Another strong reason has arisen for the preservation of the birds from the massacre of fashion. It is that they are the natural police to protect the crops from insects. It is one of the inconsistencies of human intelligence, as well as a travesty on economy, to spend so much money in insecticides while destroying the natural means of keeping the ravages of insects in check.

Domestic Bliss.

They had been trotting in double harness for seven long, weary months, and the honeymoon had bumped the bumps for fair.

"John," she said as she dashed out the breakfast food. "I need a little pin money this morning."

"What you want with the \$5 I gave you last week?" asked the man who had promised to love, honor and pay the freight.

"Oh, I don't remember!" she replied. "It's so easy to spend \$5 and have nothing to show for it."

"Right you are," sighed John. "That was the amount I paid the minister for marrying us."

Opportunity.

The Shakespearean quotation that "There is a tide in the affairs of man, which if taken at its flood leads on to fortune" has been so universally accepted that it has become axiomatic.

Early in the past spring, Prof. Anspen of the Maryland Agricultural College, on the invitation of The Woman's Civic League of this city made an address on beautifying a town and illustrated it by a great number of views taken all over the country.

So much interest was manifested by the citizens in the subject that Prof. Anspen he would try to have the college select Westminster as one of the places in which to render assistance in furthering this idea.

He subsequently reported that the college authorities had agreed to allow him to help the Civic League.

To that end, it was decided to select the school grounds of the Central High School as it was one of the best places in the city and application was made by the Civic League to the School Commissioners to take up the matter.

Prof. Anspen has visited Westminster four times in connection with this subject and has had prepared a comprehensive plan for the beautifying of the school grounds, all without expense of any kind to the School Commissioners.

The college has further agreed to pay part of the cost of the plants that might be used.

The Civic League has agreed to pay half of the cost of grading and preparing the grounds, as well as to pay 1-3 of the cost of the plants.

The School Commissioners would like to pay the other half of the cost for grading etc., and 1-3 of the cost of the plants.

After vainly trying all season to have the School Commissioners take some positive and decisive stand in the matter, Prof. Anspen is disgusted with this apparent lack of appreciation and co-operation of the School Commissioners and is about ready to recommend to his college its withdrawal of the offer, as there are quite a number of other towns in the state that are anxious to have the offer extended to them.

Now the position of matters is simply this: Will the School Commissioners allow this opportunity to slip away?

Whatever may be done in the future to beautify and make attractive this absolutely barren spot, upon which not one cent has ever been spent looking to its improvement, must be done without outside assistance or expert advice.

Will the tide be allowed to ebb and leave us stranded in our ugliness?
