The California Minstrels gave an entertainment in Logan last Saturday evening. They should go to California. In that State Vigilance Committees sometimes redress the inflictions on a suffering public. The article copied on the first page from a late issue of the Cincinnati Enquirer, reviewing the Welden murder, will be found very interesting. The writer has this original theory, that King was a party and that the murder was committed at an earlier hour than was generally supposed, enabling King to be in Logan at the time he was seen.

Cleanings From the Back Townships.

Lancaster, O., is to have a rolling mill. Lancaster has an electric light company. A new bank is to be started at Canal Winchester, Ohio.

S. S. Allen has taken charge of the New Plymouth Graphic. The Jackson Herald wonders "Where does all the bad weather go to when it clears off?" We have not given the subject much thought, but would say on a venture, to the Ohio Legislature. Since Wolf, of Hocking, left, it is all wether up there.

A branch of the State Humane society was organized at Lancaster, Wednesday evening last week, with Hon. A. C. Drinkle, President; F. C. Whitley, Esq. and Dr. J. H. Goss, Vice Presidents; G. W. Welsh, Esq., Secretary and Hon. Tall Slough, Treasurer.

A gifted poet writes: "The devil arose from his little bed, and washed his face and combed his head." They asked the New York Graphic: "We hope not to be considered profane if we ask where in hell he got his water?" Very likely at Athens, O., or at the Artesian well at the Ohio Penitentiary.

The Marietta Times of last week says: The eighth week of the big revival in Harmar, shows no abatement in the interest. The church is packed to suffocation long before the hour for services to commence, and the altar is crowded nightly. The number who have been converted up to date will reach close on to 300.

According to the Delaware Herald the "soph" and the "fresh" of the University made Rome howl Sunday night in the region of the "cobbler" houses and brought forth the meditations of the weary sleepers—that is, they would be sleepers if, the college boys would give them a chance. Like occurrences are noted in the Hocking Valley, occasionally.

Bro. Wesley McClintock is doing local work on the Sentinel while Bro. Green recuperates from the fatigue of his Washington pilgrimage. The above condition of affairs and the fact that Local Editor Davenport, of the Gazette, was absent last week following up the Mikado show company, accounts for the phenomenal excellence of the last week's issue of the Logan papers.

The Welden inheritance. The Court was occupied several days this and last week in determining the question of the rightful heirs of the Welden property. The question was, who of three persons murdered, died first. The inheritance of the property depending upon the establishment of that fact. The real estate of Welden was distributed to his nearest of kin years ago, in accordance with a will. The rule of law in property personal is different. About a year ago a trial was had for the purpose of disposing of Mrs. McClurg's estate, the question then being, who of the women died last. The Jury found that Nancy Hite died last, and hence inherited her mother's property.

The case just tried was who died first or last, Welden or Nancy Hite? The Jury returned a verdict that Welden died first. The point is this: If Welden died first, his estate would descend to his sister, Mrs. McClurg. Then if she dies next, her and her husband's property goes to her daughter Nancy Hite, and from her to her relations nearest of kin, uncles, cousins, &c., on her father's side. If on the contrary the girl was the first to ever possessed anything, and she and her mother killed before Welden, the Welden heirs would inherit the property.

The case was ably handled at the trial just closed—Col. W. W. Will Price and Judge Brasse appearing for the Welden heirs and advocating the theory that Welden was killed last. The heirs of Nancy Hite were represented by Judge Grogan and Bob Price. Mr. Hansen represented the interests of the widow, Mrs. Clurg.

There was nothing in the testimony presented, however, that was repeatedly published—Judge Brasse argued this novel idea that after the women having been murdered first, and Welden returned to the house and to some extent accomplished the original design of robbery. Col. W. W. Will Price's presentation of his case to the Jury was clear and forcible, and one of the ablest forensic efforts ever heard in the Court House.

Judge Grogan's speech covered the entire grounds and certainly carried conviction to the Jury. Judge Brasse's speech was an address of legal talent, developing torribly every point possible to make for his side of the case. Will Price's argument was highly creative, bold and original, and the highest order of legal talent. Bob Price was called on unexpectedly and made a brilliant off-hand argument, that commanded closest attention.

Mr. Bright closed the argument in a speech embodying all the facts, and replying to all the points of opposing counsel. The case we hope is now finally settled, and that the property will pass to the persons whom the Jury has determined on legally entitled to it, and that the horrible ghosts of that dreadful tragedy will never again be resurrected in our Court House.

