

The Marion Mirror announces the completion of the Indiana and Bellefontaine Railroad to that place from the Cleveland road. Thirty-five miles west of Bellefontaine will be laid during the coming fall.

The Railroad bridge across the Muskingum river at Marietta will be the largest in the State. It will be over 600 feet long, and will be so high as to be above the reach of the highest floods.

A schooner bearing at her mast head the names of Pinck and Knox, arrived at Toledo a few days since, and was obliged to leave the harbor without a cargo—being the first vessel this season that has not been able to obtain one.

A new pass has been discovered from Santa Fe to California, through the Rocky Mountain Range. It was discovered about a year ago by Captain Walker, and he represents it as being practicable for horses and wagons, as the road from Santa Fe to Missouri. An official survey will probably soon be made.

New York, Aug. 4.—The verdict rendered in the case of the Henry Clay, was death from the result of the act of the owners and officers. The act evinced a depraved mind, regardless of human life. The verdict accords with the second statutory definition of murder.

Private advices from Paya an engagement took place between Flores and Urbina—the latter completely routed—Flores intended to enter Guayaquil on the 10th.

Buffalo, Aug. 1.—The cholera broken out at Buffalo—a gentleman, his wife, or three children and clerk died within a few hours of each other. Great excitement prevails, and the people are leaving the city.

Buffalo, Aug. 4.—The cholera is disappearing; there were 13 deaths within the last 24 hours. Judge Deveaux, the wealthiest man in Niagara county, died of cholera at the Falls yesterday.

Several deaths by cholera occurred in Sandusky City.

Savannah, Aug. 3.—Great conflagration this afternoon—twenty houses burnt—loss \$75,000 to \$100,000. It swept every house from Hubby street north to Margaret, and south to Laurel, east of the canal. The houses were principally wood. One hundred families homeless.

G. W. Crawford, of Georgia, the Secretary of War under General Taylor, who brought odium upon the Administration by his connection with the Galphin claims, has come out for Pierce and King. It is presumed the Democratic press will now keep silent on this subject, as they have got the Chief of the Galphins.

Twelve hundred packet ships, and one hundred and forty-five steam vessels are engaged in commerce between Ireland and England.

WOMEN IN THE ASCENDANCY.—The census of France, of 1761, gives one curious result. The number of women is greater than that of men! The difference is extraordinary, being nearly a million and a half. In Paris, the difference is on the other side, there being twenty-five thousand more men than women.

According to the French census, one Frenchman in seventy dies by his own hands; and one woman in one hundred and twenty-five.

Mr. Webster has prepared a family burial place at Marshfield, at a cost of about \$1,000, on the summit of a hill in one of his fields; over-looking the ocean.

The noted California Indian Chief, Battiste, while inebriated at a feast, lately, drew his sword and plunged it into the body of his wife, killing her instantly. Next day her body was burned upon a funeral pile, with all her effects, even to some gold dust she had collected the day before.

A director of the Ohio Central Railroad in a letter to the Philadelphia American says that Whaling will in any event be the eastern terminus of that road. Thus the statements of the Pittsburgh papers that the road would cross the river four miles below town, is erroneous.

The American Scientific Association will meet this year in Cleveland, commencing Aug. 18th. A large number of the most learned men in the country are expected to be in attendance.

A ship of over 2,000 tons burthen, is now building in New York City, to be propelled by Ericsson's Caloric engine. This engine is propelled by heated air.

"Ole Bull" is paying a visit to Gen. Pierce, at Concord, N. H.—Statesman.

He, doubtless, needs FIDUCIA to keep his courage up. Cat gut music is a sovereign remedy for asphyxia.—Wheeler Gas.

IMPROVED STOCK.—The Scio (O.) Gaz. says that Messrs. Waus & Renick, who left for England some weeks ago to purchase cattle have returned to this country, having brought nearly twenty head of improved stock principally from north of England.—Dr. Waus was expected to arrive home last week.

The number of prisoners in the penitentiary from Cincinnati at the present time, is 48.

The expenses of the Indiana Convention for revising the Constitution, were \$66,683—more than ours, considering the size of the State.

James Struble, Esq., one of the Representatives in the Ohio Legislature from Hamilton county, has resigned on account of ill health. Mr. Struble died shortly after his resignation. Mr. S. was a member of the Constitutional Convention.

The Star Fair will be held at Cleveland the 15th, 16th, and 17th of September.

The government is about to try the experiment of illuminating the light houses with gas—the last Congress having appropriated \$6,000 for this purpose.

A counterfeiter, named Henry Brown, made his escape from the watch house in Cincinnati, on Saturday morning, by changing clothes with his wife, who came to see him.

The Macon Citizen says that Senator Dawson will not abide by the decision of the Union Convention, but will go heartily for the Whig nominees—Scott and Graham.

