Kidney disease often advances so rapidly that many a person is firmly in its grasp before aware of its progress. Prompt attention should be given the slightest symptom of kidney disorder. If there is a dull pain in the back, headaches, dizzy spells or a tired, worn-out feeling, or if the kidney secretions are offensive, irregular and attended with pain, procure a good kidney remedy at once.

Thousands recommend Doan's Kidney Pills. Read the statement below.
Mrs. Mary A. Twist, 917 S. Hanover St., Baltimore, Md., says: "I felt badly all the time as the result of kidney trouble. I had pain across the small of my back and at times I could hardly endure it. I finally used Doan's Kidney Pills and they helped me a great deal. I have seldom had trouble from my back since, but when I have had a few doses of Doan's Kidney Pills I have made my kidneys normal. All I ever said about this remedy before still holds good."

ALFALFA The Profitable Hay Crop
Yields Four to Six Cuttings a Year of Easily Cured and Most Nutritious Hay Wonderful Increases in Yield Each Successive Year.

ALFALFA "GOLD" BRAND
"Its long, branching roots penetrate far down, push and crowd the earth this way and that, thus constituting a gigantic subsoiler. These become an immense magazine of fertility. As soon as cut, they begin to decay and liberate the vast reservoir of fertilizing matter below the plow to be drawn upon by other crops for years to come."

Alfalfa seed sown during August or September will yield four to six cuttings next season. Frequent cuttings thicken out the stalk and makes it stool out and grow off better.

Alfalfa ranks higher than Timothy in feeding value. In fact, it might be termed both corn and hay, as it is almost a complete food. Experiment stations place the feeding value of Alfalfa hay at \$20 per ton, as against Timothy hay at \$12 per ton. This, with the fact that Alfalfa will easily yield, on good land, 6 to 10 tons of splendid hay per acre, makes it a valuable crop. In the Western States that are well set in alfalfa sell readily at \$100 to \$200 per acre. The acreage of Alfalfa is increasing very largely all over the Middle and Southern States; our farmers are fast beginning to realize what a valuable crop it is. Alfalfa will succeed where you can get good, well-drained soil, but the land must be well and thoroughly prepared for best results.

It is also never to be used for pasture; it is too valuable as a hay producer to risk injury from stock. A heavy application of lime is of decided benefit—2,000 to 3,000 pounds per acre. Alfalfa is usually sown broadcast at the rate of 20 to 30 pounds to the acre. On alfalfa seed is the highest grade, strong germinating seed of the best and cleanest quality possible to procure.

We offer American Dry Land Non-irrigated Alfalfa Seed, Bolgiano's "Gold Brand" Fancy, 50% per cent pure.

If you want the best field seeds of any kind, always insist on getting Bolgiano's "Gold Brand" Standard Clovers and Grasses, Cow Peas, Winter Vetch, Timothy Seed, Red Top or Herd Grass, Orchard Grass, Winter Oats, Tall Mead Oats Grass, Millet, Permanent Pasture Mixture, Dwarf Essex Rape, all varieties of Turnip Seed, including Cow Horn, Southern Seven Top, Yellow Globe, etc.; Cabbage, Kale, Spinach, and all other seeds. Fate of French Criminals.
In France a criminal who is classed as incorrigible is either sent to the Islands of Safety, off the Guinea coast—of which Devil's Island, where Captain Dreyfus languished, is one—or to St. Laurent or St. Jean, a little higher up the river, says a writer in the "Wide World." In this terrible climate, with the scorching sun beating down upon them, the criminals are made to work in the gold mines or opening up the jungle, and as the officers in charge have practically unlimited power over them, they are often ill-treated. The inhabitants of the prisons range from murderers of the worst type to professional thieves and desperadoes. About one-fifth of the criminals are women, and—a thing that seemed incomprehensible to me—were permitted to marry the male convicts! In some cases wives had joined their convict husbands. What a dreadful children must be raised in this atmosphere of crime and brutality.

Escape is the one thought of the convict. The doors leading to the jungle are not guarded any too well, and the officers in charge do not seem to care if a criminal escapes. The best, knowing very well that men seldom get away alive from this terrible region of deadly malaria and ferocious wild beasts. Fugitives have also to reckon with the natives, to whom the hunting of convicts is great sport. In many instances prisoners escape in batches of twenty and thirty, and are more dangerous to meet than wild animals, as their main object is to obtain weapons and food; to get these they will attack and murder without mercy.
