

Successful Exhibitors.

A Complete List of Prizes Awarded at the Hocking County Fair.

The Hocking County Board of Agriculture has awarded the premiums won by the exhibitors at the fair in August. The attendance was large and beyond the anticipation of those who had the enterprise in charge. Hocking county can have successful fairs and with the same energy shown by this year's management, the next exhibition can be made a more pronounced success than the one this year. The Journal-Gazette has lent every assistance in its power to the enterprise and will continue to do so if the management displays the same energy in the future as it did this year. The following is the list of prize winners in every department:

HORSES.
Roadsters—Stallion over 3 years, 1, J. C. Morgan; 2, W. A. Griffith.
Stallion, 2 years, 1 and 2, S. S. Ruble.
Horse Colt, 1, E. W. Davis; 2, Wm. Ditton.
Gelding 3 year, 1 and 2, Geo. B. Williamson.
Brood mare with special, 1 and 2, U. J. Wright.
Mare, 3 years, 1 and 2, Geo. B. Williamson.
Mare 2 years, 1 and 2, J. J. Karshner.
Mare 1 year, 1, O. J. Wright; 2, Frank Linton.
Mare colt, 1, O. J. Wright; 2, W. H. Nixon.
Standard Bred—Stallion over 3 years, 1 and 2, S. S. Ruble.
Mare with special, 1 and 2, S. S. Ruble.
Draft Horses—Stallion over 3 years, 1, J. C. Morgan; 2, R. E. Frey.
Gelding 2 years, 1 and 2, U. J. Wright.
Horse colt, 1 and 2, Elmer White.
Mare with special, 1 and 2, Elmer White.
Mare 2 years, 1 and 2, U. J. Wright.
General Purpose Horses—Stallion over 3 years, 1 and 2, J. C. Morgan.
Stallion 2 years, 1 and 2, U. J. Wright.
Gelding 2 years, 1 and 2, U. V. Harden.
Mare 3 years, 1 and 2, Henry Hansel.
Mare 2 years, 1, O. J. Wright; 2, C. H. Frasure.
Miscellaneous Horses—Carriage horse, 1 and 2, G. W. Benedum.
Pair carriage horses, 1, Frank Linton; 2, G. W. Williamson.
Draft team, 1, J. W. Brooks.
Ponies—Team of ponies, 1 and 2, Joe Case.
Single driver, 1, Scott Braddock; 2, Joe Case.
Pony mare, 1, Joe Case.

CATTLE.
Cow over 3 years, 1 and 2, J. H. Conkle.
Yoke oxen over 3 years, 1, O. J. Wright; 2, Homer Evans.
Yoke of oxen 2 years, 1 and 2, Homer Evans.
Fattest steer, 1 and 2, O. J. Wright.

SHEEP AND GOATS.
Fine Wool Fall Blood—Buck over 3 years, 1 and 2, F. P. Martin.
Buck 1 year, 1 and 2, F. P. Martin.
Buck lamb, 1 and 2, F. P. Martin.
2 ewes 3 years, 1 and 2, F. P. Martin.
2 ewe lambs, 1 and 2, F. P. Martin.
Grades—Buck 2 years, 1, F. P. Martin; 2, Geo. Conkle.
Buck 1 year old, 1 and 2, Geo. Conkle.
3 ewes 1 year, 1 and 2, C. A. Frasure.
3 ewe lambs, 1, Geo. Conkle.
Middle Wool—2 ewes 3 years, 1 and 2, Phil Chapman.
Swoop Stakes, no second premiums—Buck, Wm. Herd of Sheep, F. P. Martin.
Pair Angora Goats, 1, Emerson Poston; 2, Frank Adcock.
Pair Angora Kids, 1, Emerson Poston; 2, Frank Adcock.

HOGS.
Huck—Boar over 6 months, 1, Sow with special, 1, Sow pig, 1 and 2, John Dougherty.
Whito—Boar over 6 months, 1, John Dougherty.

POULTRY.
Chickens—Barned Plymouth Rock, 1, E. D. Evans; 2, W. H. Woodgard.
Black Breasted Red Game, 1 and 2, Frank Minner.
Single O. Brown Leghorn, 1 and 2, E. D. Evans.
White Wyandot, 1 and 2, E. D. Evans.
Rose O. Brown Leghorn, 1 and 2, J. C. Mettler.
Game Bantam, 1 and 2, J. J. Karshner.
Buff Cochon Bantam, 1 and 2, Frank Minner.
Spangled Hamburg, 1 and 2, Frank Minner.
E. I. Red, 1 and 2, E. D. Evans.
White turkeys, 1, Wm. E. Hick.
Barned guinea, 1 and 2, Wm. E. Hick.
Muscovy ducks, 1, J. J. Karshner.
Toulouse geese, 1 and 2, J. J. Karshner.
Common geese, 1 and 2, Wm. E. Hick.
Dry land geese, 1, Wm. E. Hick; 2, Jennie Nancarrow.

