THE CREAMERY PROMOTER.

A good many queries are being received by agricultural journals in different sections of the country relative to the dependence that can be placed upon the so called creamery promoter. The reply given in every instance that has come under our notice is that these chaps should be given a wide berth. This advice is sound and should be followed. These fellows know about as much of the creamery business, the conditions which exist in any given locality and the problems which would arise, as a cat does about Hebrew. They are in the business of promoting creameries primarily for the purpose of filling their pockets with easy money and not to further the dairy or creamery business and to bring profits to the patrons of a creamery enterprise. If the farmers in any section make up their mind that they want to embark in the creamery business—and the decision is a wise one where there are enough patrons to support it—the sensible thing to do is to call in some one who has a permanent postoffice address, the state dairy commissioner, some representative who may send or some man of repute who is known to have had extended and successful experience in the creamery business. Many an enterprise of this kind has fizzled on because of a bad start and because those interested in it did not have an adequate idea of the conditions which really existed or the degree of success that it was possible to attain. The kind of authorities referred to will know about the problems likely to confront a new project of this kind and will be able to give helpful directions and suggestions. The difference between the fat man that would have to be forked over to a fly by night promoter and the modest sum required to defray the traveling and hotel expenses of some reputable creamery authority will go quite a way in buying equipment, coal and machine oil.

A DOUGHTY WEED PEST.

What is coming to be a nefarious weed pest in many a central state and eastern garden patch is crab grass, which is also known by the name five finger, descriptive of the five spurs or sprays into which the seed head is usually divided. This grass is late in sprouting and thus escapes much of the effect of the May and June cultivation. When the garden crops are laid by it gets busy and by Sept. 1, unless it is given frequent attention will furnish as effective a mat over the surface of the ground as would miles of blinding twine secured with twenty-penny spikes. Of course this is hyperbolic, but this figure is the only one that in any adequate degree fits the case. While this grass does not live over the winter in its root system, it yet has the pernicious faculty of sending out lusty roots wherever the recumbent joints touch the ground. The only way to rid a patch of land of it is to work away at it during July and August and prevent any of it from reaching seed. If manure contains the seed it should be well rotted and the seed destroyed before it is applied to the soil.

Where it appears in the lawn the only way to eradicate it is to dig it out with a jackknife or plow up and reseed the lawn anew. It may be kept in check in a fairly satisfactory manner by keeping the lawn grasses in a thrifty and growing condition by frequent watering during the dry weather, or when the crab grass gets in its work. The removal of the clipped clippings by the use of the grass catcher will reduce greatly the amount of seed which will settle among the roots of the grass to germinate next season.

A POSSIBLE CAUSE OF FAILURE.

Many a failure with alfalfa and clover seed is directly traceable to the fact that the soil on which the seed was sown was sour and needed sweetening with an application of lime at the rate of two or three tons per acre. Where such treatment has followed previous failure with alfalfa and clover seed, the results have been secured. The lime should be applied to the land in manure with a spreader or spread with a seeder of some kind which will insure an even distribution. While a sour condition of soil may be inferred from the fact that clover will not grow and from the presence of sorrel, it can be determined much more definitely by running a spade into the earth a few inches and inserting a piece of blue litmus paper, which may be got at any drug store. If the soil is acid this test paper will turn from blue to pink. Of equal importance with the lime treatment is the inoculation of the soil with bacteria in the soil from an established alfalfa field. The tract intended for such use should also be well drained and have a porous subsoil of good depth.

The housewife—it is superfluous to call her busy—can save herself a whole lot of hot work over the ironing board if she will fold the bed linen, towels and all of the underclothing and hose carefully after they are dry and put them away without ironing. If she folds them she must put a crease in them this can easily be done by putting the folded clothes under a heavy weight for a few hours. A whole lot of women are making this short cut in their work, and they are to be commended for their good sense.

With the English the Dorking is the favorite table fowl. It is a remarkably slow grower, attains a large size at maturity.