The Ohio Siege Company are running a line of omnibuses between Zanesville and Wheeling. They pass over the road each way by daylight, accompanied by good conductors.

The friends of Internal Improvements are to hold a Convention in Union, Monroe county, Va., on the 19th inst. County conventions have been held, and delegates appointed in Kanawha, Putnam, Mason, and other counties.

The cultivation of madder is being pursued extensively and profitably in various portions of the Northern States.—Kat. Gaz.

The entire Locofoco party have been growing madder ever since the nomination of Pierce.

THE U. S. TREASURY.—It is stated that after paying the appropriation in the Deficiency Bill, there still remains in the U. S. Treasury sixteen millions three hundred thousand dollars.

A MONSTER CLAIM.—Mr. Hargous has filed a claim for \$44,000,000, with the United States Government, arising out of the failure of Mexico to recognize the validity of the Garay title.

The new custom-house building in New Orleans, will cover upward of two acres of ground.

Several robberies have been committed in Vanceboro and Manchester in this State.

"Natures seldom bestows two great gifts on one person."—N. Y. Bee Post.

The editor of the Post refuses his own postulate. He is himself the first poet and the biggest liar in the United States.—Tyrn Whig.

Dr. Olds is the Locofoco candidate for Congress in the Pickaway and Franklin district.

SAD OCCURRENCE.—Mr. Joel Stokes, of Warren county, Ohio, formerly proprietor of the Hamilton Telegraph, was killed instantaneously on Monday last, by being thrown from his horse.

Col. Henry, one of the Whig electors at large in Tennessee, addressed the people of Davidson county for three hours on Saturday the 10th inst. The Nashville Banner says it was the most effective speech ever delivered in Tennessee. The news is good from Tennessee.

The Catholic College at Worcester, Mass. was burned on the 15th inst. Loss \$50,000, mostly covered by insurance.

A Floating Bethel, for the benefit of boatsmen, has been designed at Cincinnati. It is to be 100 ft. long, the lower part to be used for the storage of goods, the upper for a religious chapel and a reading room.

A few days since, 13 miles above Cincinnati, three boys in a skiff attempted to slide the waves of a steamer, when their frail boat filled and sunk, drowning all of the boys.

The organist and chimer of the Floating Palace fell into the river and was drowned at Cincinnati, a few days since.

Ex-Governor Vance lies dangerously ill, at his residence 24 miles north of Urbana. There is little or no hope entertained for his recovery.

An Eastport paper mentions that a sea captain of that port, recently returned from a short voyage, on seeing the names of "Pierce and King" on a flag waving over Leavitt's building, exclaimed to his companion—"Hallo! Pierce and King! they must be some new folks that have moved in since I've been gone!"

Cincinnati, August 4.—A fire broke out in Fulton this morning, and destroyed Burton Hazen's saw mill, a large quantity of lumber, and 12 dwelling houses; loss \$30,000; very little insurance. The weather continues very dry—corn crops suffering very much; and it is said, under the most favorable circumstances cannot be over half crop in consequence. Corn very scarce.

A Good Order.—Judge Thompson, of Philadelphia, has issued an order, by which all bars of hotels, and all other places of business in that city are directed to be closed on the Sabbath day; and all police officers are enjoined strictly, to see that the order is enforced.—Zanesville Gazette.

Clergymen Wanted.—Twenty towns in Texas are desirous of obtaining the services of Presbyterian ministers, and offer them an adequate support.

NATIONAL MONUMENT.—There has recently been received in Washington, for insertion in the columns to Washington, a beautifully embellished block of marble, contributed by the Grand Lodge of the Independent Order of Odd Fellows of the State of Maryland. It took the premium of the Maryland Mechanics' Institute last year.

Francis H. Warning, Esq., British Consul at Norfolk, Virginia, died on the 23d inst.

The Postmaster General has directed that documents and speeches may be franked separately, and when tied in bundles the direction of the outer documents shall be required. This will save members of Congress, during the ensuing political campaign, an immense deal of writing and clerk hire.

The Cincinnati Times says two funeral trains met at the two Mile House, near that city, the one going to the cemetery and the other returning from it. Both stopped, and the men alighted to drink. A general fight ensued, in which several persons were severely bruised, and the coffin considerably damaged.

Warrants have been issued for the arrest of the proprietor and officers of the Henry Clay.

A circus rider named Sands was killed in Wayne county, New York, in attempting to walk a ceiling with his head downwards.

Locofoco Practice.—Since the present Board have had charge of the State House, they have given a contract for the iron work amounting to over fifteen thousand dollars, to a Locofoco directory of the Penitentiary—all of it without any public notice, and most of it without any pretence of competition, so far as can be learned.—Journal.

New Orleans, August 2.—The barque Charlotte Henry, for Liverpool, burned on Saturday at S. W. Pass—Cargo—1800 bales of cotton. Officers and crew saved.