The Vinton Record says: The Fenton Guards are talking of organizing an association for intellectual improvement. The enterprise should be encouraged. We admit that much.

The Orland Correspondent of the New Plymouth Graphic, says: "E. Lee and L. Payne visited Logan last Tuesday. It would be well if they were watched." We've got them on the list.

A Question of Principle.

The action of the President of the University at Delaware in attempting to exclude students from other colleges because they are under suspension at that institution, is a principle as devoid of humanity as that of denying a laborer work at all points in the Valley, because it was his misfortune to incur the displeasure of some senseless sycophant.

If the punishment of the student was in excess of what they or their friends thought was right, a question they should certainly be allowed to consider, and desired to withdraw from the institution, we can conceive of no intelligent reason why they should not be permitted to do so.

The formation of chains that can be so manipulated in California as to squeeze out the life blood of a man in Maine, is in opposition to the spirit of our constitution, of divine law and is a specimen of handiwork that should never be sent out from the work shops of our great seats of learning.

The single idea in the doctrine of "rings" and "syndicates," is to place civil liberty on the cooling board.

The Pope of Rome, despite all the abuse that has been heaped upon him has never advocated one measure more arbitrary than that of the President of the University at Delaware.

It was not an earthquake. There was much talk on the streets Monday last, about a mysterious rumbling sound and shaking of buildings at 10 o'clock in the morning, and it was generally thought that we had felt the shock of an earthquake.

Rumors, late in the evening, disproved this theory and stated that there had been a tremendous explosion somewhere.

In the telegraph reports of the daily papers, Tuesday morning, is given a report of a frightful explosion at Miami Powder Co. Works, five miles from Xenia, O. The details of the disaster are sickening.

The explosion occurred in the dry house which contained 50,000 pounds of powder. Three men, named Christy McCune, aged 50; Mike Haney, aged 35; and Henry Franklin, aged 30, were together with the building literally blown to pieces. Fragments of the bodies were gathered up in baskets.

This was the most terrific explosion ever experienced at that point. Doors and windows were crushed in and the effects of the shock felt over one hundred miles away.

A very annoying error occurred in the notice of the school celebration of Washington's birthday. We sent our office boy to Mr. McCray at the school house with a note requesting information concerning the celebration. Mr. McCray very kindly prepared a program and gave it to the boy. Returning from the school house, he was not on the street by a boy named Patterson. The two combined to have a "joke," and wrote at the bottom of the grammar class notice—

"The class was addressed by Harry Patterson." The printers knew nothing of this interpolation and printed it as a part of Mr. McCray's report. As soon as the proprietor of the Sentinel discovered that the Sentinel boy was a party to this intended insult to the class, he was at once discharged.

This explanation and apology is due to the class and teacher, and Superintendent. Miss Downey, and not Miss McCarty, is the teacher. Rev. Burns addressed the class.

A Query Regarding the Appeal of an Ordinance.

To the Editor of the Sentinel. I notice in the last issue of your paper, an ordinance repealing an ordinance passed about one year ago, and which gave to the Carr Bros. of Zanesville, the franchise of the streets and alleys of this city to lay pipes for the conveyance of natural gas.

It will be remembered at the passage of the first ordinance, that certain well-known citizens of this town asked that the same rights be accorded them, but for some reason they were left out in the cold by the Council.

What influences, if any, were brought to bear upon the actions of the Council in this matter, has never been made public. There were possibly none.

The question naturally arises now. Why has the Council repealed that ordinance at this time? Has any new organization asked for a like franchise?

If the Council was induced to favor the Carr Bros. one year ago to the "promises" they then made, their explanation of the reasons for breaking the conditions of the ordinance should be considered. They cannot commence operations because their money is invested in other localities. The same condition of affairs existed one year ago, and why should they now, after a considerable outlay of money in the way of leases, etc., allow the enterprise to go by default, is a practice alien to correct business principles. Many petitions, perhaps, have been sent up to heaven that they depart from this region and their indifference in this sense, might be ascribed to a direct intervention of Jehovah. Even if this is true, what is to be done with the options and leases they have taken upon hundreds of acres of land in this county? Will the Legislature have to pass a special act, releasing them from these obligations? If the Council wanted to rebuke the Carr Bros. for not meeting the conditions of the ordinance by repealing it, why was it not done nine months ago? To one who is unacquainted with the workings of our municipal government, this looks very strange, and suggests another question: Was the Council really candid in desiring to get rid of the Carr, or is it only a move to open the way for another foreign invasion, the plans of which, have not yet been submitted to the man/body of the Council?

A little light on this subject will be thankfully received.