The steer should be graduated from the feed lot to packing house by the time she is three, and the hen should be made into potpie when she is two years old.

The weather never is to one's liking all the time, but the way the weather clerk superintends the department probably gives as general satisfaction as if the job were turned over to some other fellow.

The boys may feel greater interest in keeping the fields clean if a new and up to date cultivator is substituted for the wobbly old rattletag that has been doing duty for the past ten or twelve years. The growing crops, too, may give decided evidence that they appreciate the change.

Where sawdust is available it makes a very good absorbent for the liquids in stable manures. Fresh sawdust contains an acid which tends to neutralize the alkali of the manure, and while it adds little to the soil in the way of fertilizer, when decayed it furnishes a valuable mold or humus.

The French way of slaughtering horses after they have outlived their usefulness in the harness has some advantages over the practice quite too common in this country of selling broken down animals to some heartless brute who will exact the last ounce of work from them, quite likely killing them in the process. The old country way means at least a quick and merciful death.

That humus-decaying vegetable mold—is a requisite for the proper growth of vegetable life is shown nicely when a crop such as corn is planted on spots which have been scraped off in the process of leveling a piece of land. The growth that is made is stunted and the plants are of a sickly color. It usually requires several seasons of fertilizing and tilling to bring such soils to a normal productive capacity.

Swamp muck might be used on many a farm to good advantage as an absorbent of the moisture and liquids in the stable manure. Such treatment would arrest the dissipation and decomposition of fertilizing elements, while the muck soil would furnish a type of humus that the average soil stands much in need of. For winter use in cold latitudes the absorbent could be thoroughly dried during the summer months and stored under cover where it would be available.

Kansas took a step ahead as a fruit producing state when the law recently passed making the spraying for San Jose scale and other pests compulsory was declared constitutional. The law requires orchard owners to spray and otherwise properly care for their trees. Representatives of the federal department of agriculture and of the Kansas experiment station are planning to thoroughly demonstrate spraying in several counties in the eastern part of the state this season.

The soy bean is being put to a use by Chinese and Japanese farmers which might be adopted with decided advantage by American farmers who live in sections where this legume does well. The oil which is extracted from the bean is taking the place of lard and while the cake which is left after the oil is removed is used with excellent results as a substitute for linseed and cottonseed meal as a stock ration. The advantage of the soy bean is that the growing of it means soil enrichment and not soil impoverishment, as is true of both fax and cotton.

That old friend the pigweed, known also under the names redroot and careless weed, is a very cosmopolitan pest. It tries the religion of the New England farmer, harries the patience of the midstate gardener and is one of the worst bane of the Pacific slope rancher. Its source of profusion and persistence. It will mature all the way from 10,000 to 25,000 seeds in a single season, while if chopped off in the morning there is a tradition that it will send up a shoot and mature a seed before sundown. Its roots go deep and are about as tough as that of an alfalfa plant.

For those desirous of taking up beekeeping there could hardly be available a more concise or practical publication on the subject than farmer's bulletin No. 207, entitled "Bees," recently published by the department of agriculture at Washington, whence it may be had free by sending for it. This bulletin condenses into forty-two pages the practical information and directions necessary in the proper management of an apiary, including location, equipment, general manipulations, swarm management, production of honey and wax, wintering, diseases, etc., as well as much other pertinent general information. At the close of the bulletin is given a list of all publications of the department bearing on the different phases of beekeeping.

In all varieties of apples where color is a requisite, factors of quality and size being the same, the highest prices will be received for that fruit which is the most highly colored. To secure this result sunshine and a free circulation of air are necessary, and this cannot be if the tree has a dense and thickly headed top. The way out is the inauguration of a system of pruning which will open the tops of the trees—the removal of the main leader, a good distance down and the thinning of the lateral limbs. This will not only color the fruit, but it will greatly simplify the labor of spraying and harvesting it, while in years to come, if the pruning is properly done, it will mean that the fruit will be produced within a reasonable distance from the ground instead of at a height where extension ladders will be needed to pick it. Red apples are the money fetchers, and the above is the way to get them.