ROCHESTER, August 2.—During the last 24 hours 25 cases of cholera and 7 deaths—48 hours 66 cases and 26 deaths.

More than a thousand men are now at work on the railroad from Steubenville to Newark, and the whole is to be completed by a year from next winter, by which time the whole route from Steubenville to St. Louis will be finished.

The Cleveland Herald says that arrangements have been completed for the construction of two splendid steamboats to run from Cleveland to Buffalo in nine hours.—They will be completed next spring.

Some of the insurance companies of New York City, since the burning of the Henry Clay, have required all steamboats to surrender their policies, and have them endorsed: "No loss payable if a fire occurs when racing with other boats, or on a wager as to time."

CONSUMPTION.—Experiments have been made by some of the London physicians, for curing diseases of the lungs, by breathing medicated vapors. So successful have been these experiments, that a hospital has been built for the cure of bronchitis and consumption; about 75 out of every 100 admitted into it have been cured.

The Whig State Central Committee of New York, have called a convention to meet at Syracuse on the 22d of September, to nominate candidates for State Officers.

Gerrit Smith has had to pay \$12,000 on his security for the bail of Chaplin, who was arrested in Maryland for assisting slaves to escape.

The "murrain" is making bad havoc among the cattle in Western Tennessee some farmers having lost fifty or sixty head.

A marine railway is to be constructed on the Indiana side of the falls in the Ohio river, at Louisville. It will be one and a half miles long.

Cassius M. Clay says a Free Soil electoral ticket will be run in Kentucky, to support the nominees of the Pittsburgh Convention.

The value of the real and personal property of Cincinnati, by the assessor's book, is \$38,000,000—an increase of two and a half millions over last year.

The Akron Branch of the Cleveland and Pittsburgh Railroad, is to be continued on to Millersburg.

A German paper in Philadelphia calculates the number of political prisoners now confined in the prisons of Europe at 76,680, and that over 200,000 have fled to avoid imprisonment for the cause.

Several negro boys were torn down and the windows of others riddled, in Hillsborough, last week. The cause of the riot was, resistance offered by the blacks, to the Marshal, who was arresting some of them for fighting among themselves.

A Temperance Camp Meeting for North Indiana, will be held at South Bend, Indiana, on the 5th and 6th days of August next. Its object is to awaken public attention to the passage of a law prohibiting the traffic in ardent spirits.

A writer in the National Intelligencer recommends the cultivation of Tea and Indigo, in the United States. He thinks tea could be raised in this country, at an expense of seven cents a pound, and Indigo at thirty cents.

It is estimated that more than 100,000,000 of human beings have died of cholera in the last 25 years, in all parts of the globe.

It is said that preparations for laying the foundation of a monument to Henry Clay will be speedily made by the citizens of Lexington, and that Daniel Webster is expected to deliver the oration.

THE MAINE LAW.—The Portland Argus says: "There was not a single committeé to the watch-house during the night of the independence celebration—an event unheard of since we were a city, and long before." It attributes the fact to the Maine liquor Law.

The Columbus and Xenia Railroad, says the Cleveland Herald, have declared a dividend of 10 per cent. for the last six months, a dividend unprecedented in the history of railroads in this country.

Job Work.—We are now ready to execute all kinds of Job Work with neatness and dispatch. We have just received a supply of fine letter and cap paper, ivory-surfaced cards, and book ink, for job work. Give us a call.

Kitchin, Adm'r of the estate of John T. Radford and Thos. Ashworth 2d, Adm'r of James Ashworth dec'd; Matilda L. Griffin, Adm'r of Wm. Griffin dec'd; H. Holt and N. Stansbury Adm'rs of Benjamin Bellinger dec'd; H. A. Burnap, Guardian of Jerry and Nancy Carline. aug 12-3w. M. HECKERD, Probate Judge.

Ordinances of the Town of Pomeroy. AN ORDINANCE for Protection against Fires. Sec. 1. Be it ordained by the Town Council of the Town of Pomeroy, That it shall be unlawful for any person or persons, in constructing any chimney or flue for the purpose of conducting off smoke in any building, to use any material, except the corporate limits of the town of Pomeroy; to permit any wood or other combustible material to enter into or be in any manner in contact with such chimney or flue, without the same, or any cover or other wooden projection, of such wood or other combustible material and the inner surface of such chimney or flue, a brick or brick, well laid in mortar.

Sec. 2. That it shall be unlawful for any person or persons, to erect, or to permit to be erected, any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, earthen, or stone cover, or other non-combustible substance, in such manner as to surround such pipe, and keep the same at least two inches from any wood or other combustible material, or any projecting structure, or any wooden building, ceiling, floor, or any aperture to any building, without providing in every such partition, ceiling, floor, or any aperture, a stone, brick, ear