GRAINS.
Red wheat, 1, J. F. K. dau; 2, S. A. Mathias.
Black wheat, 1 and 2, D. C. Weltner.

Pears—Jefferson and Belle, 1, Eph Shultz.
Dutchess, pear size to rule, 1, T. D. Trimmer.

GARDEN VEGETABLES, ETC.
No second premiums—White Luxury pumpkin, Wm. E. Hick.
Japanese Pie, Wm. E. Hick.
Hundred weight, Wm. E. Hick.
Sweet, C. A. Frasure.
Mammoth Chille, Wm. E. Hick.
Grapes—Ives Seedlings, G. W. Marks Concord, Moore's Early and Ray's Early, Eph Shultz.

POTATOES.
Early Ohio, 1, Ed Jourgensmeier; 2, G. W. Hensel.
Seneca Beauty, 1, J. F. Krinn; 2, C. J. Wright.
Beauty of Hebron, 1 and 2, J. W. Smith.
Early Market, 1, S. A. Mathias; 2, C. J. Wright.
Early White Star, 1, E. W. Mason.
Early Rose, 1, Mrs. Charles Wright; 2, O. J. Wright.

PAINTINGS, DRAWINGS AND DECORATIONS.
No second premiums—Portrait from life in oil and flowers in oil, D. C. Weltner.
Life in water colors, landscape in water colors, flowers in water colors, landscape in pastel, still life in pastel, Emma Floyd.
Decorated china, Mrs. W. F. Eisele.
Pen drawing, lettering, etc.—Special pen drawing, special crayon drawing, plain lettering, wood carving, Jacob Geiger.

FLOWERS.
No second premiums—Geranium and palm, Phil Chapman.
Fusia and begonia, J. M. Conkle.

Fear For Safety of Columbus Doctor.

Fears are entertained by Mr. and Mrs. Frank C. Rochester that their son, Dr. Boyd Rochester, now on his way to Manila, may possibly have been a passenger on the steamship Hong Kong Maru which was in the path of the typhoons which swept the coast of China. The last word received from him was a letter mailed at Honolulu Aug. 31, saying he was about to sail on the Hong Kong Maru for Manila.

Regular ships making the trip to Manila travel by way of China. But once a month the course is changed and the transport goes by way of Yokohama, thence to Manila. In his letter young Rochester said he would not get to China on his trip. This gives the parents some confidence that he probably escaped the disaster near China by going by way of Yokohama.

Colonel J. Linn Rodgers, who has just returned from the far East, feels certain there are several ships having the name "Hong Kong" with some other word attached.

The Hong Kong Maru is due at Manila today and word is expected immediately from the son. Mr. Frank Rochester telegraphed to the Pacific Mail Steamship company at San Francisco last night to learn if the Hong Kong Maru had been wrecked. He expects to receive an answer this morning.

Ill fate seems to have pursued Dr. Rochester, who is on his way to practice his profession of medicine in the Philippines. He was a passenger on the transport Manchuria, which was recently stranded near Honolulu.

The Hong Kong Maru, the second boat to pass, took on board 160 passengers, who had been stranded, and among these was Dr. Rochester.

Mr. F. C. Rochester of the Normandie received a cablegram yesterday from his son, D. Alexander Sands Rochester announcing the safe arrival of the "Hong Kong Maru" at Manila. This message allays all fears that the Hong Kong Maru was among the vessels lost in the typhoon which wrecked so many vessels. Dr. Rochester was on the Manchuria when she was beached, and he sailed from Honolulu August 31 and stopped only at Japan.

The Hong Kong Maru did not touch China.

This news will be gladly received by the many friends of Dr. Rochester throughout the state.

DRAGGING THE ROAD

A MISSOURI FARMER'S VEICE FOR IMPROVING THE HIGHWAYS.

How D. Ward King Invented His Road Drag—Highways Put in Excellent Condition and Maintained at Small Cost by the Plan.

Probably no invention for road improvement has been talked about and written about as much as the King road drag, and it has aroused great interest among the farmers throughout the country. In the following article from Farming will be found some new and interesting facts about this method of improving country highways at small cost:

Ten years ago a Missouri farmer who had grown tired of wading through a "slough of despond" every spring when the roads were soft, and who had seen his neighbors lose time, money and patience when their wagons were bogged deep in the mire or their horses tugging and straining in their harness to get a half load to market, decided that there must be some remedy for this condition. One day in thinking it over he made the astonishing discovery that what made the roads muddy was mud, and that if the road was worked into such a shape that the water would drain off instead of soaking into the ground after every rain the roads would cease to be muddy.