A Delaware hen, bought to furnish stuffing for a potpie, laid her owner 249 eggs between Jan. 27, 1909, and Dec. 3 of the same year. Unlike the milking habit in dairy cows, the egg producing habit in hens seems incapable of development in any considerable degree by the selection of pullets from mothers of high egg laying capacity.

The writer varied the March pruning of his peach trees considerably this year, cutting some lightly and others severely at blossom time. It is interesting to note that those cut most heavily are not only making the most vigorous growth of new wood, which will bear next year's crop, but carry the best sized and most thrifty looking fruit at the present writing.

When one is contemplating the purchase of fruit or agricultural land in a new section it is not only a good plan to take a spade and investigate the character of the subsoil and look into the exact status of the water table in the tract in an irrigation section, but to take the trouble of inquiring into the business integrity and financial rating of the chap with whom the farm or ranch is listed for sale.

In selecting a site for the orchard it is perhaps natural to make the mistake of choosing a soil which is in reality too rich and fat for the best production of apples. On such soil conditions seem to exist which tend to a production of wood rather than fruit growth, thus defeating the object one has in view. Pears will produce fruit on rich, moist soils, while peach trees should be set on the thinnest soil on the place.

The regular bearing of fruit by trees which have suffered some injury, seriously impairing their vitality, has led orchardists to experiment along the line of a purposeful cutting or wounding of orchard trees with the object in view of getting them to produce something besides healthy and glossy looking leaves. In some cases this is done by removing several narrow strips of bark lengthwise from the trunk of the tree, enough of the bark and underlying cambium being left between the strips removed so that the tree will be able to heal. Another plan followed with considerable success consists in cutting a circular trench about the tree to the depth of three or four feet and four or five feet from the trunk and severing all of the roots which cross it. In both of these methods it is well for the novice to try them on a limited scale with two or three trees.

Next fall there will be inaugurated at Lyndon, Vt., a plan that should commend itself to friends of agricultural education in other parts of the country. The characteristic feature of the plan is a labor system which will enable too ablebodied students to pay their way with the work they do on the farm connected with the Lyndon academy. The expenses for the nine months are figured at \$36 for tuition, \$108 for board and room and \$18 for books. The boys are to be taught the theory of agriculture in the class room and will work these theories out on the farm under intelligent supervision. Remuneration is to be at the rate of 15 cents per hour, or \$25 a month during the summer. This plan will enable many an energetic boy to acquire a helpful education without having acquired a bank account of his own or getting help from the old folks.

A friend whose acquaintance the writer has lately made, though seventy-five years old and financially straitened so that he could well get along without working, nevertheless puts in most every day on his acre ranch, cultivating, haying and raking. He works in rain and shine and seems to enjoy his labor. We asked him the other day why he worked so hard, and he told us he would be lost without something to keep him busy and, besides, he felt better and had a better appetite and slept better. This working within the limits of his strength is doubtless the primary cause of his rugged health and to some extent for the genial good feeling radiating from him. It is a very simple means our good friend takes to keep himself shipshape and his view of things rational and wholesome, but yet one might well be used by many another elderly man with gain to himself and those about him.

WANTS HER LETTER PUBLISHED
For Benefit of Women who Suffer from Female Ills
Minneapolis, Minn.—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women I felt sure it would help me, and I must say it did help me wonderfully. My pains all left me, I grew stronger, and within three months I was a perfectly well woman."
"I want this letter made public to show the benefit women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. JOHN G. MOLDAN, 2115 Second St., North, Minneapolis, Minn.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letters strictly confidential. For 20 years she has been helping sick women in this way. Free of charge. Don't hesitate—write at once.

REAL ESTATE FOR SALE.

FOR SALE—My residence on West George Street, desirable location. Terms to suit purchaser.
DAVID E. WALSH,
Feb 26 to Westminister, Md.

