began service in the Confederate army, when it was apparent.

NEW YORK, Sept. 10.—While to-day's market was a narrow one, the undertone was decidenly firmer, the result of efforts on the part of small operators to cover contracts put out has week. London bought small amounts St. Paul, Northern Faculte preferred, Union Facilite, and other low-priced stocks, and thus added to the discomitture of the small shorts. At the start the market ruled irregular, and there was a disposition to sell Rock Island and Burlington and Quincy. These stocks were affected by special causes. In the case of the former it was dgain asserted that the company intended to cut its dividend. President Cable, of the road, who is in the city, refused to express any opinion about the matter. The directors are to act the latter part of the month. Burlington and Quincy was influenced by the rumors that the September Government report would show the condition of corn to be only 55 percent, a considerable short interest having been made on this theory. The official report given out after business hours to-day shows the average of corn to be fully le points above this estimate. It remains to be seen how me shorts will take this development o-morrow. CHICAGO, ILL., Sept. 10.—Notwithstanding the fact that this was a holiday,
in Liverpool, the wheat market here was
fairly active, without reference to the
English situation. During last night
there were frosts in the horthwest, and
the curb was higher on this fact, the
regular market opening with the unofctal gain well maintained. A leading
local professional was selling "puts" previous to the opening, afterwards selling
wheat to protect himselt. The market,
after a good opening, preserved a good
undertone, prizes holding steady. Towards the close of the session New York
wired a new "tip" on the Government
report, to the effect that wheat and oats
would be decidedly bearish and corn

His side of the engine and the first