He rigged up a homemade contrivance out of an old wooden pump stock that the frost had spoiled and an oak post. By means of three pieces of fence board he nailed these together so that they were held parallel to each other. Then he made a rough plank platform on which to stand and by means of wire hitched his team to this clumsy affair at such a point that it would drag along over the road with a slant of about forty-five degrees.

He began with the road that ran in front of his own farm. When it was at its worst he drove up and down from his own "out gate" to that of his nearest neighbor. Like a huge mason's trowel smoothing off mortar, it scraped along, cutting down the inequalities and rough places and filling up the wagon ruts. He kept at it, and after a number of draggings, in place of the flat basin that had served as a water course for every storm to settle in, he had built up a road with a crown and surface that was smooth enough to shed water "like a duck's back" in

short, he simply demonstrated the soundness of his major premise. "If I can get rid of the mud the roads will cease to be muddy." The device is called a "split log road drag."

The man who had by such simple means worked such wonders with his road is D. Ward King of Maitland, Mo.

TWO PHOTOGRAPHS, SHOWING A ROAD BEFORE AND AFTER BEING DRAGGED.

Even after having perfected the road drag the reason that it worked this wonder was not entirely clear to its inventor until he received inspiration from observing a hog wallow. He says: "One day I noticed that water was standing in one of these wallows long after the ground all about it had become dry. Probably the benefit of state aid and that they may better appreciate the importance of the proposed amendment. If it is adopted the legislature can levy one-fourth of a mill, and that quarter of a mill will build some nice stretches of highway."

When he was in Egypt Mark Twain hired two Arab guides to take him to the pyramids. He was familiar enough with Arabic, he thought, to understand and be understood with perfect ease. To his consternation he found that he could not comprehend a word that either of the guides uttered. At the pyramids he met a friend, to whom he made known his dilemma. It was very mysterious, Twain thought. "Why, the explanation is simple enough," said the friend. "Please enlighten me, then," said Twain. "Why, you should have hired younger men. These old fellows have lost their teeth, and, of course, they don't speak Arabic. They speak gum-Arabic."

Here is a thing which all cigar smokers might observe with profit to themselves. Before lighting a cigar bite off the end and, placing the part to be lighted between your lips, blow through it. In this way you get rid of a fine dust that accumulates in a cigar when it is dry, which is apt to inflame your vocal chords and injure your voice. It is a valuable hint to vocalists, and there are quite a number of professional opera singers who never light a cigar until they have blown out the dust. To the failure to do this may be attributed in great part the throat diseases with which steady smokers are afflicted.

AN INTELLIGENT WITNESS.
A Farmer Who Knows the Advantage of Good Roads.
The following extract from a letter from Clayton Conroy of Channahon, N. J., to State Highway Commissioner, Surgeon of Maine is the intelligent testimony of a farmer on the advantage of good roads, and based upon facts instead of theories, says Good Roads Magazine. And while local conditions vary, the principle involved—that is, the economy of easy transportation—is applicable everywhere:
"I live upon the line of an improved

PAPER BAG HOUSEKEEPING.

With a Little Thought It Could Be Made a Source of Comfort.

Much is said in criticism of the tendency to live in paper bags so far as food is concerned. Now, on the other side it can be claimed justly that paper bags make housekeeping possible where none could exist if food could not be bought in small quantities from day to day or even meal to meal. Space is so contracted in city homes that it is often wiser to let the items of the dinner remain in the market and grocery until nearly time to use them. Buying in small amounts is not extravagance, for there is less temptation to waste.

By giving thought to the housekeeping that is limited to half and quarter pounds of supplies may yet yield much comfort. Monotony and lack of thought are the especial danger. It gets to be easier to live on bread and tea and canned stuff than to cook, but it need not be so, and these faults are noticeable where there is opportunity for a broader system of housekeeping.

"My husband has no appetite and is tired of meat and potatoes," said a woman with a large kitchen and outfit for cooking. "Why don't you cook him a couple of eggs in tomatoes?" was my reply, explaining the method of scooping out the seeds from the tomatoes, dropping a raw egg in each, seasoning and baking them. "This would give him the elements in both meat and vegetables, and if seasoned tastily with salt and pepper it is most appetizing." "Oh, but it would be such a lot of work!" she exclaimed, shrinking from doing anything out of her usual rut, and my advice was lost. Yet in what is termed paper bag housekeeping another woman would have served the tomato and egg hot from a chafing dish or gas range in half an hour from the time she brought them in from a grocery, while the first housekeeper, with her pantry and coal fire, would plod along in the same dull repetition of cookery. Lack of help in the house has also made what is sometimes given the name of light housekeeping a necessity, and in the present state of things it is hard to see how this sort of living can be eliminated or why it cannot be made a source of comfort—Exchange.