EXECUTORS' SALE OF THE MOST Valuable Farm AND OTHER REAL ESTATE,
In Uniontown District, Carroll County, Maryland.

The undersigned executors of the last will and testament of Elizabeth J. Haines, deceased, by virtue of said will and by virtue of an order of the Orphans' Court of Carroll county, will sell at public sale upon the premises heretofore described, the following properties, viz:

ON SATURDAY, AUGUST 13th, 1910, at 1 o'clock p. m., upon the premises, all that valuable and desirable FARM, known as the "Jordan Farm," containing 153 Acres, more or less, situate on the public road leading from New Windsor to Uniontown, about 1 1/2 miles East of Uniontown and about 1 mile from Linwood Station, on the Western Maryland Railroad. This farm is improved by a large Brick Dwelling House, (11 rooms), large bank barn, with double floors and mows, wagon shed, corn crib, double hog pen, chicken house, work shop, wash house, smoke house, spring house, all of which are in first class condition. There is an excellent orchard of the best young fruit trees and about 10 acres of timber upon the property, also running water to both house and barn. This is the most desirable and productive farm in Carroll county, all the land being in high state of cultivation; level; every field being visible from the buildings, especially fitted for building purposes, in a wealthy community, convenient to churches and schools and near to Railroad Station. It adjoins the lands of Mrs. Annie Stoner, Alice Stouffer and Abraham Taylor and is now occupied by William Bowers.

ON the same day August 13th, 1910, at 3 o'clock p. m., upon the premises, the undersigned will sell all that lot of land, situate on "Clear Ridge" on the public road leading from New Windsor to Uniontown, about 1 mile east of Uniontown, containing 6 Acres and 53 6-10 Square Perches, more or less. This property is improved by a Brick Dwelling House, bank barn, hog pen, wood shed, corn crib, smoke house, wagon shed, wash house, excellent water most convenient to the buildings. This property is most desirably located and adjoins the Stouffer farm, and is now occupied by Frank Palmer.

On Saturday, August 30th, A. D. 1910, at 2 o'clock p. m., upon the premises, the undersigned will sell all that House and Lot of Land containing 84 Square Perches, more or less, situate in Uniontown, Carroll county, Md., improved by a good Weather-boarded Dwelling House, stable, wood shed and other necessary outbuildings, with well of water at the door.

This property adjoins the lands of Melvin Routhahn and others and is now occupied by Arthur Crumbacker.

The above properties offer rare opportunities to all persons desiring valuable, productive and safe investments and can be seen at any time by calling upon the occupants thereof or the undersigned, interested in the purchase of same.

TRUSTEES' SALE OF A VALUABLE FARM,
Near Westminister, Carroll County, Md.

By virtue of the decree of the Circuit Court for Carroll County, in Equity, passed in a cause depending in said Court, wherein Myrtle A. Zapp and others are plaintiffs, and Lena M. Wagoner and John B. Wagoner, her husband, are defendants, being cause No. 4528 on the Equity Docket of said Court, the undersigned, Trustees therein named to sell the same, will offer for sale, on the premises, on

SATURDAY, the 13th day of AUGUST, 1910, at 2 o'clock, p. m. all that farm whereon Theodore L. Zapp resided at the time of his death, containing 137 ACRES and 22 PERCHES of LAND, more or less.

The improvements thereon consist of a large two and one-half story frame weatherboarded dwelling, good bank barn, smoke house, hog house with buggy shed attached, and other necessary outbuildings. There is a well of water at the dwelling with water pipe leading to the barn. There is also a considerable orchard of apple, peach and other fruit trees on the premises.

This farm is in a high state of cultivation, and conveniently watered with a running stream; and is situated between the Bloom and Nicodemus Roads, about five miles from Westminister, and about one-quarter of a mile from Maggitt's blacksmith shop, at the junction of the Bloom and Washington Roads, adjoins the lands of John Polster, Catherine Carr and others. It is convenient to schools and churches, and well worth the attention of persons desiring to purchase a good farm.

