If asked the question "Have you got a stomach?" it would be safe on general principles, to answer "Yes." But, if you are sure of it, that is, if you ever feel any distress, or eating or any pains of whatever description in the region of the stomach, you had better get something more than an ordinary stomachic; in other words, you have got a diseased stomach.

The stomach is a powerful muscle, and the proper remedy for a tired muscle is rest. Try the Shaker Digestive Cordial, for this product not only contains digested food, which will nourish the system without any work on the part of the diseased organ, but it aids the digestion of other foods as well. You can test its value in your case for the trifling sum of 10 cents. Sample bottles at this price are carried by all druggists.