HOW TO USE A DRAG.

Some Points on Improving a Highway by the King Method.

An Illinois highway commission has issued a bulletin on the split log, or King drag, which contains these instructions for its manipulation:

Make a light drag, which is hauled over the road at an angle so that a small amount of earth is pushed to the center of the road.

Drive the team at a walk.

Ride on the drag; do not walk alongside.

Begin at one side of the road or wheel track, returning up the opposite side.

Drag the road as soon after every rain as possible, but not when the mud is in such a condition as to stick to the drag.

Do not drag a dry road.

Drag whenever possible at all seasons of the year. If a road is dragged immediately before a cold spell it will freeze in a smooth condition.

The width of traveled way to be maintained by the drag should be from eighteen to twenty feet. First drag a little more than the width of a single wheel track, then gradually increase until the desired width is observed.

Always drag a little earth toward the center of the road until it is raised from ten to twelve inches above the edges of the traveled way.

The amount of earth that the drag will carry along can be very considerably controlled by the driver, according as he stands near the cutting end or away from it.

When the roads are first dragged after a very muddy spell the wagons should drive, if possible, to one side until the roadway has a chance to freeze or partially dry out.

The best results from dragging are obtained only by repeated applications.

Remember that constant attention is necessary to maintain an earth road in its best condition.

An Argument For State Aid.

Ole Peterson, one of the most ardent advocates of good roads in Minnesota, is making a strenuous effort to arouse the people to support the proposed constitutional amendment, to be voted on in November, empowering the state legislature to make a direct tax levy for road purposes, says the Good Roads Magazine. In discussing state aid he recently said: "You will find that from 40 to 45 per cent of the taxable property of the state is in city and village property, and I think it no more than just and proper that this portion of wealth should be taxed in connection with other property in the state for the benefit of better country roads. The citizens of rural districts should be thoroughly conversant with these facts, in order that they may fully realize the benefit of state aid and that they may better appreciate the importance of the proposed amendment. If it is adopted the legislature can levy one-fourth of a mill, and that quarter of a mill will build some nice stretches of highway."

Queer Language.

When he was in Egypt Mark Twain hired two Arab guides to take him to the pyramids. He was familiar enough with Arabic, he thought, to understand and be understood with perfect ease. To his consternation he found that he could not comprehend a word that either of the guides uttered. At the pyramids he met a friend, to whom he made known his dilemma. It was very mysterious, Twain thought. "Why, the explanation is simple enough," said the friend. "Please enlighten me, then," said Twain. "Why, you should have hired younger men. These old fellows have lost their teeth, and, of course, they don't speak Arabic. They speak gum-Arabic."

A Child's Party.

It doesn't pay to let the ages of the children who are to be invited to a party extend over too wide a range of years unless the party is so big that you can divide it up into groups. Have plenty of favors for the youngsters to take home with them, as many different kinds of sandwiches and simple cakes and sweets as you can invent and have plenty of games ready to spring at a possible dull moment, and then—the party's bound to be a success.

Blankets.

When blankets have become thin and unsightly from long use have them washed, put two or three together and cover them with pretty sateen to make quilts. Button down the quilts here and there, mattress fashion, to keep them in proper shape and finish off with a nice frill of sateen.

From London Bridge in a Sack.

Some years ago a porter named Fuller, employed at Billingsgate market, London, made a bet that he would jump from London bridge tied up in a sack, his only stipulation being that he should be provided with a knife, which he was not to open till he touched the water, with which to rip open the sack. He succeeded in accomplishing the feat and when picked up by some friends in a boat was none the worse for his dive.

Beauty Depends on Toilet Preparations.

to a very great extent. The finest skin will roughen, the whitest teeth turn yellow, and the most luxuriant hair fall out, if neglected.
You cannot overlook your toilet if you would become beautiful or retain your beauty. More than ever you must use only the purest and best toilet helps—poor toilet preparations are worse than none.
We can supply you with pure, fresh and wholesome toilet goods of every description. We are convinced of the superiority of REXALL Toilet Preparations for we know their ingredients.
REXALL TOILET CREAM will keep the skin clean, soft and fair, giving a beautiful complexion. REXALL TOOTH POWDER insures healthy teeth, kills all germs and sweetens the breath. REXALL 95% HAIR TONIC preserves the hair full, long and silky, free from dandruff. Sold with the Rexall guarantee.