Terms of Sale—One-third part of the purchase to be paid by the purchaser or purchasers to the Trustees on the day of sale, or on the ratification thereof by the Court; and the residue in two equal payments, the one to be paid in one year, and the other in two years from the day of sale, with interest, and to be secured by the notes of the purchaser or purchasers, with security to be approved by the trustees, or the whole of the purchase money may be paid in cash at the option of the purchaser. A deposit of \$500.00 will be required of the purchaser on the day of sale.

REAL ESTATE FOR SALE.

DESIRABLE BUILDING LOT AT PRIVATE SALE.

Lot No. 37 of Frizell's Addition to Westminister. Fronting 48 ft. on north side of Church St., bounding 198 ft. on Center Alley and 48 ft. on John's Alley, and bounded on the east side by Wm. B. Thomas' land. For terms and further information apply to
JOHN T. CASSELL,
No. 173 West Main St.,
June 17-17 Westminister, Md.

TRUSTEES' SALE OF 3 Desirable Properties AND Thirteen Building Lots,

In and near the City of Westminister, in Carroll County, Maryland.

By virtue of a decree of the Circuit Court for Carroll County, in No. 4540 Equity, wherein Wm. B. Nelson et al. are plaintiffs, and John F. Nelson et al. are defendants, the undersigned Trustees will offer at Public Sale, on the different premises below described, on

WEDNESDAY, AUGUST 17, 1910, at 1 o'clock p. m., the following properties of which John W. Nelson and Mary A. Nelson, his wife, died seized and possessed, in the following order:

First—All that lot of land situate on No. 164 West Main Street, in the City of Westminister, known as the Nelson Home property, improved with a two-story frame dwelling house, stable and other outbuildings; fronting on W. Main Street 60 feet and running back 181 1/2 feet to an alley. This property will be sold promptly at 1 o'clock.

Second—All the following building lots will be sold on the lots at 2 o'clock p. m.: Those six building lots situate in the City of Westminister, between George Street and Chase Street, some of which adjoin the Dunkard Church on the Park. Three of these lots front 60 feet on Chase Street and three front 60 feet on George Street, all of which lots run back 142 feet to an alley not in use, but said lots and alley have recently been resurveyed and marked. These lots will be offered separately and collectively and sold in the manner in which the greatest sum can be realized.

Also all those six building lots on George Street, adjoining John E. Eckenrode's carriage shop, and opposite David E. Walsh's property, each lot being 60 feet front and running back 151 1/2 feet to an unused alley. These lots and the following lot will be offered separately and collectively.

Also all that parcel of land on the rear of the last described lots, containing 69631 square feet, adjoining John E. Eckenrode's property and fronting E. Street on Bond Street extended. All these lots have been recently resurveyed and marked so that each lot can be easily located and seen by purchasers.

Third—At 3 o'clock p. m., all that unimproved parcel of land, situate on the Uniontown road, about one-fourth mile North West of Westminister, containing 1 acre and 46 perches, more or less, adjoining the lands of John David and Mr. A. W. A. It being the land conveyed by David D. Bonack, trustee of Andrew M. Warner, to John W. Nelson, October 14, 1885, and recorded among the land records in Liber G. A. M., No. 63, folio 322.

Fourth—At 4 o'clock p. m., all that house and lot situate, on the West side of the Washington pike, about one-half mile South of Westminister, containing 1 rood and 29 perches, more or less, improved with a small Stone House, adjoining the lands of J. G. Webster and Benj. F. Gist.

For further information apply to the undersigned Trustees, or Ivan L. Hoff, attorney.

Terms of Sale—One-third cash upon the day of sale or upon the ratification of sale by the Court, and the residue in two equal payments of one and two years from day of sale, or all cash at the option of the purchaser; credit payments to bear interest from day of sale and to be secured by notes of purchaser, with approved security.

WILLIAM B. NELSON, EDWARD O. WEAVER, IVAN L. HOFF, Attorneys. Trustees.
