WHAT SHALL WE EAT To Keep Healthy and Strong?

A healthy appetite and common sense are excellent guides to follow in matters of diet, and a mixed diet of grains, fruits and meats is undoubtedly the best, in spite of the claims made by vegetarians and food cranks generally.

As compared with grains and vegetables, the fat and greasy meats, and especially highly concentrated forms and is digested and assimilated more quickly than vegetables or grains.

Dr. Julius Remousson, on this subject, says: "Nervous persons, people run down in health, of low vitality, should eat plenty of meat. If the digestion is feeble at first it may be easily strengthened by the regular use of Stuart's Dyspepsia Tablets after each meal. Two of these excellent tablets taken after dinner will digest a thousand grains of meat, eggs or other animal food in three or four hours, while the malt diastase also contained in Stuart's Tablets, cause the perfect digestion of starchy foods, like potatoes, bread, etc., and no matter what the stomach may be, no trouble will be experienced if a regular practice is made of using Stuart's Dyspepsia Tablets, because they supply the pepsin and diastase so necessary to perfect digestion of low vitality, should eat plenty of meat.
